# Table of Contents

Foreword .............................................................................................................................................. xv

Preface ................................................................................................................................................... xvii

## Section 1

### Standards

**Chapter 1**
The Open Geospatial Consortium and Web Services Standards ......................................................... 1

*Carl N. Reed, Open Geospatial Consortium, USA*

## Section 2

### Design and Implementation

**Chapter 2**
Managing Granularity in Design and Implementation of Geospatial Web Services .......................... 18

*Elias Z. K. Ioup, Naval Research Laboratory, USA*

*John T. Sample, Naval Research Laboratory, USA*

**Chapter 3**
Enabling Quality of Geospatial Web Services .................................................................................. 36

*Richard Onchaga Moses, Kenya Polytechnic University College, Kenya*

**Chapter 4**
Security and Licensing for Geospatial Web Services ...................................................................... 64

*Bastian Schäffer, University of Münster, Germany*

*Rüdiger Gartmann, Conterra GmbH, Germany*
Section 3
Registry and Discovery

Chapter 5
OOSTethys/Oceans IE Service Registry Based on Catalog Service for Web

Manil Maskey, The University of Alabama in Huntsville, USA
Helen Conover, The University of Alabama in Huntsville, USA
Ken Keiser, The University of Alabama in Huntsville, USA
Luis Bermudez, Southeastern Universities Research Association, USA
Sara Graves, The University of Alabama in Huntsville, USA

Chapter 6
Using Distributed Semantic Catalogs for Information Discovery on Spatial Data Infrastructures

Fabio Gomes de Andrade, Federal Institute of Education, Science and Technology of Paraiba, Brazil
Fábio Luiz Leite Jr., Paraiba State University, Brazil
Cláudio de Souza Baptista, Federal University of Campina Grande, Brazil

Section 4
Semantic Web

Chapter 7
VISION: An Infrastructure for Semantic Geospatial Web Services

Sven Schade, Institute for Environment and Sustainability, Italy

Chapter 8
Geospatial Semantic Web Services: A Case for Transit Trip Planning Systems

Zhong-Ren Peng, University of Florida, USA & Tongji University, China
Tian Zhao, University of Wisconsin – Milwaukee, USA
Chuanrong Zhang, University of Connecticut, USA

Chapter 9
Linked Data: Connecting Spatial Data Infrastructures and Volunteered Geographic Information

Carlos Granell, Universitat Jaume I, Spain
Sven Schade, Institute for Environment and Sustainability, Italy
Gobe Hobona, University of Nottingham, UK

Chapter 10
Ontological and Semantic Technologies for Geospatial Portals

Naijun Zhou, University of Maryland College Park, USA
Section 5
Distributed Computing

Chapter 11
Geospatial Web Services for Distributed Processing: Applications and Scenarios ........................................ 245
Theodor Foerster, University of Münster, Germany
Bastian Schäffer, University of Münster, Germany
Bastian Baranski, University of Münster, Germany
Johannes Brauner, Technische Universität Dresden, Germany

Chapter 12
Implementing Geospatial Web Services for Cloud Computing............................................................. 287
Gobe Hobona, University of Nottingham, UK
Mike Jackson, University of Nottingham, UK
Suchith Anand, University of Nottingham, UK

Section 6
Workflows

Chapter 13
Semantic Web Enabled Intelligent Geoprocessing Service Chaining....................................................... 310
Peng Yue, Wuhan University, China
Lianlian He, Hubei University of Education, China
Liping Di, George Mason University, USA

Chapter 14
Geospatial Service Composition in Grid Environments......................................................................... 332
Tino Fleuren, University of Kaiserslautern, Germany
Paul Müller, University of Kaiserslautern, Germany

Section 7
Applications

Chapter 15
Web Services for the Global Earth Observing System of Systems......................................................... 365
George Percivall, Open Geospatial Consortium, USA, UK and Australia

Chapter 16
Operational Delivery of Customized Earth Observation Data Using Web Coverage Service ........... 385
Wenli Yang, George Mason University, USA
Chapter 17
Using Geospatial Web Services Holistically in Emergency Management ........................................ 401
   Ning An, Oracle America, Inc., USA
   Gang Liu, Lanzhou University, China
   Baris Kazar, Oracle America, Inc., USA

Chapter 18
A SOA-Based System for Territory Monitoring ................................................................................. 426
   Elena Roglia, Turin University, Italy
   Rosa Meo, Turin University, Italy

Chapter 19
GeoBrain Online Analysis System: A SOA-Based Geospatial Web Portal ....................................... 455
   Weiguo Han, George Mason University, USA
   Liping Di, George Mason University, USA
   Peisheng Zhao, George Mason University, USA
   Xiaoyan Li, George Mason University, USA

Compilation of References .................................................................................................................. 475

About the Contributors ....................................................................................................................... 512

Index .................................................................................................................................................. 521
