## Table of Contents

Preface .................................................................................................................................................. xvi

Acknowledgment .................................................................................................................................... xxiii

### Section 1

**Information Interpretation and Modeling**

**Chapter 1**
Information and Knowledge: Concepts and Functions........................................................................ 1

*El Hassan Bezzazi, CERAPS, Université de Lille 2, France*

**Chapter 2**
Ontology-Based Network Management for Autonomic Communications........................................... 9

*Dimitris Kanellopoulos, University of Patras, Greece*

**Chapter 3**
On the Infological Interpretation of Information................................................................................. 27

*Bogdan Stefanowicz, Warsaw School of Economics, Chair of the Business Informatics, Poland*

**Chapter 4**
How Models and Methods for Analysis and Design of Information Systems can be Improved to Better Support Communication and Learning ........................................................................ 44

*Prima Gustiené, Karlstad University, Sweden*

*Sten Carlsson, Karlstad University, Sweden*
Section 2

Information Management Progress

Chapter 5
Expanding the Strategic Role of Information Interactions in the Enterprise Environment: Developing an Integrated Model ................................................................. 63
  Judit Olah, University of Wisconsin, Madison, USA
  Ole Axvig, Consultant, USA

Chapter 6
Information Management in a Grid-Based E-Health Business Environment: A Technical-Business Analysis ................................................................. 81
  Vassiliki Andronikou, National Technical University of Athens, Greece
  Gabriel Sideras, National Technical University of Athens, Greece
  Dimitrios Halkos, National Technical University of Athens, Greece
  Michael Firopoulos, Intracom IT Services, Greece
  Theodora Varvarigou, National Technical University of Athens, Greece

Chapter 7
Intelligent Agents for Business Process Management Systems ........................................ 97
  Janis Grundspenkis, Riga Technical University, Latvia
  Antons Mislevics, Riga Technical University, Latvia

Chapter 8
Virtual Heterarchy: Information Governance Model .................................................. 132
  Malgorzata Pankowska, University of Economics, Katowice, Poland
  Henryk Sroka, University of Economics, Katowice, Poland

Section 3

Information Valuation

Chapter 9
Value of Information in Distributed Decision Support Systems .................................. 153
  Jadwiga Sobieska-Karpinska, Wroclaw University of Economic, Poland
  Marcin Hernes, Academy of Management in Lodz, Poland

Chapter 10
Accounting and Billing in Computing Environments ................................................. 177
  Claus-Peter Rückemann, Westfälische Wilhelms-Universität (WWU), Münster, Germany;
  Gottfried Wilhelm Leibniz Universität Hannover (LUH), Hannover, Germany;
  North-German Supercomputing Alliance (HLRN), Norddeutscher Verbund für Hoch- und
  Höchstleistungsrechnen, Germany
Chapter 11
Methodological Aspects of the Evaluation of Individual E-Banking Services for Selected Banks in Poland ................................................................. 201
Witold Chmielarz, University of Warsaw, Poland

Chapter 12
Health Infonomics: Intelligent Applications of Information Technology ........................................... 217
Michael Mackert, The University of Texas at Austin, USA
Pamela Whitten, Michigan State University, USA
Bree Holtz, Michigan State University, USA

Chapter 13
The Information Sector in the Economy and its Strategic Value .......................................................... 233
Dariusz T. Dziuba, Warsaw University, Poland

Section 4
Collaboration in Networks

Chapter 14
Designing Collaborative Infrastructures to get Business Value from Collaboration in Large Scale Networks ........................................................................ 249
Igor Hawryszkiewycz, School of Systems, Management and Leadership University of Technology, Sydney, Australia

Chapter 15
Governance of Virtual Networks: Case of Living and Virtual Laboratories ........................................ 262
Brane Semolic, Project & Technology Management Institute Faculty of Logistics, University of Maribor, Slovenia
Jure Kovac, Faculty of Organizational Sciences University of Maribor, Slovenia

Chapter 16
New Forms of Work in the Light of Globalization in Software Development ........................................ 277
Darja Smite, Blekinge Institute of Technology, Sweden, University of Latvia and Riga Information Technology Institute, Latvia
Juris Borzovs, University of Latvia and Riga Information Technology Institute, Latvia

Chapter 17
Digital Confidence in Business: A Perspective of Information Ethics ................................................ 288
Lichun Chiang, National Cheng Kung University, Taiwan
