Table of Contents

Foreword............................................................................................................................................xxii

Preface...............................................................................................................................................xxiv

Acknowledgment............................................................................................................................xxvii

Section 1
Teaching with Remote Laboratories: Case Studies

Chapter 1
A LabVIEW-Based Remote Laboratory: Architecture and Implementation................................. 1
  Yuqiu You, Morehead State University, USA

Chapter 2
Teaching Hardware Design with Online Laboratories................................................................. 18
  Reza Hashemian, Northern Illinois University, USA
  Timothy R. Pearson, Northern Illinois University, USA

Chapter 3
New Tools in Hardware and Software Design Applied for Remote Photovoltaic Laboratory......... 40
  Petru A. Cotfas, Transylvania University of Brasov, Romania
  Daniel T. Cotfas, Transylvania University of Brasov, Romania
  Doru Ursuțiu, Transylvania University of Brasov, Romania
  Cornel Samoila, Transylvania University of Brasov, Romania
  Dragos Iordache, Transylvania University of Brasov, Romania

Chapter 4
Remote Experiments in Freshman Engineering Education by Integrated e-Learning............... 60
  Miroslava Ožvoldová, University of Trnava, Slovak Republic & Tomas Bata University
  in Zlín, Czech Republic
  Franz Schauer, University of Trnava, Slovak Republic & Tomas Bata University
  in Zlín, Czech Republic
Chapter 5
Implementation of Remote Laboratories for Industrial Education .................................................... 84
Andreja Rojko, University of Maribor, Slovenia
Thomas Zürcher, Biel Academy of Applied Science, Switzerland
Darko Hercog, University of Maribor, Slovenia
Renato Stebler, Biel Academy of Applied Science, Switzerland

Chapter 6
Collaborative Development and Utilization of iLabs in East Africa .................................................. 108
Cosmas Mwikirize, Makerere University, Uganda
Arthur Asiimwe Tumusiime, Makerere University, Uganda
Paul Isaac Musasizi, Makerere University, Uganda
Sandy Stevens Tickodri-Togboa, Makerere University, Uganda
Adnaan Jiwaji, University of Dar es Salaam, Tanzania
Josiah Nombo, University of Dar es Salaam, Tanzania
Baraka Maiseli, University of Dar es Salaam, Tanzania
Teyana Sapula, University of Dar es Salaam, Tanzania
Alfred Mwambela, University of Dar es Salaam, Tanzania

Section 2
Teaching with Remote Laboratories: Best Practices and Pedagogy

Chapter 7
Online Laboratory Education: Principles and Practices of the Integrated Laboratory Network .......... 125
Simon P. Albon, University of British Columbia, Canada
Devon A. Cancilla, Western Washington University, USA

Chapter 8
The Role of Internet-Accessible Laboratory Plants in the Teaching of Automatic Control ............. 144
Maja Atanasijević-Kunc, University of Ljubljana, Slovenia
Rihard Karba, University of Ljubljana, Slovenia
Vito Logar, University of Ljubljana, Slovenia

Chapter 9
Evaluation of Remote Interface Component Alternatives for Teaching Tele-Robotic Operation ...... 163
Goldstain Ofir, Tel-Aviv University, Israel
Ben-Gal Irad, Tel-Aviv University, Israel
Bukchin Yossi, Tel-Aviv University, Israel

Chapter 10
Teaching Technology Computer Aided Design (TCAD) Online .................................................... 185
Chinmay K Maiti, Indian Institute of Technology, India
Ananda Maiti, Indian Institute of Technology, India
Chapter 11
AutomatL@bs Consortium: A Spanish Network of Web-Based Labs for Control Engineering Education

Sebastián Dormido, Universidad Nacional de Educación a Distancia, Spain
Héctor Vargas, Pontificia Universidad Católica de Valparaíso, Chile
José Sánchez, Universidad Nacional de Educación a Distancia, Spain

Section 3
System Architecture, Design, and Interfaces

Chapter 12
On Infrastructures for Educational Online Laboratories

Sven K. Esche, Stevens Institute of Technology, USA
Constantin Chassapis, Stevens Institute of Technology, USA

Chapter 13
Architectures and Design Methodologies for Scalable and Sustainable Remote Laboratory Infrastructures

J. Lane Thames, Georgia Institute of Technology, USA
Randal Abler, Georgia Institute of Technology, USA
Andrew Hyder, Georgia Institute of Technology, USA
Robert Wellman, Georgia Institute of Technology, USA
Dirk Schaefer, Georgia Institute of Technology, USA

Chapter 14
A Lab Server Model for the iLab Shared Architecture

Paolo Buschiazzo, University of Genoa, Italy
Michael Niederstätter, Carinthia University of Applied Sciences, Austria
Anna Marina Scapolla, University of Genoa, Italy

Chapter 15
The VISIR Open Lab Platform

Ingvar Gustavsson, Blekinge Institute of Technology, Sweden
Lena Claesson, Blekinge Institute of Technology, Sweden
Kristian Nilsson, Blekinge Institute of Technology, Sweden
Johan Zackrisson, Blekinge Institute of Technology, Sweden
Javier Garcia Zubia, University of Deusto, Spain
Unai Hernandez Jayo, University of Deusto, Spain
Lars Häkansson, Blekinge Institute of Technology, Sweden
Josef Ström Bartunek, Blekinge Institute of Technology, Sweden
Thomas Lagö, TechFuzion, USA
Ingvar Claesson, Blekinge Institute of Technology, Sweden
Chapter 16
Online Workbenches for the Deployment of Electronics Experiments .................................................. 318
James L. Hardison, Massachusetts Institute of Technology, USA
Danilo Garbi Zutin, Carinthia University of Applied Sciences, Austria

Chapter 17
Web-Enabled Remote Control Laboratory Using an Embedded Ethernet Microcontroller ............ 338
Chandresh Dubey, Polytechnic Institute of NYU, USA
Hong Wong, Gedex Inc., Ontario, Canada
Vikram Kapila, Polytechnic Institute of NYU, USA
Parth Kumarm, Polytechnic Institute of NYU, USA

Chapter 18
Matlab RTW-Based Internet Accessible Remote Laboratory for Teaching Robot Control............. 362
Zdenko Kovačić, University of Zagreb, Croatia
Davor Jerbić, University of Zagreb, Croatia
Vedran Vojvoda, University of Zagreb, Croatia
Siniša Dujmović, University of Zagreb, Croatia

Chapter 19
Remotely Accessible Systems for Computing Sciences Disciplines.................................................. 380
Mark Stockman, University of Cincinnati, USA

Chapter 20
Remote Instrumentation for Science Education: Ensuring Security for Cyberinfrastructure-Enabled Learning ............................................................................................................. 397
Fred E. Lytle, Purdue University, USA
Gabriela C. Weaver, Purdue University, USA
Phillip Wyss, Purdue University, USA
Debora Steffen, Purdue University, USA
John Campbell, Purdue University, USA

Section 4
Policy Issues

Chapter 21
What do Students Gain from Laboratory Experiences? ............................................................... 416
James Trevelyan, The University of Western Australia, Australia
Zol Bahri Razali, The University of Western Australia, Australia
Chapter 22
Developing Remote Labs for Challenged Educational Environments ................................................. 432
Lawrence Olakunle Kehinde, Texas Southern University, USA
Xuemin Chen, Texas Southern University, USA
Kayode P. Ayodele, Obafemi Awolowo University, Nigeria
Olawale B. Akinwale, Obafemi Awolowo University, Nigeria

Chapter 23
Labshare: Towards Cross- Institutional Laboratory Sharing ................................................................. 453
David Lowe, University of Technology, Sydney, Australia
Stephen Conlon, University of Technology, Sydney, Australia
Steve Murray, University of Technology, Sydney, Australia
Lothar Weber, University of Technology, Sydney, Australia
Michel de la Villefromoy, University of Technology, Sydney, Australia
Euan Lindsay, Curtin University of Technology, Australia
Andrew Nafalski, University of South Australia, Australia
Tee Tang, Queensland University of Technology, Australia
Warren Nageswaran, Royal Melbourne Institute of Technology, Australia

Chapter 24
Collaborative Sustainability Strategies for Online Laboratories .......................................................... 468
Roger Watson, University of Cambridge, UK
Aaron Coble, cmcl innovations, UK
Amit Bhave, cmcl innovations, UK
Andreas Braumann, University of Cambridge, UK
Andrew Smallbone, cmcl innovations, UK
Markus Kraft, University of Cambridge, UK & cmcl innovations, UK

Section 5
Future Trends

Chapter 25
Possible Futures for Remote Laboratories ............................................................................................... 493
Mark F. Schulz, The University of Queensland, Australia
Phillip Long, The University of Queensland, Australia

Chapter 26
Mobile Laboratory Model for Next-Generation Heterogeneous Wireless Systems ............................ 511
Ibrahima Ngom, École Supérieure Polytechnique/UCAD, Sénégal
Hamadou Saliah-Hassane, Télé-université/UQAM, Canada
Claude Lishou, École Supérieure Polytechnique/UCAD, Sénégal
Chapter 27
Stakes and Issues for Collaborative Remote Laboratories in Virtual Environments
Jacques Fayolle, TELECOM Saint-Étienne, France
Michael Callaghan, University of Ulster, UK
Christopher Gravier, TELECOM Saint-Étienne, France
Jim Harkin, University of Ulster, UK
Benjamin Jailly, TELECOM Saint-Étienne, France

Chapter 28
Towards an Immersive Virtual Environment for Physics Experiments Supporting Collaborative Settings in Higher Education
Christian Gütl, Graz University of Technology, Austria & Curtin University of Technology, Australia
Tina Scheucher, Graz University of Technology, Austria & Massachusetts Institute of Technology, USA
Philip H. Bailey, Massachusetts Institute of Technology, USA
John Belcher, Massachusetts Institute of Technology, USA
Fabio Ricardo dos Santos, Graz University of Technology, Austria & Massachusetts Institute of Technology, USA
Stefan Berger, Graz University of Technology, Austria & Massachusetts Institute of Technology, USA

Chapter 29
A Semantic Portal for Publication and Exchange of Educational Online Laboratories
Michael Niederstätte, Carinthia University of Applied Sciences, Austria
Christian Maier, Carinthia University of Applied Sciences, Austria
