# Table of Contents

**Preface**.................................................................................................................................................................xviii

**Chapter 1**  
Toward a Theory of Game-Media Literacy: Playing and Building as Reading and Writing................. 1  
*Idit Harel Caperton, World Wide Workshop Foundation, USA*

**Chapter 2**  
Narratizing Disciplines and Disciplinizing Narratives: Games as 21st Century Curriculum.............. 18  
*Sasha A. Barab, Indiana University, USA*  
*Melissa Gresalfi, Indiana University, USA*  
*Tyler Dodge, Indiana University, USA*  
*Adam Ingram-Goble, Indiana University, USA*

**Chapter 3**  
Exploring Cognitive Load in Immersive Educational Games: The SAVE Science Project........... 32  
*Brian C. Nelson, Arizona State University, USA*  
*Diane Jass Ketelhut, Temple University, USA*  
*Catherine Schifter, Temple University, USA*

**Chapter 4**  
Multi-Modal Investigations of Relationship Play in Virtual Worlds .................................................. 41  
*Yasmin B. Kafai, University of Pennsylvania, USA*  
*Deborah Fields, University of California, Los Angeles, USA*  
*Kristin A. Searle, University of Pennsylvania, USA*

**Chapter 5**  
A Next Gen Interface for Embodied Learning: SMALLab and the Geological Layer Cake ........... 51  
*David Birchfield, Arizona State University, USA*  
*Mina Johnson-Glenberg, Arizona State University, USA*

**Chapter 6**  
Wee Wii: Preschoolers and Motion-Based Game Play................................................................. 61  
*J. Alison Bryant, Consultant, USA*  
*Anna Akerman, Adelphi University, USA*  
*Jordana Drell, Nickelodeon/MTV Networks, USA*
Chapter 7
Decoupling Aspects in Board Game Modeling ................................................................. 78
  Fulvio Frapolli, University of Fribourg, Switzerland
  Amos Brocco, University of Fribourg, Switzerland
  Apostolos Malatras, University of Fribourg, Switzerland
  Béat Hirsbrunner, University of Fribourg, Switzerland

Chapter 8
Effects of Playing a History-Simulation Game: Romance of Three Kingdoms .................. 97
  Shiang-Kwei Wang, New York Institute of Technology, USA

Chapter 9
The Design of Virtual Space: Lessons from Videogame Travel ..................................... 120
  Steve Guynup, Art Institute of Pittsburgh - Online Division, USA

Chapter 10
Effects of Built-in Audio versus Unrelated Background Music on Performance in an Adventure Role-Playing Game .................................................................................. 142
  Siu-Lan Tan, Kalamazoo College, USA
  John Baxa, Kalamazoo College, USA
  Matthew P. Spackman, Brigham Young University, USA

Chapter 11
Measuring Student Perceptions: Designing an Evidenced Centered Activity Model for a Serious Educational Game Development Software ...................................................... 165
  Leonard A. Annetta, North Carolina State University, USA
  Shawn Y. Holmes, North Carolina State University, USA
  Meng-Tzu Cheng, North Carolina State University, USA
  Elizabeth Folta, North Carolina State University, USA

Chapter 12
Computer-Generated Three-Dimensional Training Environments: The Simulation, User, and Problem-Based Learning (SUPL) Approach .................................................. 183
  Michael Garrett, Edith Cowan University, Australia
  Mark McMahon, Edith Cowan University, Australia

Chapter 13
Friendship, Closeness and Disclosure in Second Life .................................................... 202
  Don Heider, Loyola University Chicago, USA
  Adrienne L. Massanari, Loyola University Chicago, USA

Chapter 14
Computer Gaming Scenarios for Product Development Teams ...................................... 216
  Andrew J. Wodehouse, University of Strathclyde, UK
  William J. Ion, University of Strathclyde, UK
Chapter 15
Adaptive Interactive Narrative Model to Teach Ethics

Rania Hodhod, University of York, UK
Daniel Kudenko, University of York, UK
Paul Cairns, University of York, UK

Chapter 16
Bio-Affective Computer Interface for Game Interaction

Jorge Arroyo-Palacios, University of Sheffield, UK
Daniela M. Romano, University of Sheffield, UK

Chapter 17
Evaluating User Experience of Actual and Imagined Movement in BCI Gaming

Bram van de Laar, University of Twente, The Netherlands
Boris Reuderink, University of Twente, The Netherlands
Danny Plass-Oude Bos, University of Twente, The Netherlands
Dirk Heylen, University of Twente, The Netherlands

Chapter 18
Towards Games for Knowledge Acquisition and Modeling

Stijn Hoppenbrouwers, Radboud University Nijmegen, The Netherlands
Bart Schotten, Radboud University Nijmegen, The Netherlands
Peter Lucas, Radboud University Nijmegen, The Netherlands

Chapter 19
Automated Event Recognition for Football Commentary Generation

Maliang Zheng, University of York, UK
Daniel Kudenko, University of York, UK
