Table of Contents

Foreword ............................................................................................................................................ xvii

Preface ................................................................................................................................................ xx

Acknowledgment ................................................................................................................................ xxv

Section 1
Intelligent and Adaptive Course Provision

Chapter 1
Decision Models in the Design of Adaptive Educational Hypermedia Systems................................. 1
Demetrios G. Sampson, University of Piraeus, Greece & Centre for Research and Technology Hellas, Greece
Pythagoras Karampiperis, University of Piraeus, Greece & National Center of Scientific Research “Demokritos”, Greece

Chapter 2
Automatic Personalization in E-Learning Based on Recommendation Systems: An Overview ........ 19
Mohamed Koutheair Khribi, University of Tunis, Tunisia
Mohamed Jemni, University of Tunis, Tunisia
Olfa Nasraoui, University of Louisville, USA

Chapter 3
Engineering and Reengineering of Technology Enhanced Learning Scenarios Using Context Awareness Processes .............................................................................................................................. 34
Clara Inès Peña de Carrillo, Universidad Industrial de Santander, Colombia
Christophe Choquet, University of Maine, France
Christophe Després, University of Maine, France
Sébastien Iksal, University of Maine, France
Pierre Jacoboni, University of Maine, France
Aina Lekira, University of Maine, France
El Amine Ouraiba, University of Maine, France
Diem Pham Thi-Ngoc, University of Maine, France
Chapter 4  
From Europe to China: Adapting Courseware Generation to a Different Educational Context........... 59  
Xiaohong Tan, Shanghai Jiao Tong University, China  
Carsten Ullrich, Shanghai Jiao Tong University, China  
Ruimin Shen, Shanghai Jiao Tong University, China

Chapter 5  
An Architecture for Learning Environments Based on the Lightweight Integration of Intelligent Agents ................................................................................................................................................... 71  
Sergey Butakov, SolBridge International School of Business, South Korea  
Denis Smoline, American University of Nigeria, Nigeria  
Nousheen Naimat Samuel, SolBridge International School of Business, South Korea  
Naima Naimat Samuel, SolBridge International School of Business, South Korea

Section 2  
Intelligent and Adaptive Feedback, Testing and Assessment

Chapter 6  
Intelligent Model-Based Feedback: Helping Learners to Monitor their Individual Learning Progress ................................................................................................................................................... 88  
Dirk Ifenthaler, University of Mannheim, Germany

Chapter 7  
A Knowledge-Based Approach of Modeling an Internet-Based Intelligent Learning Environment for Comprehending Common Fraction Operations ..................................................................................... 101  
Siu Cheung Kong, The Hong Kong Institute of Education, Hong Kong

Chapter 8  
From “Self-Tested” to “Self-Testing”: A Review of Self-Assessment Systems for Learning........... 119  
Mingming Zhou, Nanyang Technological University, Singapore

Chapter 9  
A Tool for Adaptive E-Assessment of Project Management Competences........................................ 133  
Constanta-Nicoleta Bodea, Academy of Economic Studies, Romania  
Maria-Iuliana Dascalu, Academy of Economic Studies, Romania

Chapter 10  
E-Learning Tools with Intelligent Assessment and Feedback for Mathematics Study.................. 151  
Christine Bescherer, University of Education Ludwigsburg, Germany  
Daniel Herding, RWTH Aachen University, Germany  
Ulrich Kortenkamp, University of Education Karlsruhe, Germany  
Wolfgang Müller, University of Education Weingarten, Germany  
Marc Zimmermann, University of Education Ludwigsburg, Germany
Section 3
Semantic Technologies and Ontologies for Intelligent and Adaptive Learning

Chapter 11
Boosting Semantic Relations for Example Population in Concept Learning ........................................ 165
Ming-Chi Liu, National Cheng Kung University, Taiwan
Kinshuk, Athabasca University, Canada
Yueh-Min Huang, National Cheng Kung University, Taiwan
Dunwei Wen, Athabasca University, Canada

Chapter 12
Improving User Profiling for a Richer Personalization: Modeling Context in E-Learning .................. 182
Isabela Gasparini, Universidade Federal do Rio Grande do Sul, Brazil & Universidade do Estado de Santa Catarina, Brazil
Victoria Eyharabide, Universidad Nacional del Centro de la Pcia. de Bs. As., Argentina & Consejo Nacional de Investigaciones Científicas y Técnicas, Argentina
Silvia Schiaffino, Universidad Nacional del Centro de la Pcia. de Bs. As., Argentina & Consejo Nacional de Investigaciones Científicas y Técnicas, Argentina
Marcelo S. Pimenta, Universidade Federal do Rio Grande do Sul, Brazil
Anaíla Amandi, Universidad Nacional del Centro de la Pcia. de Bs. As., Argentina & Consejo Nacional de Investigaciones Científicas y Técnicas, Argentina
José Palazzo M. de Oliveira, Universidade Federal do Rio Grande do Sul, Brazil

Chapter 13
Tracing the Metacognitive Competencies of Online Learners ................................................................. 198
Vive Kumar, Athabasca University, Canada

Chapter 14
A Multi-Actor Ontology-Based Assistance Model: A Contribution to the Adaptive Semantic Web ................................................................................................................................. 213
Gilbert Paquette, Télé-université, Canada
Olga Marino, Télé-université, Canada

Chapter 15
Context-Aware Framework for Supporting Personalisation and Adaptation in Creation of Learning Designs .............................................................................................................................. 229
Patricia Charlton, University of London, UK
George D. Magoulas, University of London, UK
Section 4
Enhancing Collaborative Learning with Adaptivity and Intelligent Support

Chapter 16
Analyzing Critical Functions of Recording Tools for Synchronous Cyber Classroom Instruction
Chun-Wang Wei, Far East University, Taiwan
I-Chun Hung, National Sun Yat-sen University, Taiwan
Kinshuk, Athabasca University, Canada
Nian-Shing Chen, National Sun Yat-sen University, Taiwan

Chapter 17
Software Agent Systems for Supporting Student Team Project Working
Janice Whatley, University of Salford, UK

Section 5
Adaptive and Intelligent Features for Supporting Learning in Virtual Worlds

Chapter 18
Embodied and Embedded Intelligence: Actor Agents on Virtual Stages
Bob Heller, Athabasca University, Canada
Mike Procter, Athabasca University, Canada

Chapter 19
Technology Enhanced Language Learning in Virtual Worlds
Tosti H. C. Chiang, National Central University, Taiwan
Tom T. C. Tsai, National Central University, Taiwan
Irene Y. S. Li, National Central University, Taiwan
Indy Y. T. Hsiao, National Central University, Taiwan
Stephen J. H. Yang, National Central University, Taiwan

Section 6
Adaptivity and Intelligent Support for Mobile, Pervasive, and Ubiquitous Learning

Chapter 20
Mobile Learning: An Economic Approach
Andreea Molnar, National College of Ireland, Ireland
Cristina Hava Muntean, National College of Ireland, Ireland
Chapter 21
Mobile Computing and Mixed-Initiative Support for Writing Competence ........................................ 327
  Vive Kumar, Athabasca University, Canada
  Maiga Chang, Athabasca University, Canada
  Tracey L. Leacock, Simon Fraser University, Canada

Compilation of References ................................................................................................................ 342

About the Contributors ...................................................................................................................... 379
