# Table of Contents

Foreword ............................................................................................................................................. xxxi

Preface ............................................................................................................................................ xxxiii

Acknowledgment ............................................................................................................................... xxxiv

**Volume I**

**Section 1**  
**Grid Architectures and Applications**

**Chapter 1**  
Pervasive Grid and its Applications ................................................................................................. 1  
*Ruay-Shiung Chang, National Dong Hwa University, Taiwan*  
*Jih-Sheng Chang, National Dong Hwa University, Taiwan*

**Chapter 2**  
Pervasive Grids: Challenges and Opportunities ............................................................................... 14  
*Manish Parashar, Rutgers, The State University of New Jersey, USA*  
*Jean-Marc Pierson, Paul Sabatier University, France*

**Chapter 3**  
Desktop Grids: From Volunteer Distributed Computing to High Throughput Computing Production Platforms .................................................................................................................. 31  
*Franck Cappello, INRIA & UIUC, France*  
*Gilles Fedak, LIP/INRIA, France*  
*Derrick Kondo, ENSIMAG - antenne de Montbonnot, France*  
*Paul Malécot, Université Paris-Sud, France*  
*Ala Rezmerita Université Paris-Sud, France*

**Chapter 4**  
Porting Applications to Grids ............................................................................................................ 62  
*Wolfgang Gentzsch, EU Project DEISA and Board of Directors of the Open Grid Forum, Germany*
Chapter 5
Benchmarking Grid Applications for Performance and Scalability Predictions ......................... 89
Radu Prodan, University of Innsbruck, Austria
Farrukh Nadeem, University of Innsbruck, Austria
Thomas Fahringer, University of Innsbruck, Austria

Section 2
P2P Computing

Chapter 6
Scalable Index and Data Management for Unstructured Peer-to-Peer Networks ......................... 123
Shang-Feng Chiang, National Taiwan University, Taiwan
Kuo Chiang, National Taiwan University, Taiwan
Ruo-Jian Yu, National Taiwan University, Taiwan
Sheng-De Wang, National Taiwan University, Taiwan

Chapter 7
Hierarchical Structured Peer-to-Peer Networks ......................................................................... 140
Yong Meng Teo, National University of Singapore, Singapore
Verdi March, National University of Singapore, Singapore
Marian Mihailescu, National University of Singapore, Singapore

Chapter 8
Load Balancing in Peer-to-Peer Systems .................................................................................... 163
Haiying Shen, University of Arkansas, USA

Chapter 9
Decentralized Overlay for Federation of Enterprise Clouds .................................................... 191
Rajiv Ranjan, The University of Melbourne, Australia
Rajkumar Buyya, The University of Melbourne, Australia

Section 3
Programming Models and Tools

Chapter 10
Reliability and Performance Models for Grid Computing ........................................................ 219
Yuan-Shun Dai, University of Electronics Science Technology of China, China
& University of Tennessee, Knoxville, USA
Jack Dongarra, University of Tennessee, Knoxville, USA; Oak Ridge National Laboratory, USA;
& University of Manchester, UK
Chapter 11
Mixed Parallel Programming Models Using Parallel Tasks ................................................................. 246
Jörg Dümmler, Chemnitz University of Technology, Germany
Thomas Rauber, University Bayreuth, Germany
Gudula Rünger, Chemnitz University of Technology, Germany

Chapter 12
Programmability and Scalability on Multi-Core Architectures ......................................................... 276
Jaeyoung Yi, Yonsei University, Seoul, Korea
Yong J. Jang, Yonsei University, Seoul, Korea
Doohwan Oh, Yonsei University, Seoul, Korea
Won W. Ro, Yonsei University, Seoul, Korea

Chapter 13
Assembling of Parallel Programs for Large Scale Numerical Modeling......................................... 295
V.E. Malyshkin, Russian Academy of Science, Russia

Chapter 14
Cell Processing for Two Scientific Computing Kernels ................................................................. 312
Meilian Xu, University of Manitoba, Canada
Parimala Thulasiraman, University of Manitoba, Canada
Ruppa K. Thulasiram, University of Manitoba, Canada

Section 4
Scheduling and Communication Techniques

Chapter 15
On Application Behavior Extraction and Prediction to Support and Improve Process Scheduling Decisions ................................................................. 338
Evgueni Dodonov, University of São Paulo – ICMC, Brazil
Rodrigo Fernandes de Mello, University of São Paulo – ICMC, Brazil

Chapter 16
A Structured Tabu Search Approach for Scheduling in Parallel Computing Systems....................... 354
Tore Ferm, Sydney University, Australia
Albert Y. Zomaya, Sydney University, Australia

Chapter 17
Communication Issues in Scalable Parallel Computing ................................................................. 378
C.E.R. Alves, Universidade Sao Judas Tadeu, Brazil
E. N. Cáceres, Universidade Federal de Mato Grosso do Sul, Brazil
F. Dehne, Carleton University, Canada
S. W. Song, Universidade de Sao Paulo, Brazil
Chapter 18
Scientific Workflow Scheduling with Time-Related QoS Evaluation ......................................................... 396
   Wanchun Dou, Nanjing University, P. R. China
   Jinjun Chen, Swinburne University of Technologies, Australia

Section 5
Service Computing

Chapter 19
Grid Transaction Management and Highly Reliable Grid Platform .......................................................... 421
   Feilong Tang, Shanghai Jiao Tong University, China
   Minyi Guo, Shanghai Jiao Tong University, China

Chapter 20
Error Recovery for SLA-Based Workflows Within the Business Grid ...................................................... 442
   Dang Minh Quan, International University in Germany, Germany
   Jorn Altmann, Seoul National University, South Korea
   Laurence T. Yang, St. Francis Xavier University, Canada

Chapter 21
A Fuzzy Real Option Model to Price Grid Compute Resources .............................................................. 471
   David Allenotor, University of Manitoba, Canada
   Ruppa K. Thulasiram, University of Manitoba, Canada
   Kenneth Chiu, University at Binghamtom, State University of NY, USA
   Sameer Tilak, University of California, San Diego, USA

Volume II

Chapter 22
The State of the Art and Open Problems in Data Replication in Grid Environments ............................ 486
   Mohammad Shorfuzzaman, University of Manitoba, Canada
   Rasit Eskicioglu , University of Manitoba, Canada
   Peter Graham, University of Manitoba, Canada

Chapter 23
Architectural Elements of Resource Sharing Networks .............................................................................. 517
   Marcos Dias de Assunção, The University of Melbourne, Australia
   Rajkumar Buyya, The University of Melbourne, Australia
Section 6
Optimization Techniques

Chapter 24
Simultaneous MultiThreading Microarchitecture .......................................................... 552
Chen Liu, Florida International University, USA
Xiaobin Li, Intel® Corporation, USA
Shaoshan Liu, University of California, Irvine, USA
Jean-Luc Gaudiot, University of California, Irvine, USA

Chapter 25
Runtime Adaption Techniques for HPC Applications .................................................. 583
Edgar Gabriel, University of Houston, USA

Chapter 26
A Scalable Approach to Real-Time System Timing Analysis ....................................... 606
Alan Grigg, Loughborough University, UK
Lin Guan, Loughborough University, UK

Chapter 27
Scalable Algorithms for Server Allocation in Infostations ......................................... 645
Alan A. Bertossi, University of Bologna, Italy
M. Cristina Pinotti, University of Perugia, Italy
Romeo Rizzi, University of Udine, Italy
Phalguni Gupta, Indian Institute of Technology Kanpur, India

Section 7
Web Computing

Chapter 28
Web Application Server Clustering with Distributed Java Virtual Machine .................. 658
King Tin Lam, The University of Hong Kong, Hong Kong
Cho-Li Wang, The University of Hong Kong, Hong Kong

Chapter 29
Middleware for Community Coordinated Multimedia ............................................... 682
Jiehan Zhou, University of Oulu, Finland
Zhonghong Ou, University of Oulu, Finland
Junzhao Sun, University of Oulu, Finland
Mika Rautiainen, University of Oulu, Finland
Mika Ylianttila, University of Oulu, Finland
Section 8
Mobile Computing and Ad Hoc Networks

Chapter 30
Scalability of Mobile Ad Hoc Networks
Dan Grigoras, University College Cork, Ireland
Daniel C. Doolan, Robert Gordon University, UK
Sabin Tabirca, University College Cork, Ireland

Chapter 31
Network Selection Strategies and Resource Management Schemes in Integrated Heterogeneous Wireless and Mobile Networks
Wei Shen, University of Cincinnati, USA
Qing-An Zeng, University of Cincinnati, USA

Section 9
Fault Tolerance and QoS

Chapter 32
Scalable Internet Architecture Supporting Quality of Service (QoS)
Priyadarshi Nanda, University of Technology, Sydney (UTS), Australia
Xiangjian He, University of Technology, Sydney (UTS), Australia

Chapter 33
Scalable Fault Tolerance for Large-Scale Parallel and Distributed Computing
Zizhong Chen, Colorado School of Mines, USA

Section 10
Applications

Chapter 34
Efficient Update Control of Bloom Filter Replicas in Large Scale Distributed Systems
Yifeng Zhu, University of Maine, USA
Hong Jiang, University of Nebraska–Lincoln, USA

Chapter 35
Image Partitioning on Spiral Architecture
Qiang Wu, University of Technology, Australia
Xiangjian He, University of Technology, Australia
Chapter 36
Scheduling Large-Scale DNA Sequencing Applications ......................................................... 841
   Sudha Gunturu, Oklahoma State University, USA
   Xiaolin Li, Oklahoma State University, USA
   Laurence Tianruo Yang, St. Francis Xavier University, Canada

Chapter 37
Multi-Core Supported Deep Packet Inspection ........................................................................ 858
   Yang Xiang, Central Queensland University, Australia
   Daxin Tian, Tianjin University, China

Chapter 38
State-Carrying Code for Computation Mobility .................................................................... 874
   Hai Jiang, Arkansas State University, USA
   Yanqing Ji, Gonzaga University, USA

Compilation of References ..................................................................................................... 895
