**Chapter 1**
How Much Automation can be Done in Testing? ........................................ 1  
*Izzat Alsmadi, Yarmouk University, Jordan*

**Chapter 2**
On the Application of Automated Software Testing Techniques to the  
Development and Maintenance of Speech Recognition Systems.................... 30  
*Daniel Bolanos, University of Colorado at Boulder, USA*

**Chapter 3**
Runtime Verification of Distributed Programs........................................... 49  
*Eslam Al Maghayreh, Yarmouk University, Jordan*

**Chapter 4**
On the Improvement of Cost-Effectiveness: A Case of Regression Testing....... 68  
*Seifedine Kadry, American University of the Middle East, Kuwait*

**Chapter 5**
A Case Study on Testing for Software Security: Static Code Analysis of a File Reader Program Developed in Java......................................................... 89  
*Natarajan Meghanathan, Jackson State University, USA  
Alexander Roy Geoghegan, L-3 Communications, USA*
Chapter 6
Test Case Prioritization using Cuckoo Search

Praveen Ranjan Srivastava, Birla Institute of Technology and Science Pilani, India
D. V. Pavan Kumar Reddy, Birla Institute of Technology and Science Pilani, India
M. Srikanth Reddy, Birla Institute of Technology and Science Pilani, India
Ch. V. B. Ramaraju, Birla Institute of Technology and Science Pilani, India
I. Ch. Manikanta Nath, Birla Institute of Technology and Science Pilani, India

Chapter 7
A Review of Software Quality Methodologies

Saqib Saeed, University of Siegen, Germany
Farrukh Masood Khawaja, Ericsson Telekommunikation GmbH, Germany
Zaigham Mahmood, University of Derby, UK

Chapter 8
Model-Based Testing of Distributed Functions

Thomas Bauer, Fraunhofer IESE, Germany
Robert Eschbach, Fraunhofer IESE, Germany

Chapter 9
Testing E-Learning Websites

Kamaljeet Sandhu, University of New England, Australia

Chapter 10
Testing E-Services

Kamaljeet Sandhu, University of New England, Australia
