Acknowledgment

Professors Kathryn Moyle and Guus Wijngaards would like to thank all those who contributed to the creation of this publication. We would like to thank the Advisory Board for their work, and especially thank Professor Emeritus James Bosco for his support and contributions to the book, which were always in a very timely manner. We would also like to thank all the authors for their creativity, intelligence and diligence, and the reviewers for their insightful comments during the chapter development stage of the publication.

Our thanks also go to all the students who took part in the respective studies discussed in this book. Without their frank and thoughtful insights we would not have a book at all.

Finally, Kathryn wishes to thank her partner Chris White, without whose unwavering understanding and support, it would not have been possible for her to commit the time and energy required to complete this publication.
