Acknowledgment

This book could not happen without the efforts of a remarkable group of mobile technology experts from around the world who made up our Editorial Advisory Board and Contributing Authors. I would first like to thank the members of the Editorial Advisory Board who volunteered their time to ensure that the content of this book was worthwhile and reflected the current state of mobile technology consumption. I would then like to thank each of the individual authors from around the world who contributed countless hours of research and writing to deliver high quality content for this book.

Thanks must also be given to Editor Joel Gamon, and my hard working friends at IGI Global whose guidance and editing genius allowed a collection of disparate chapters to become an integrated book. They are able to work miracles.
