Table of Contents

Foreword .............................................................................................................................................. xxvii
Preface ................................................................................................................................................... xxviii

Section 1
Health Informatics and E-Health Evaluation

Chapter 1
Towards an Evaluation Framework for E-Health Services: Evaluating Criteria from Users Perspective ........................................... 1
Alalwany Hamid, Brunel University, UK
Alshawi Sarmad, Brunel University, UK

Chapter 2
Evaluating Healthcare IT and Understanding the Work of Healthcare are Entangled Processes .... 17
Joseph Schulman, New York Presbyterian Hospital, USA

Chapter 3
Interactive Sociotechnical Analysis: Identifying and Coping with Unintended Consequences of IT Implementation .................................................. 33
Michael I. Harrison, Agency for Healthcare Research and Quality, USA
Ross Koppel, University of Pennsylvania, USA

Chapter 4
The MOBEL Project: Experiences from Applying User-Centered Methods for Designing Mobile ICT for Hospitals ............................................................. 52
Inger Dybdahl Sørby, Norwegian University of Science and Technology, Norway
Line Melby, Norwegian University of Science and Technology, Norway
Yngye Dahl, Telenor Research & Innovation, Norway
Gry Seland, Norwegian University of Science and Technology, Norway
Pieter Toussaint, Norwegian University of Science and Technology, Norway
Øystein Nytro, Norwegian University of Science and Technology, Norway
Arild Faxvaag, Norwegian University of Science and Technology, Norway
Chapter 5
Process-Based Evaluation of Hospital Information Systems: Application of an Information Systems Success Model (PRISE) in the Healthcare Domain ................................................................. 74
Sevgi Ozkan, Brunel University Business School, UK
Nazife Baykal, Informatics Institute Metu, Turkey
Murat Sincan, Informatics Institute Metu, Turkey

Chapter 6
How can Telemedicine Benefit from Broadband Technologies? .......................................................... 91
Vincenzo Gullà, Advanced Digital Technologies (ADITECH SRL), Italy

Section 2
Health Informatics and E-Health Tools and Technologies

Chapter 7
Organisational Factors and Technological Barriers as Determinants for the Intention to Use Wireless Handheld Technology in Healthcare Environment: An Indian Case Study .......... 109
Raj Gururajan, University of Southern Queensland, Australia

Chapter 8
HealthGrids in Health Informatics: A Taxonomy ................................................................. 124
Aisha Naseer, Brunel University, UK
Lampros K. Stergioulas, Brunel University, UK

Chapter 9
Improving Patient Safety with Information Technology ................................................................. 144
James G. Anderson, Purdue University, USA

Chapter 10
Managing ICT in Healthcare Organization: Culture, Challenges, and Issues of Technology Adoption and Implementation ................................................................. 153
Nasriah Zakaria, Universiti Sains, Malaysia
Shafiz Affendi Mohd Yusof, Universiti Utara, Malaysia
Norhayati Zakaria, Universiti Utara, Malaysia

Chapter 11
Emergency Medical Data Transmission Systems and Techniques .................................................. 169
Junaid Ahmed Zubairi, SUNY at Fredonia, USA
Syed Misbahuddin, University of Hail, Kingdom of Saudi Arabia
Imran Tasadduq, FAST – National University of Computer & Emerging Sciences, Pakistan
Section 3
Health Informatics and E-Health Applications

Chapter 12
Developments in Modelling Organizational Issues in Healthcare: Multi Method Modelling

Kirandeep Chahal, Brunel University, UK
Herbert Daly, Brunel University, UK
Tillal Eldabi, Brunel University, UK
Ray J. Paul, Brunel University, UK

Chapter 13
Investigating Trust Relationships in a Healthcare Network

Stefanie Kethers, Monash University, Australia
Günter Gans, RWTH Aachen University, Germany
Dominik Schmitz, Fraunhofer FIT, Germany
David Sier, CSIRO Mathematical and Information Sciences, Australia

Chapter 14
Resource Alignment of ICT in Taiwanese Small Dialysis Centers

Yu-An Huang, National Chi Nan University, Taiwan
Chad Lin, Curtin University of Technology, Australia

Chapter 15
Guideline Representation Ontologies for Evidence-based Medicine Practice

Kai Zheng, The University of Michigan, USA
Rema Padman, Carnegie Mellon University, USA
Michael P. Johnson, The University of Massachusetts Boston, USA
Sharique Hasan, Carnegie Mellon University, USA

Chapter 16
Speeding Up Decision Support: Investigating the Distributed Simulation of a Healthcare Supply Chain

Navonil Mustafee, Warwick Business School, UK
Simon J.E. Taylor, Brunel University, UK
Korina Katsaliaki, Middlesex University, UK
Sally Brailsford, University of Southampton, UK

Chapter 17
Information Security and Privacy in Medical Application Scenario

Sigurd Eskeland, University of Agder, Norway
Vladimir Oleshchuk, University of Agder, Norway
Section 4
Health Informatics and E-Health Impact

Chapter 18
A Process Architecture Approach to Manage Health Process Reforms .................................................. 289
Christine Stephenson, Emirates Airlines, UAE
Wasana Bandara, Queensland University of Technology, Brisbane, Australia

Chapter 19
Replace an Old Functioning Information System with a New One: What Does it Take? .................. 319
Hans Kyhlbäck, Blekinge Institute of Technology, Sweden
Berthel Sutter, Blekinge Institute of Technology, Sweden

Chapter 20
A Quality Assurance Approach to Healthcare: Implications for Information Systems .................. 333
Mark C. Shaw, De Montfort University, UK
Bernd Carsten Stahl, De Montfort University, UK

Chapter 21
Supporting the Development of Personalized E-Health: An Insight into the E-Patient Context ...... 353
Ulrika Joseffson, University of Gothenburg, Sweden

Chapter 22
Adoption of Mobile Technology by Public Healthcare Doctors: A Developing Country Perspective ................................................................. 368
Nesaar Banderker, University of Cape Town, South Africa
Jean-Paul Van Belle, University of Cape Town, South Africa

Section 5
Further Reading

Chapter 23
Computerization of Primary Care in the United States ................................................................. 385
James G. Anderson, Purdue University, USA
E. Andrew Balas, Old Dominion University, USA

Chapter 24
Open Source Software: A Key Component of E-Health in Developing Nations .......................... 410
David Parry, Auckland University of Technology, New Zealand
Emma Parry, University of Auckland, New Zealand
Phurb Dorj, Jigme Dorji Wangchuck National Referral Hospital, Bhutan
Peter Stone, University of Auckland, New Zealand
Chapter 25
Physician Characteristics Associated with Early Adoption of Electronic Medical Records in Smaller Group Practices ................................................................. 423
Liam O’Neill, University of North Texas, USA
Jeffery Talbert, University of Kentucky, USA
William Klepack, Dryden Family Medicine, USA

Chapter 26
An e-Healthcare Mobile Application: A Stakeholders’ Analysis Experience of Reading .............. 433
Niki Panteli, University of Bath, UK
Barbara Pitsillides, Nicosia, Cyprus
Andreas Pitsillides, University of Cyprus, Cyprus
George Samaras, University of Cyprus, Cyprus

Chapter 27
Mobile E-Health: Making the Case ................................................................. 446
Norm Archer, McMaster University, Canada

Chapter 28
The Internet, Health Information, and Managing Health: An Examination of Boomers and Seniors ...................................................................................... 458
Christopher G. Reddick, The University of Texas at San Antonio, USA

Chapter 29
Evaluation of Health Information Systems: Challenges and Approaches ........................................... 477
Elske Ammenwerth, University for Health Sciences, Medical Informatics & Technology, Austria
Stefan Gräber, University Hospital of Saarland, Germany
Thomas Bürickle, University of Erlangen, Germany
Carola Iller, University of Heidelberg, Germany

Chapter 30
Mobile Information Systems in a Hospital Organization Setting .......................................................... 493
Agustin Borgy Waluyo, Monash University, Australia
David Taniar, Monash University, Australia
Bala Srinivasan, Monash University, Australia

Compilation of References ........................................................................ 524

About the Contributors ............................................................................. 576
