Advances in Universal Web Design and Evaluation: Research, Trends and Opportunities

Table of Contents

Preface.............................................................................................................................................. vi

Section I: Introduction and General Issues

Chapter I
Web Accessibility and the Needs of Users with Disabilities ...................... 1
Aspasia Dellaporta, Cimex Media Ltd., UK

Chapter II
Failing the Disabled Community: The Continuing Problem of Web Accessibility.............................................................................................. 25
David Kreps, University of Salford, UK
Alison Adam, University of Salford, UK

Section II: The Two Extremes of Life

Chapter III
Designing Children’s Multimedia.............................................................................. 43
Bridget Patel, University of Cambridge, UK
Chapter IV
Bonded Design: A Methodology for Designing with Children ...................... 73
Andrew Large, McGill University, Canada
Valerie Nesset, McGill University, Canada
Jamshid Beheshti, McGill University, Canada
Leanne Bowler, McGill University, Canada

Chapter V
Ageing and its Implications for Elderly Web Experience ............................. 97
Syariffanor Hisham, University of York, UK
Alistair D. N. Edwards, University of York, UK

Section III: Gender Issues

Chapter VI
Gender Issues in HCI Design for Web Access ........................................... 116
Stefania Boiano, InvisibleStudio, Italy
Ann Borda, London South Bank University, UK
Jonathan P. Bowen, Museophile Limited, UK
Xristine Faulkner, London South Bank University, UK
Giuliano Gaia, InvisibleStudio, Italy
Sarah McDaid, London South Bank University, UK

Chapter VII
Interpreting the Female User: How Web Designers Conceptualise Development of Commercial WWW Sites to Satisfy Specific Niche Markets .................................................. 154
Noemi Maria Sadowska, Regents Business School London, UK

Section IV: Cultural Issues

Chapter VIII
From Computer-Mediated Colonization to Culturally Aware ICT Usage and Design ................................................................. 178
Charles Ess, Drury University, USA

Chapter IX
A Case Study: Creating and Designing a Bilingual Resource Web Site for Somali Immigrants ...................................................... 198
Sauman Chu, University of Minnesota, USA
Mauricio Arango, University of Minnesota, USA
Charles Earl Love Yust, University of Minnesota, USA
Section V: Accommodating Disabilities

Chapter X
Web Site Design for People with Dementia ...................................................... 220
   Nada Savitch, Innovations in Dementia, City University, London, UK
   Panayiotis Zaphiris, Centre for HCI Design, City University, UK

Chapter XI
Comparing Comprehension Speeds and Accuracy of
Online Information in Students with and without Dyslexia .................. 257
   Sri Kurniawan, The University of Manchester, UK
   Gerard V. Conroy, The University of Manchester, UK

Chapter XII
Implementing Accessible Online Learning for Blind and
Visually Impaired Students: A Pilot Study ................................................. 271
   Hugh O’Neill, Central Remedial Clinic, Ireland
   Inmaculada Arnedillo-Sánchez, Centre for Research in IT in
      Education (CRITE), University of Dublin, Ireland
   Brendan Tangney, Centre for Research in IT in Education (CRITE),
      University of Dublin, Ireland

About the Authors.......................................................................................... 293
