The authors would like to thank the IGI Global team for their support in completing this project, and all the cyber educators and online learners who in one form or another shared their experiences, concerns, and insights with us. Special thanks go to our friend and colleague Dr. Darin Molnar who dedicated much of his time to proofreading, formatting, and providing suggestions to enhance the content of the manuscript. Finally, we would like to thank Dr. Roderick Sims for authoring the foreword of this manuscript, and for inspiring cyber educators all over the globe to pay attention to the role of interaction in digitally mediated learning environments.

**Special Thanks from Dr. Baggio**

I would like to thank all my friends, family, and colleagues for their patience, support, and encouragement while we undertook this monumental task. An extra thanks to my audiences who listened to me present versions of this material all over the globe and for their precious feedback and insights. I would like to acknowledge my children: Robert, Alexa, and Victoria whose constant use of digitally mediated communication served as inspiration. Finally, Yoany, who kept reassuring me that it would happen, and it finally did.

**Special Thanks from Dr. Beldarrain**

First and foremost, I must acknowledge my Heavenly Father for providing me with the strength I needed when it all seemed impossible to achieve. Special thanks go to my co-author Bobbe for all the wonderful ideas and for her high-spirited friendship. My deepest gratitude and admiration goes to my family, especially my Generation Z children, Adrian and Vanessa, for being a constant source of inspiration and determination, and for their unconditional love. As digital natives and online learners, they were always ready to discuss the other side of digitally mediated communications and share their unique perspective. Lastly I would like to thank
all my colleagues, awesome students and audiences for providing ideas, insight, and sharing my passion for cyber education via learning modules, training events, conference proceedings, journal articles, manuscripts, presentations, impromptu round-table discussions, and elevator speeches!
