Table of Contents

Foreword.................................................................................................................................................xxii

Preface....................................................................................................................................................xxiv

Acknowledgment .....................................................................................................................................xxviii

Section 1
Integrated Requirements Engineering and Software Engineering: Process and Frameworks

Chapter 1
Best Practices Guidelines for Agile Requirements Engineering Practices............................................1

Chetankumar Patel, Leeds Metropolitan University, UK
Muthu Ramachandran, Leeds Metropolitan University, UK

Chapter 2
Requirements Engineering in a Model-Based Methodology for Embedded Automotive Software...........................15

Jean-Louis Boulanger, CERTIFER, France

Chapter 3
Agile Software Engineering ..................................................................................................................28

Ernest Mnkandla, University of Johannesburg, South Africa

Chapter 4
Putting a TAG on Software: Purchaser-Centered Software Engineering ..............................................38

Mike Barker, Nara Institute of Science and Technology, Japan
Kenichi Matsumoto, Nara Institute of Science and Technology, Japan
Katsuro Inoue, Osaka University, Japan

Chapter 5
Enhancing Testing Technologies for Globalization of Software Engineering and Productivity ........49

Amir H. Khan, University of Maryland, USA
Atif M. Memon, University of Maryland, USA
Chapter 6
Story Card Process Improvement Framework for Agile Requirements .............................. 61
Chetankumar Patel, Leeds Metropolitan University, UK
Muthu Ramachandran, Leeds Metropolitan University, UK

Chapter 7
Keqing He, Wuhan University, China
Chong Wang, Wuhan University, China
Yangfan He, Wuhan University, China
Yutao Ma, Wuhan University, China
Peng Liang, Wuhan University, China

Chapter 8
Requirements Traceability .................................................................................................. 102
Elias Canhadas Genvigir, Federal University of Technology – Paraná – UTFPR, Brasil
Nandamudi Lankalapalli Vijaykumar, National Institute for Space Research – INPE, Brasil

Chapter 9
Software Product Lines to Faster Achieving Productivity................................................ 121
Sathya Ganeshan, Leeds Metropolitan University, UK
Muthu Ramachandran, Leeds Metropolitan University, UK

Chapter 10
Comprehensive Software Industry Analysis Model (CSIAM)......................................... 128
T.R.Gopalakrishnan Nair, Dayananda Sagar Institutions, Bangalore, India
R. Selvarani, Dayananda Sagar Institutions, Bangalore, India
Muthu Ramachandran, Leeds Metropolitan University, UK

Chapter 11
Software Metrics Evaluation Based on Entropy ................................................................ 139
R. Selvarani, Dayananda Sagar Institutions, Bangalore, India
T.R.Gopalakrishnan Nair, Dayananda Sagar Institutions, Bangalore, India
Muthu Ramachandran, Leeds Metropolitan University, UK
Kamakshi Prasad, JNTU, Hyderabad, India
Section 2
Productivity Technologies

Chapter 12
Model-Driven Exception Management Case Study ................................................................. 153
Susan Entwisle, Monash University, Australia
Sita Ramakrishnan, Monash University, Australia
Elizabeth Kendall, Melbourne Institute of Technology, Australia

Chapter 13
Using Patterns for Engineering High-Quality Mobile Applications ........................................ 174
Pankaj Kamthan, Concordia University, Canada

Chapter 14
Combinatorial Testing ................................................................................................................. 196
Renée C. Bryce, Utah State University, USA
Yu Lei, University of Texas, Arlington, USA
D. Richard Kuhn, National Institute of Standards and Technology, USA
Raghu Kacker, National Institute of Standards and Technology, USA

Chapter 15
A Systematic Review of Distributed Software Development: Problems and Solutions ............ 209
Miguel Jiménez, Alhambra-Eidos, Spain
Mario Piattini, University of Castilla-La Mancha, Spain
Aurora Vizcaíno, University of Castilla-La Mancha, Spain

Chapter 16
Tools and Techniques for Model Based Testing ....................................................................... 226
Swapan Bhattacharya, National Institute of Technology, Durgapur, India
Ananya Kanjilal, B. P. Poddar Institute of Management & Technology, Kolkata, India
Sabnam Sengupta, B. P. Poddar Institute of Management & Technology, Kolkata, India

Chapter 17
Matilda: A Generic and Customizable Framework for Direct Model Execution in Model-Driven
Software Development ............................................................................................................... 250
Hiroshi Wada, University of Massachusetts, USA
Junichi Suzuki, University of Massachusetts, USA
Adam Malinowski, Harvard University, USA
Katsuya Oba, OGIS International, Inc., USA

Chapter 18
A Software Tool and a Network Simulation for Improving Quality of Service Performance
in Distributed Database Management Systems ............................................................................ 280
Ismail Omar Hababeh, United Arab Emirates University, UAE
Muthu Ramachandran, Leeds Metropolitan University, UK
Chapter 19
Models Oriented Approach for Developing Railway Safety-Critical Systems with UML
Jean-Louis Boulanger, CERTIFER, France
Alban Rasse, MIPS, France
Akram Idani, LIG / VASCO, France

Chapter 20
Commonality Analysis: Implications Over a Successful Product Line
Sathya Ganeshan, Leeds Metropolitan University, UK
Muthu Ramachandran, Leeds Metropolitan University, UK

Chapter 21
Rapid Productivity and Quality: Software Product Lines and Trends of the Future
Sathya Ganeshan, Leeds Metropolitan University, UK
Muthu Ramachandran, Leeds Metropolitan University, UK

Chapter 22
Software Components
Adnan Bader, Monash University, Australia
Sita Ramakrishnan, Monash University, Australia

Chapter 23
The Role of Information Technology Managers in the Significant Company in Case of Natural Disasters in Qatar
Salem Al-Marri, Leeds Metropolitan University, UK
Muthu Ramachandran, Leeds Metropolitan University, UK

Section 3
Enterprise Systems and Globalisation

Chapter 24
Enterprise Resource Planning Systems for Small and Medium-Sized Enterprises
Rogério Atem de Carvalho, Fluminense Federal Institute, Brazil
Björn Johansson, Center for Applied ICT, Copenhagen Business School, Denmark

Chapter 25
Directed Basic Research in Enterprise Resource Planning (ERP) Systems
S. Parthasarathy, Thiagarajar College of Engineering, India

Chapter 26
Trends in Improving Performances in Distributed Database Management Systems
Ismail Omar Hababeh, United Arab Emirates University, UAE
Muthu Ramachandran, Leeds Metropolitan University, UK
Chapter 27
ERP System Implementation from the Ground Up: The ERP5 Development Process and Tools...... 423
Rogério Atem de Carvalho, Fluminense Federal Institute, Brazil
Renato de Campos, State University of São Paulo, Brazil
Rafael Manhães Monnerat, Nexedi SA, France

Chapter 28
Open Source Software Systems: Understanding Bug Prediction and Software Developer Roles................................................................. 439
R. B. Lenin, University of Arkansas at Little Rock, USA
S. Ramaswamy, University of Arkansas at Little Rock, USA
Liguo Yu, Indiana University South Bend, USA
R. B. Govindan, University of Arkansas Medical Sciences, USA

Chapter 29
Information System Model for Global Emergency-Response System in the Context of Natural Disaster Recovery Management System ................................................................. 460
Salem Al-Marri, Leeds Metropolitan University, UK
Muthu Ramachandran, Leeds Metropolitan University, UK

Compilation of References ........................................................................................................... 468

About the Contributors .................................................................................................................. 511

Index............................................................................................................................................. 520
