Acknowledgment

First of all, we thank all the authors who submitted their work to the book. We are very grateful to the members of the editorial advisory board and the reviewers who agreed to help us in the book preparation. They helped us to select the book chapters and provided numerous comments that significantly influenced their final form.

The book came into light due also to the indirect involvement of many researchers, developers, and industry practitioners. Therefore, we thank the contributing authors, research institutions, and companies whose papers, reports, articles, notes, Web sites have been referred to in this book.

We offer our special appreciation to IGI Global and its editorial assistant, Michael Killian, for helping us during the book development.

Acknowledgments are also due to the research funding institutions that supported the activities involved in this process, particularly FAPESP (Fundação de Amparo à Pesquisa do Estado de São Paulo) under the grants n. 09/06355-0 and 06/55207-5, and the Italian PRIN project D-ASAP. INCT-SEC is also recognized by its support under grants CNPq 573963/2008-8, FAPESP 08/57870-926.

Finally, we would like to thank our institutions (University of Roma “Tor Vergata,” Italy and University of São Paulo, Brazil) for having supported our work, which has been carried out in the framework of a cooperation agreement between our two universities.

Valeria Cardellini
Università di Roma “Tor Vergata,” Italy
