Table of Contents

Foreword.................................................................................................................................xvi
Preface.....................................................................................................................................xviii

Section 1
The Meaning of Inquiry in STEM Teaching

Chapter 1
Using Levels of Inquiry in the Classroom ................................................................. 1
   Jeffrey Rylander, Glenbrook South High School, USA

Chapter 2
STEMing the Tide: Writing to Learn in Science .................................................. 21
   Pamela B. Childers, The McCallie School, USA
   Michael J. Lowry, The McCallie School, USA

Chapter 3
Concept Maps as Tools for Learning Scientific Language ............................... 51
   Noah L. Schroeder, Washington State University-Pullman, USA
   Olusola O. Adesope, Washington State University-Pullman, USA

Chapter 4
SMASH: An Inquiry-Based Approach to Parent Education in
Math and Science ........................................................................................................ 73
   Maria Meletiou-Mavrotheris, European University Cyprus, Cyprus
   Efi Paparistodemou, Cyprus Ministry of Education, Cyprus
Chapter 5
Where Are We Heading To? Review of Distance Science Education Research (2000-2010) – A Content-Analytic Approach
Evrim Genç Kumtepe, Anadolu University, Turkey
Müjgan Bozkaya, Anadolu University, Turkey
İrem Erdem Aydın, Anadolu University, Turkey

Chapter 6
Assessing Science Inquiry: A Case Study of the Virtual Performance Assessment Project
Jody Clarke-Midura, Harvard University, USA
Jillianne Code, University of Victoria, Canada
Nick Zap, Simon Fraser University, Canada
Chris Dede, Harvard University, USA

Section 2
How to use Technology in Modern Classrooms

Chapter 7
Technology and the Preschooler: As Easy as 1-2-3
Lesia Lennex, Morehead State University, USA
Kimberely Fletcher Nettleton, Morehead State University, USA
Nikita Murphy, Morehead State University, USA

Chapter 8
Mobile Technology in the Classroom
Jimmy Barnes, Jacksonville State University, USA

Chapter 9
Fostering Inquiry in Science among Kinaesthetic Learners through Design and Technology
Nazir Amir, Greenview Secondary School, Singapore
R. Subramaniam, Nanyang Technological University, Singapore
Section 3

STEM Projects that Successfully Integrate Inquiry Methodology

Chapter 10
Learning Statistics with a Multimedia Resource .................................................. 259
Olusola O. Adesope, Washington State University-Pullman, USA

Chapter 11
Science Project, Kim-Jang: Building Relationship with Korean Traditions and the Nature .............................................................................................. 293
Mee-Ryoung Shon, Morehead State University, USA
Sun Ok Jeon, Hallym College-Chuncheon City, South Korea
Karen O. Hammons, Morehead State University, USA

Chapter 12
Educational Robotics Meets Inquiry-Based Learning: Integrating Inquiry-Based Learning into Educational Robotics ...................................................... 327
Amy Eguchi, Bloomfield College, USA
Lisbeth Uribe, The School at Columbia University, USA

Chapter 13
Making and Thinking Movies in the Science Classroom .................................... 367
Lauren Angelone, The Ohio State University, USA

Chapter 14
Getting to the Core: Undergraduate Research on Ocean Cores and Collaborative Scientific Project Management .................................................. 388
Patricia Cleary, University of Wisconsin-Parkside, USA

Chapter 15
Using Digital Stories in a College Level Course on Rocks and Minerals:
Lessons Learned .................................................................................................... 418
Prajukti Bhattacharyya, University of Wisconsin-Whitewater, USA

Section 4

Inquiry Problem Solving within STEM Classrooms

Chapter 16
Cultivating Student-Teachers’ Problem-Solving Abilities by Promoting Utilization of Various Ways of Thinking through E-Learning and E-Portfolio Systems ................................................................. 439
Toshiki Matsuda, Tokyo Institute of Technology, Japan
Chapter 17
Serious Educational Games (SEGs) and Student Learning and Engagement with Scientific Concepts ............................................................... 464
  Shawn Y. Holmes, North Carolina State University, USA
  Brandi Thurmond, North Carolina State University, USA
  Leonard A. Annetta, George Mason University, USA
  Matthew Sears, North Carolina New Schools Project, USA

Chapter 18
LOGO and Elementary Mathematics Education in Portugal..................... 487
  Paulo Carvalho, Câvado Sul Group of Schools, Portugal
  Pedro Palhares, University of Minho, Portugal
  António Osório, University of Minho, Portugal
  Alexandra Gomes, University of Minho, Portugal
  Ema Mamede, University of Minho, Portugal

Chapter 19
An Interdisciplinary Exploration of the Climate Change Issue and Implications for Teaching STEM through Inquiry................................. 523
  Michael J. Urban, Bemidji State University, USA
  Elaine Marker, Delaware State University, USA
  David A. Falvo, Walden University, USA

Chapter 20
Teaching the Greenhouse Effect with Inquiry-Based Computer Simulations: A WISE Case Study ................................................................. 551
  Edward Cohen, Piscatway Township Schools, USA
  Timothy D. Zimmerman, Rutgers University, USA

Chapter 21
Visualizing Content for Computational Geometry Courses ..................... 581
  Christodoulos Fragoudakis, National Technical University of Athens, Greece
  Markos Karampatsis, National Technical University of Athens, Greece

Compilation of References .............................................................................. 605

About the Contributors ................................................................................... 658
