Acknowledgment

Wireless Multi-Access Environments and Quality of Service Provisioning: Solutions and Application would not exist without the effort of many people whose names may not appear on the cover of the book. However, their hard work, cooperation, friendship, and understanding are very important to its preparation and production.

The editors would like to sincerely thank IGI Global for the publication of this book. We thank Prof. Liam Murphy for all his help in writing the foreword. As the success of this book depends on the high quality chapters submitted, the editors wish to express their deep appreciation to the authors of each chapter for their significant contribution. We would also like to thank the reviewers for the generous commitment of time and effort that they have put into the reviewing process and for providing feedback that has enhanced the overall quality of the book. We thank the Editorial Advisory Board for their implication.

Last but not least, we would like to thank our families for being the “center of gravity” and for their continuous support along the way. In particular Gabriel-Miro wishes to dedicate this book to his dear parents, Dora and Ivo, to his lovely wife, Cristina, and to his smart son, Daniel-Sasha. Ramona would like to dedicate this book to her wonderful and loving parents, Maria and Vasile, and to her dear brother, Ionut.
