Acknowledgment

We would like to thank our colleagues who contributed the diverse range of chapters to the book. The response to the call for chapters was overwhelming and we were pleasantly surprised that other colleagues shared our interest, passion, and enthusiasm for learning spaces. These contributions demonstrate the importance of community and the quality of work that is being undertaken across a broad spectrum of roles and professions. We would also like to thank the authors for willingly reviewing chapters and providing extensive feedback to improve the quality of each chapter. Within the academic community this is a priceless contribution.

We wish to thank Professor Jan Herrington and Professor Ron Oliver for assisting with the review of chapters.

In particular we wish to thank Dr. Dominique Parrish for her significant contribution to the book in terms of project management, administration, and communication with authors and IGI.

We would also like to thank the staff at IGI Global for their patience and guidance in the process of editing this book.

We would also like to thank the many people we have worked with on the Spaces for Knowledge Generation Project http://www.skgproject.com which was the inspiration for the development of the book.
