Acknowledgment

The editors would like to thank all authors who have submitted chapter proposals, and reviewers for their excellent contributions and insights, without which this book would not have been possible. Not forgetting our editorial representatives, particularly Kristin Roth and Rebecca Beistline, who demonstrated patience and extreme cooperation in the development and production of this handbook; and Lia Maisarah Umar, Eunice Chua, and Dawn Tan provided valuable administrative support throughout the process. Special thanks go to Gary Gorman who, despite his busy commitments, wrote the foreword and gave us a comprehensive overview of the design, content, and use of digital libraries. We are also grateful to IGI Global for the opportunity to publish this handbook, which we hope will be the first of many more books to come in the future.
