Acknowledgment

The editor sincerely acknowledges the help of all persons involved in the collation and review process of this book, without whose support the project would not have been satisfactorily completed. Deep appreciation and gratitude is due to Prof. Dr. Hans Lehrach, Director of the Department of Vertebrate Genomics (Max Planck Institute for Molecular Genetics) for giving me the opportunity to work in his department.

I wish to express my appreciation to my colleague Dr. Christoph Wierling, who has helped me with constructive criticism and helpful suggestions.

Special thanks also go to the publishing team at IGI Global, whose contributions throughout the whole process from inception of the initial idea to final publication have been invaluable. In particular to Joel Gamon, who continuously prodded via e-mail for keeping the project on schedule.

I would also like to thank my father, Dimitirios Daskalakis, for his unfailing support and encouragement during the months it took to give birth to this book.

In closing, I wish to thank all of the authors for their insights and excellent contributions to this book.

Andriani Daskalaki, PhD
Max Planck Institute for Molecular Genetics, Germany
