Acknowledgment

The editors would like to acknowledge the help of all involved in the collation and review process of the book, without whose support the project could not have been satisfactorily completed.

Some of the authors of chapters included in this book also served as referees for chapters written by other authors. Thanks go to all those who provided constructive and comprehensive reviews.

Special thanks also go to the publishing team at IGI Global, whose contributions throughout the whole process, from inception of the initial idea to final publication, have been invaluable. In particular, we thank Deborah Yahnke, who continuously prodded via e-mail to keep the project on schedule and to Meg Stoking, whose enthusiasm motivated us initially to accept the invitation to take on this project.

We would like to thank Prof. Anupam Joshi from the Department of Computer Science and Electrical Engineering, University of Maryland, Baltimore County for writing the foreword to this book. We would also like to thank Dr. Lyes Khelladi from Cerist Algeria, who read a semi-final draft of the preface and provided helpful suggestions for enhancing its content.

In closing, we wish to thank all of the authors for their insights and excellent contributions to this book.

The Editors,
Dr. Soraya Kouadri Mostéfaoui, Dr. Zakaria Maamar, and Dr. George Giaglis
June 2007
