Acknowledgment

We would like to thank all of the contributors to this volume. First, the chapter authors, without whom there would be no book at all. Second, the referees, who provided detailed and constructive feedback to ensure that the chapters were of the high standard that has resulted. Finally, our heartfelt gratitude goes to the members of staff at IGI Global, particularly Joel Gamon, without whom the project would have stalled at various phases; your faith in us is greatly appreciated.
