Table of Contents

Volume I

Preface ........................................................................................................................................... xxxix

Acknowledgment .......................................................................................................................... xlii

Section I
Approaches, Frameworks, and Tools to Manage Information in Healthcare Organizations

Chapter I
The Use and Evaluation of IT in Chronic Disease Management .............................................. 1
Julia Adler-Milstein, Harvard University, USA
Ariel Linden, Linden Consulting Group & Oregon Health & Science University, USA

Chapter II
E-Health Technology for Detecting and Managing Chronic Disease ...................................... 19
Craig Lehmann, Stony Brook University, USA
Lisa Benz Scott, Stony Brook University, USA
Jean Marie Giacini, Stony Brook University, USA

Chapter III
Novel Data Interface for Evaluating Cardiovascular Outcomes in Women .............................. 34
Amparo C. Villablanca, University of California, Davis, USA
Hassan Baxi, University of California, Davis, USA
Kent Anderson, University of California, Davis, USA

Chapter IV
A Telehealth Technology Model for Information Science in Rural Settings .......................... 54
Thomas W. Miller, University of Kentucky, USA
Robert D. Morgan, Texas Tech University, USA
Jennifer A. Wood, South Texas VA Health Care Center, USA
Chapter V
Health Technology Assessment and Health Economics ................................................................. 69
  Steven Simoens, Katholieke Universiteit Leuven, Belgium

Chapter VI
Electronic Patient Monitoring in Mental Health Services ............................................................ 87
  Werner G. K. Stritzke, University of Western Australia, Australia
  Andrew C. Page, University of Western Australia, Australia

Chapter VII
The Role of Subjective Computer Training and Management Support to Use Computers in Community Health Centers ................................................................. 104
  Farideh Yaghmaei, Shadeed Behesthi University of Medical Science and Health Services, Iran
  Rohan Jayasuriya, University of Wollongong, Australia

Chapter VIII
Health Information Standards: Towards Integrated Health Information Networks .................... 113
  Stergiani Spyrou, The Medical School, AUTH, Greece
  Panagiotis Bamidis, The Medical School, AUTH, Greece
  Nicos Maglaveras, The Medical School, AUTH, Greece

Chapter IX
Context-Based Intelligent Service for Healthcare Applications ..................................................... 128
  Alexander Smirnov, St. Petersburg Institute for Informatics and Automation of the Russian Academy of Sciences, Russia
  Tatiana Levashova, St. Petersburg Institute for Informatics and Automation of the Russian Academy of Sciences, Russia
  Nikolai Shilov, St. Petersburg Institute for Informatics and Automation of the Russian Academy of Sciences, Russia

Chapter X
Multicriteria Models for E-Health Service Evaluation ................................................................. 143
  Gulcin Buyukozkan, Galatasaray University, Turkey
  R. Ufuk Bilsel, The Pennsylvania State University, USA

Chapter XI
Bio-Behavioral Medicine and Information Technology ............................................................... 161
  John E. Carr, University of Washington, USA

Chapter XII
DRGs and the Professional Independence of Physicians ............................................................. 173
  Lorraine Frisina, University of Bremen, Germany
  Mirella Cacace, University of Bremen, Germany
Chapter XIII
Smoking Assessment through Information Technology ......................................................... 192
Paola Gremigni, University of Bologna, Italy

Section II
Key Issues and Concerns of Various Healthcare Information Management Implementations:
Evidence from Practice

Chapter XIV
Benefits and Barriers to Adoption of Information Technology in U.S. Healthcare .................. 217
James G. Anderson, Purdue University, USA

Chapter XV
Evidence on the Efficacy of Integrated Care ................................................................. 230
Torben Larsen, University of Southern Denmark, Denmark

Chapter XVI
Information Technology and Data Systems in Disaster Preparedness for Healthcare
and the Broader Community .......................................................................................... 247
Barbara J. Quiram, Texas A&M Health Science Center, USA
Cara L. Pennel, Texas A&M Health Science Center, USA
S. Kay Carpender, Texas A&M Health Science Center, USA

Chapter XVII
The Use of Interactive Voice Response Systems to Improve the Quality and Safety
of Ambulatory Care ........................................................................................................ 264
Natalie Oake, Ottawa Health Research Institute, Canada
Alan J. Forster, Ottawa Health Research Institute; The Ottawa Hospital;
The University of Ottawa, Canada

Chapter XVIII
Improving the Quality of Healthcare Services through Information and Quality Interrelation ...... 288
P.A. Kostagiolas, Ionian University, Greece
D. Kaitelidou, University of Athens, Greece

Chapter XIX
Improving the Quality of Healthcare Research Data Sets .................................................... 305
Biswa dip Ghosh, Metropolitan State College of Denver, USA

Chapter XX
The Implementation of Innovative Technologies in Healthcare: Barriers and Strategies ............ 321
Eddy M. M. Adang, Radboud University Nijmegen Medical Center; The Netherlands
Chapter XXI
Case Management: The Global Emergence of a Contemporary Practice ........................................ 333
   Dana Deravin Carr, Jacobi Medical Center, USA

Chapter XXII
Practical Action and Mindfulness in Health Information Security .................................................... 350
   Jeff Collmann, Georgetown University Medical Center, USA
   Ted Cooper, Stanford University Medical Center, USA

Chapter XXIII
A Care Informatics Approach to Telehomecare Applications ............................................................ 368
   Anthony P. Glascock, Drexel University, USA
   David M. Kutzik, Drexel University, USA

Chapter XXIV
Shared Healthcare in a Regional E-Health Network ........................................................................ 383
   Kari Harno, Helsinki University Central Hospital, Finland

Chapter XXV
Physicians and the Utilization of Information Technology ............................................................... 398
   James W. Holsinger, Jr., University of Kentucky, USA

Chapter XXVI
The Development and Implementation of Patient Safety Information System (PSIS) ..................... 414
   Jeongeun Kim, Seoul National University, Korea

Chapter XXVII
Planning Successful Telemedicine and E-Health Systems ............................................................... 433
   Michael Mackert, The University of Texas at Austin, USA
   Pamela Whitten, Michigan State University, USA
   Emily Krol, The University of Texas at Austin, USA

Chapter XXVIII
The Graphic Display of Labour Events ............................................................................................... 447
   Olufemi T. Oladapo, Olabisi Onabanjo University Teaching Hospital, Nigeria

Chapter XXIX
Anesthesia Information Management Systems (AIMS) ................................................................. 465
   Loren Riskin, Duke University School of Medicine, USA
   Christoph B. Egger-Halbeis, Stanford University School of Medicine, USA
   Daniel J. Riskin, Stanford University School of Medicine, USA
Chapter XXX
Understanding Computerised Information Systems Usage in Community Health .................... 482
  Farideh Yaghmaei, Shadeed Behesthi University of Medical Science and Health Services, Iran

Chapter XXXI
Knowledge Workers, Librarians, and Safety: Opportunities for Partnership ............................. 495
  Lorri Zipperer, Zipperer Project Management, USA

Volume II

Chapter XXXII
Current Challenges in Empowering Clinicians to Utilise Technology ....................................... 507
  Jean M. Roberts, University of Central Lancashire, UK

Chapter XXXIII
IAM: A Comprehensive and Systematic Information Assessment Method for Electronic Knowledge Resources ........................................................................................................ 521
  Pierre Pluye, McGill University, Canada
  Roland M. Grad, McGill University, Canada
  Carol Repchinsky, Canadian Pharmacists Association, Canada
  Barbara Farrell, University of Ottawa, Canada
  Janique Johnson-Lafleur, McGill University, Canada
  Tara Bambrick, McGill University, Canada
  Martin Dawes, McGill University, Canada
  Gillian Bartlett, McGill University, Canada
  Charo Rodriguez, McGill University, Canada
  Barbara Jovaisas, Canadian Pharmacists Association, Canada
  Karen Fortin, Canadian Pharmacists Association, Canada
  Dyan Tufts-Conrad, Canadian Pharmacists Association, Canada
  Jon Salsberg, McGill University, Canada
  Ann Macaulay, McGill University, Canada
  France Légaré, Université Laval, Canada
  Carmen Loiselle, McGill University, Canada

Section III
Human and Social Aspects of Healthcare Information Management

Chapter XXXIV
The Role of Information Technology for Knowledge Exchange amongst Healthcare Stakeholders .......................................................... 550
  Lynne M. Robinson, Dalhousie University, Canada
Chapter XXXV
Strategies to Meet Knowledge Transfer Needs ................................................................. 564

Lorrie K. Roemer, Intermountain Healthcare, USA
Sharon M. Bigelow, Intermountain Healthcare, USA
Emerson P. Borsato, Intermountain Healthcare, USA

Chapter XXXVI
Integration Issues in the Healthcare Supply Chain .......................................................... 582

Spyros Kitsiou, University of Macedonia, Greece
Aristides Matopoulos, University of Macedonia, Greece
Maro Vlachopoulou, University of Macedonia, Greece
Vicky Manthou, University of Macedonia, Greece

Chapter XXXVII
Researching Health Service Information Systems Development ......................................... 598

Said Shahtahmasebi, The Good Life Research Centre Trust, New Zealand

Chapter XXXVIII
Art and Technology for Health ......................................................................................... 616

Stephen Boyd Davis, Middlesex University, UK
Magnus Moar, Middlesex University, UK
Rachel Jacobs, Active Ingredient, UK
Matt Watkins, Active Ingredient, UK
Robin Shackford, Active Ingredient, UK
Leif Oppermann, University of Nottingham, UK
Mauricio Capra, University of Nottingham, UK

Chapter XXXIX
Appreciative Inquiry: Research for Action ......................................................................... 631

Jan Reed, Northumbria University, UK
Agneta Nilsson, IT University of Göteborg, Sweden
Lena Holmberg, Apprino, Sweden

Chapter XL
Systems Thinking as the Model for Educating Future Healthcare Managers in Information Technology .................................................................................................................. 646

Gerald R. Goodman, Texas Woman’s University, USA
Anne L. Selcer, Texas Woman’s University, USA

Chapter XLI
Social Marketing in Healthcare .......................................................................................... 662

Manuel W. Mah, University of Calgary, Canada
Chapter XLII
Ageing, Learning, Technology, and Health Management .................................................. 674
   Gillian M. Boulton-Lewis, Queensland University of Technology, Australia
   Laurie Buys, Queensland University of Technology, Australia
   Sylvia L. Edwards, Queensland University of Technology, Australia
   Helen Partridge, Queensland University of Technology, Australia

Chapter XLIII
Methodology to Set Regulations for Safe Reuse of Wastewater and Sludge for Agriculture in Developing Countries Based on a Scientific Approach and Following the New WHO Guidelines ................................................................. 690
   B. Jiménez, Universidad Nacional Autónoma de México, Mexico
   I. Navarro, Universidad Nacional Autónoma de México, Mexico

Chapter XLIV
Psychological Guidelines in Cardiac Rehabilitation and Prevention ........................................ 710
   Marinella Sommaruga, Maugeri Salvatore Foundation, Care and Research Institute, Italy

Chapter XLV
Health-Related Quality of Life Measures in the Information Age ........................................ 725
   Kevin J. Warrian, University of Western Ontario, Canada
   George L. Spaeth, Jefferson Medical College/Wills Eye Institute, USA

Chapter XLVI
Health Technology Assessment: Development and Future ............................................... 746
   Lise Lund Håheim, Norwegian Knowledge Centre for the Health Services, Norway
   Berit Mørland, Norwegian Knowledge Centre for the Health Services, Norway

Chapter XLVII
Informational Priorities in Health Information System .................................................... 763
   Malgorzata Kisilowska, University of Warsaw, Poland

Chapter XLVIII
The Role of IT in Global Health Disparities and Human Rights ........................................ 782
   Josephine M. Kershaw, University of Findlay, USA

Chapter XLIX
IT Benefits in Healthcare Performance and Safety ......................................................... 798
   Stephen Bolsin, Melbourne University, and The Geelong Hospital, Australia
   Mark Colson, The Geelong Hospital, Australia

Chapter L
Paediatric Telepsychiatry as Innovation in Healthcare Delivery ..................................... 814
   Katherine M. Boydell, University of Toronto, Canada
   Tiziana Volpe, The Hospital for Sick Children, Canada
   Antonio Pignatiello, University of Toronto, Canada
Chapter LI
Interactive Communication Tool for Health Education ............................................................ 827
  Machi Suka, St. Marianna University School of Medicine, Japan
  Katsumi Yoshida, St. Marianna University School of Medicine, Japan

Chapter LII
Accelerometer-Based Actimetry as Technology Applied to Healthcare ............................. 838
  Germán Ruiz Tendero, Universidad Católica de San Antonio–Murcia, Spain
  Juan José Salinero Martín, Universidad Camilo José Cela, Spain
  Susana Aznar Lain, Universidad de Castilla-La Mancha, Spain

Chapter LIII
Designing Medical Research Web Sites .................................................................................. 852
  Jonathan P. Grady, University of Pittsburgh, USA
  Michael B. Spring, University of Pittsburgh, USA
  Armando J. Rotondi, University of Pittsburgh, USA

Chapter LIV
Critical Systematic Review ...................................................................................................... 870
  Jennifer M. Wilby, Hull University Business School, UK

Chapter LV
Knowledge Management for Healthcare: Vision, Strategies, and Challenges .................... 879
  Ashish Dwivedi, University of Hull, UK

Compilation of References ...................................................................................................... 892
