Acknowledgment

We would like to express our gratitude to individual authors of the chapters. We could not possibly thank you enough for your great intellectual input and time commitment in making *Computational Design Methods and Technologies: Applications in CAD, CAM and CAE Education* a great success. We must acknowledge the invaluable contributions of the members on our Scientific Peer Review Board. You took on one of the most important roles in shaping this book by providing the authors and us with constructive feedback to ensure the quality of the content. We would also like to thank other researchers, academics and designers who submitted abstracts and/or full chapters during different stages of the project. We regret that it was not possible to accommodate your contributions due to the limited volume of the book. We hope to have the chance to collaborate with you in the future. Finally we must acknowledge and thank the colleagues in IGI-Global, especially Hannah Abelbeck, our very dedicated Development Editor, whose on-going hard work and determination have assisted us greatly in completing this book project.
