# Table of Contents

Foreword.................................................................................................................. viii  
Preface...................................................................................................................... x  
Acknowledgment...................................................................................................... xiv  

## Section 1  
**Blended Experiences in Mathematics E-Learning**

### Chapter 1  
A Model for Asynchronous Discussions in a Mathematics Content Course ......................... 1

*Travis K. Miller, Millersville University, USA*

### Chapter 2  
A Blended Learning Approach in Mathematics........................................................................ 22

*B. Abramovitz, ORT Braude College, Israel  
M. Berezina, ORT Braude College, Israel  
A. Berman, Technion Israel Institute of Technology, Israel  
L. Shvartsman, ORT Braude College, Israel*

### Chapter 3  
Screencasting for Mathematics Online Learning: A Case Study of a First Year Operations Research Course at a Dual Delivery Mode Australian University ................................................. 43

*Birgit Loch, Swinburne University of Technology, Australia*

### Chapter 4  
Mathematics Education: Teaching and Learning Opportunities in Blended Learning ................. 60

*Giovannina Albano, Università di Salerno, Italy*

### Chapter 5  
Best Practices for Hybrid Mathematics Courses ....................................................................... 90

*Diana S. Perdue, Intare Educational Resources, USA*

### Chapter 6  
Implementation of Learning Outcomes in Mathematics for Non-Mathematics Major by Using E-Learning ..................................................................................................................... 119

*B. Divjak, University of Zagreb, Croatia*
Section 2
Pure Online Experiences in Mathematics E-Learning

Chapter 7
Online Communities of Practice as Vehicles for Teacher Professional Development

*Maria Meletiou-Mavrotheris, European University, Cyprus*

Chapter 8
Mathematics Bridging Education Using an Online, Adaptive E-Tutorial: Preparing International Students for Higher Education

*Dirk T. Tempelaar, Maastricht University School of Business & Economics, the Netherlands*
*Bart Rienties, University of Surrey, UK*
*Wolter Kaper, Universiteit van Amsterdam, the Netherlands*
*Bas Giesbers, Maastricht University School of Business & Economics, the Netherlands*
*Sybrand Schim van der Loeff, Maastricht University School of Business & Economics, the Netherlands*
*Leendert van Gastel, Universiteit van Amsterdam, the Netherlands*
*Evert van de Vrie, Open Universiteit Nederland, the Netherlands*
*Henk van der Kooij, Universiteit Utrecht, the Netherlands*
*Hans Cuypers, Technische Universiteit Eindhoven, the Netherlands*

Chapter 9
Teaching Mathematics Teachers Online: Strategies for Navigating the Intersection of Andragogy, Technology, and Reform-based Mathematics Education

*D. H. Jarvis, Nipissing University, Canada*

Chapter 10
Developing Teachers’ Mathematical Knowledge for Teaching through Online Collaboration

*Jason Silverman, Drexel University, USA*
*Ellen L. Clay, Drexel University, USA*

Chapter 11
Self-Regulated Learning and Self Assessment in Online Mathematics Bridging Courses

*R. Biehler, University of Paderborn, Germany*
*P. R. Fischer, University of Kassel, Germany*
*R. Hochmuth, University of Kassel, Germany*
*Th. Wassong, University of Paderborn, Germany*

Chapter 12
Long-Term Experiences in Mathematics E-Learning in Europe and the USA

*Sven Trenholm, Loughborough University, UK*
*Angel A. Juan, Open University of Catalonía, Spain*
*Jorge Simosa, Massachusetts Institute of Technology, USA*
*Amilcar Oliveira, Universidade Aberta, Portugal*
*Teresa Oliveira, Universidade Aberta, Portugal*
Section 3
Mathematics Software & Web Resources for Mathematics E-Learning

Chapter 13
My Equations are the Same as Yours! Computer Aided Assessment Using a Gröbner Basis Approach ........................................................................................................................................................................ 259
M. Badger, University of Birmingham, UK
C. J. Sangwin, University of Birmingham, UK

Chapter 14
Interactive Web-Based Tools for Learning Mathematics: Best Practices ................................................ 274
Barry Cherkas, Hunter College of the City University of New York, USA
Rachael M. Welder, Hunter College of the City University of New York, USA

Chapter 15
NAUK.si: Using Learning Blocks to Prepare E-Content for Teaching Mathematics .......................... 307
M. Lokar, University of Ljubljana, Slovenia
P. Lukšič, University of Ljubljana, Slovenia
B. Horvat, University of Ljubljana, Slovenia

Chapter 16
Software Tools Used in Math Refresher Courses at the University of Alcalá, Spain ................. 327
J. G. Alcázar, University of Alcalá, Spain
M. Marvá, University of Alcalá, Spain
D. Orden, University of Alcalá, Spain
F. San Segundo, University of Alcalá, Spain

Chapter 17
Formula Editors and Handwriting in Mathematical E-Learning ...................................................... 350
Morten Misfeldt, Aarhus University, Denmark
Anders Sanne, Norwegian University of Science and Technology (NTNU), Norway

Chapter 18
The Role of Technology in Mathematics Support: A Pilot Study ..................................................... 367
Ciarán Mac an Bhaird, National University of Ireland Maynooth, Ireland
Ann O’Shea, National University of Ireland Maynooth, Ireland

About the Contributors ....................................................................................................................... 384

Index .................................................................................................................................................. 394
