Table of Contents

Foreword............................................................................................................................................xxii

Preface............................................................................................................................................... xxiv

Acknowledgment................................................................................................................................... xxix

Section I
Overview of Technology Project Management

Chapter I
The Tao to Understanding Enterprise Resource Planning Complexity: Sun-Tzu’s Five Factors Revisited.................................................................................................................................... 1

James W. Price Jr., Kennesaw State University, USA
Pamila Dembla, Kennesaw State University, USA

Chapter II
Project Management 2027: The Future of Project Management......................................................... 17

A. J. Gilbert Silvius, Utrecht University of Applied Sciences, The Netherlands

Chapter III
The Progression Towards Project Management Competence................................................................. 37

Gregory J. Skulmoski, Zayed University, UAE
Francis T. Hartman, University of Calgary, Canada

Section II
Leadership, Management & Decision Making in Technology Project Management,
Planning, and Operations

Chapter IV
Leadership in Technology Project Management.................................................................................. 59

Ralf Müller, Umeå School of Business, Sweden & BI Norwegian School of Management, Norway
Chapter V
The Importance of Leadership in Project Management
Melanie S. Karas, TWU School of Management, USA
Mahesh S. Raisinghani, TWU School of Management, USA
Kerry S. Webb, TWU School of Management, USA

Chapter VI
Technology Management by Objectives
Jaby Mohammed, Indiana University-Purdue University Fort Wayne (IPFW), USA

Chapter VII
Examining Stakeholders’ Roles in Influencing IT Project Cancellation Decisions
Gary Pan, Singapore Management University, Singapore

Chapter VIII
Bringing the User into the Project Development Process
Daniel W. Surry, University of South Alabama, USA

Chapter IX
Information Technology Projects System Development Life Cycles: Comparative Study
Evon M. O. Abu-Taieh, The Arab Academy for Banking and Financial Sciences, Jordan
Asim A. El Sheikh, The Arab Academy for Banking and Financial Sciences, Jordan
Jeihan M. Abu-Tayeh, World Bank, USAID, Jordan
Maha T. El-Mahied, Institute of Traditional Islamic Art and Architecture, Jordan

Chapter X
Analyzing Diffusion and Value Creation Dimensions of a Business Case of Replacing Enterprise Systems
Francis Chia Cua, University of Otago, New Zealand
Tony C. Garrett, Korea University, Republic of Korea

Chapter XI
IT Project Planning Based on Business Value Generation
Otavio Prospero Sanchez, Sao Paulo Methodist University & Fundacao Getulio Vargas FGV/EAESP, Brazil
Alberto Luiz Albertin, Fundacao Getulio Vargas FGV/EAESP, Brazil

Chapter XII
Managing ICT Based Service Innovation
Bendik Bygstad, Norwegian School of IT, Norway
Gjermund Lanestedt, Lanestedt Consulting, Norway
Chapter XIII
Employee Preparation, Participation, and Performance .......................................................... 201

Katy E. Ellis, Northeastern State University, Oklahoma, USA

Section III
Project Quality and Risk Management

Chapter XIV
Quality Assurance with Project Management ........................................................................... 216

Jaby Mohammed, Indiana University-Purdue University Fort Wayne (IPFW), USA
Ali Alavizadeh, Morehead State University, USA

Chapter XV
Quality Management, Control, and Assurance: Tools and Techniques .................................... 224

Sohail Anwar, The Pennsylvania State University, Altoona College, USA

Chapter XVI
Software Quality Assurance ........................................................................................................ 242

Dawn M. Owens, University of Nebraska at Omaha, USA
Deepak Khazanchi, University of Nebraska at Omaha, USA

Chapter XVII
The Integrated Project Risk Model: A Risk-Based Model for Managing Information Technology Projects ............................................................................................................................ 261

Fayez Ahmed Albadri, ADMA-OPCO, Abu Dhabi, UAE

Chapter XVIII
Technical Risk Management ....................................................................................................... 283

Pete Hylton, Indiana University Purdue University Indianapolis, USA

Section IV
Project Planning and Assessment

Chapter XIX
Early, Often, and Repeat: Assessment and Evaluation Methodology for Ensuring Stakeholder Satisfaction with Information Technology Projects ................................................................. 296

Lauren Fancher, University System of Georgia, USA

Chapter XX
A Needle in a Haystack: Choosing the Right Development Methodology for IT Projects .......... 310

Chad J. Cray, Capella University, USA
Chapter XXI
Project Management Assessment Methods.......................................................... 321
Mysore Narayanan, Miami University, USA

Chapter XXII
Static and Dynamic Determinants of Earned Value Based Time Forecast Accuracy.............. 358
Mario Vanhoucke, Ghent University, Belgium & Vlerick Leuven Gent Management School, Belgium

Section V
Case Study Examples in Technology Project Management, Planning, and Operations

Chapter XXIII
Technology Exploration: From Ideas to New Services........................................ 373
Michele De Lorenzi, ETH Zurich, Switzerland

Chapter XXIV
Planning for Technology Integration.................................................................. 385
Henryk R. Marcinkiewicz, Aramco Services Company, USA

Chapter XXV
University Task Force Deepens Academic Involvement in ERP.......................... 397
Michael Crow, Kansas State University, USA

Chapter XXVI
Production, Publication, and Use of Educational Multimedia Content in Brazil: Challenges and Opportunities in Real World Technology Projects......................................................... 406
Joni A. Amorim, Universidade Estadual de Campinas (UNICAMP), Brazil
Carlos Machado, PST Electronics, Brazil
Rosana G. S. Miskulin, Universidade Estadual Paulista “Júlio de Mesquita Filho” (UNESP), Brazil
Mauro S. Miskulin, Universidade Estadual de Campinas (UNICAMP), Brazil

Chapter XXVII
Instructional Technology Plans for Higher Education........................................ 419
Hasan Tinmaz, Educational Technologist, Turkey

Chapter XXVIII
Shifting from Classroom to Online Delivery..................................................... 439
Patricia McGee, The University of Texas at San Antonio, USA
Veronica Diaz, Maricopa Community Colleges, USA
Chapter XXIX
Lean and Global Product Development in Auto Industry................................................. 460

Bimal P. Nepal, Texas A&M University, USA
Leslie Monplaisir, Wayne State University, USA

Section VI
Issues & Trends in Technology Project Management, Planning, and Operations

Chapter XXX
Future Trends: Global Projects and Virtual Teaming................................................... 480

Debra D. Orosbullard, PMP, USA

Chapter XXXI
Wiki Enabled Technology Management........................................................................ 494

Geoffrey Corb, Johns Hopkins University, USA
Stephen Hellen, Johns Hopkins University, USA

Chapter XXXII
Mining User Activity Data in Higher Education Open Systems............................... 508

Owen G. McGrath, University of California Berkley, USA

Compilation of References.......................................................................................... 522

About the Contributors................................................................................................. 560

Index............................................................................................................................ 570
