Table of Contents

Preface...........................................................................................................................................xviii

Volume I

Section 1
Hardware and Software

Chapter 1
Hardware Trends and Implications for Programming Models ...................................................... 1
Gabriele Jost, The University of Texas at Austin, USA
Alice E. Koniges, Lawrence Berkeley National Laboratory, USA

Chapter 2
Multi-Threaded Architectures: Evolution, Costs, Opportunities .................................................. 22
Ivan Girotto, National University of Ireland Galway, Republic of Ireland
Robert M. Farber, Pacific Northwest National Laboratory, USA

Chapter 3
High-Performance Customizable Computing .................................................................................. 48
Domingo Benitez, University of Las Palmas de Gran Canaria, Spain

Chapter 4
High-Performance Computing for Theoretical Study of Nanoscale and Molecular Interconnects..... 78
Rasit O. Topaloglu, GlobalFoundries, USA
Swati R. Manjari, Rensselaer Polytechnic Institute, USA
Saroj K. Nayak, Rensselaer Polytechnic Institute, USA

Chapter 5
Effective Open-Source Performance Analysis Tools......................................................................... 98
Prashobh Balasundaram, IBM Dublin Software Laboratories, Republic of Ireland
Chapter 6
Pragmatic Software Engineering for Computational Science .................................................. 119
  David Worth, Science and Technology Facilities Council, UK
  Chris Greenough, Science and Technology Facilities Council, UK
  Shawn Chin, Science and Technology Facilities Council, UK

Chapter 7
A Framework for Testing Code in Computational Applications.......................................... 150
  Diane Kelly, Royal Military College, Canada
  Daniel Hook, Engineering Seismology Group, Canada
  Rebecca Sanders, EA Pogo, Canada

Chapter 8
Developing Software for a Scientific Community: Some Challenges and Solutions............... 177
  Judith Segal, The Open University, UK
  Chris Morris, STFC Daresbury Laboratory, UK

Chapter 9
Opportunities and Challenges in Porting a Parallel Code from a Tightly-Coupled System to the
Distributed EU Grid, Enabling Grids for E-sciencE.............................................................. 197
  Fumie Costen, The University of Manchester, UK
  Akos Balasko, Hungarian Academy of Sciences, Hungary

Section 2
Applications

Chapter 10
Development of an Efficient and Secure Mobile Communication System with New
Future Directions ..................................................................................................................... 219
  Abid Yahya, Universiti Malaysia Perlis, Malaysia
  Farid Ghani, Universiti Malaysia Perlis, Malaysia
  R. Badlishah Ahmad, Universiti Malaysia Perlis, Malaysia
  Mostafijur Rahman, Universiti Malaysia Perlis, Malaysia
  Aini Syuhada, Universiti Malaysia Perlis, Malaysia
  Othman Sidek, Collaborative Microelectronic Design Excellence Center, Malaysia
  M. F. M. Salleh, Universiti Sains Malaysia, Malaysia

Chapter 11
Parallel Quantum Chemistry At the Cross Roads ................................................................... 239
  Hubertus J. J. van Dam, Pacific Northwest National Laboratory, USA
Chapter 12
Stochastic Simulations in Systems Biology ................................................................. 267
Marc Hafner, Ecole Polytechnique Fe de rale de Lausanne (EPFL), Switzerland
Heinz Koeppl, Swiss Federal Institute of Technology Zurich (ETHZ), Switzerland

Chapter 13
Some Illustrations of Information Geometry Applications in Biology and Physics ........... 287
C.T.J. Dodson, University of Manchester, UK

Volume II

Chapter 14
DQ Based Methods: Theory and Application to Engineering and Physical Sciences ............. 316
Stefania Tomasiello, University of Basilicata, Italy

Chapter 15
Mesh Morphing and Smoothing by Means of Radial Basis Function (RBF):
A Practical Example Using Fluent and RBF Morph ................................................................ 347
Marco Evangelos Biancolini, University of Rome, Italy

Chapter 16
Visualization: Future Technology and Practices for Computational Science and Engineering .... 381
Joanna Leng, Visual Conclusions, UK
Theresa-Marie Rhyne, Visualization Consultant, USA
Wes Sharrock, University of Manchester, UK

Chapter 17
Visualizing Indicators of Debt Crises in a Lower Dimension: A Self-Organizing Maps Approach .................................................................................................................. 414
Peter Sarlin, Åbo Akademi University, Finland

Chapter 18
Improving Computational Models and Practices: Scenario Testing and Forecasting the Spread of Infectious Disease .......................................................................................... 432
Iain Barrass, Health Protection Agency, UK
Joanna Leng, Visual Conclusions, UK

Chapter 19
Artificial Neural Network Modelling of Sequencing Batch Reactor Performance .................. 456
Eldon Raj Rene, University of La Coruña, Spain
Sung Joo Kim, University of Ulsan, South Korea
Dae Hee Lee, University of Ulsan, South Korea
Woo Bong Je, University of Ulsan, South Korea
Mirian Estefanía López, University of La Coruña, Spain
Hung Suck Park, University of Ulsan, South Korea
### Section 3
Organisational and Practical Issues

#### Chapter 20
The State of Development of CSE

Joanna Leng, Visual Conclusions, UK  
Wes Sharrock, University of Manchester, UK

#### Chapter 21
Integrating Data Management and Collaborative Sharing with Computational Science Research Processes

Kerstin Kleese van Dam, Pacific Northwest National Laboratory, USA  
Mark James, University of California San Diego, USA  
Andrew M. Walker, University of Bristol, UK

#### Chapter 22
Security and Trust in a Global Research Infrastructure

Jens Jensen, Science and Technology Facilities Council, UK  
David L. Groep, National Institute for Subatomic Physics, The Netherlands

#### Chapter 23
CSE as Epistemic Technologies: Computer Modelling and Disciplinary Difference in the Humanities

Matt Ratto, University of Toronto, Canada

#### Chapter 24
Science Communication with Dinosaurs

Phillip L. Manning, University of Manchester, UK & University of Pennsylvania, USA  
Peter L. Falkingham, University of Manchester, UK
