Acknowledgment

Several collaborators and colleagues, mainly from the European funded IRMOS Project, have contributed greatly to this comprehensive book. Without their help, the preparation of this book would be impossible. The editors would take this chance to thank all book chapter authors, who have contributed their research results to this book. We also owe a debt of gratitude to the reviewers who have provided valuable comments on the book chapters. We also wish to record our sincere thanks to the Editorial Advisory Board members. Last but not least, special thanks are given to Mr. Joel Gamon of IGI Global for his assistance in the book preparation.
