Information Modeling Methods and Methodologies

Table of Contents

Preface ......................................................................................................................................................... vi

SECTION I: GENERAL TECHNIQUES FOR COMPARING AND ADAPTING MODELING METHODS

Chapter I. Analyzing and Comparing Ontologies with Meta-Models...1
Islay Davies, Queensland University of Technology, Australia
Peter Green, University of Queensland, Australia
Simon Milton, University of Melbourne, Australia
Michael Rosemann, Queensland University of Technology, Australia

Chapter II. Two Meta-Models for Object-Role Modeling................. 17
Dave Cuyler, Sandia National Laboratories, USA
Terry Halpin, Northface University, USA

Chapter III. Evaluating Conceptual Coherence in Multi-Modeling Techniques ................................................................. 43
Bart-Jan Hommes, Delft University of Technology, The Netherlands

Chapter IV. Assessing Enterprise Modeling Languages Using a Generic Quality Framework ............................................. 63
John Krogstie, Norwegian University of Science and Technology, Norway and SINTEF Telecom and Informatics, Norway
Sofie de Flon Arnesen, Norwegian University of Science and Technology, Norway
Chapter V. An Approach for Evolution-Driven Method Engineering
Jolita Ralyté, University of Geneva, Switzerland
Colette Rolland, University of Paris 1 - Sorbonne, France
Mohamed Ben Ayed, University of Paris 1 - Sorbonne, France

SECTION II:
GOAL, REQUIREMENTS, AND PROCESS MODELING

Chapter VI. Goal Modeling in Requirements Engineering: Analysis and Critique of Current Methods
Evangelia Kavakli, University of the Aegean, Greece
Pericles Loucopoulos, University of Manchester, UK

Chapter VII. An Empirical Investigation of Requirements Specification Languages: Detecting Defects While Formalizing Requirements
Erik Kamsties, University of Duisburg-Essen, Germany
Antje von Knethen, Fraunhofer Institute for Experimental Software Engineering, Germany
Jan Philipp, Technische Universität München, Germany
Bernhard Schütz, Technische Universität München, Germany

Chapter VIII. Validating an Evaluation Framework for Requirements Engineering Tools
Raimundas Matulevičius, Norwegian University of Science and Technology, Norway

Chapter IX. A Comparison of the FOOM and OPM Methodologies for User Comprehension of Analysis Specifications
Judith Kabeli, Ben-Gurion University of the Negev, Israel
Peretz Shoval, Ben-Gurion University of the Negev, Israel

Chapter X. Participatory Development of Enterprise Process Models
Reidar Gjersvik, SINTEF Industrial Management, Norway
John Krogstie, Norwegian University of Science and Technology, Norway and SINTEF Telecom and Informatics, Norway
Asbjørn Følstad, SINTEF Telecom and Informatics, Norway
SECTION III:
DATA, ONTOLOGY, AND COMPONENT MODELING

Chapter XI. A Taxonomic Class Modeling Methodology for Object-Oriented Analysis ...................................................... 216
Il-Yeol Song, Drexel University, USA
Kurt Yano, Drexel University, USA
Juan Trujillo, University of Alicante, Spain
Sergio Luján-Mora, University of Alicante, Spain

Chapter XII. Comprehension of Hierarchical ER Diagrams Compared to Flat ER Diagrams ............................................. 241
Revital Danoch, Ben Gurion University of Negev, Israel
Peretz Shoval, Ben Gurion University of Negev, Israel
Mira Balabaan, Ben Gurion University of Negev, Israel

Chapter XIII. Constraints on Conceptual Join Paths .................. 258
Terry Halpin, Northface University, USA

Chapter XIV. Using a Semiotic Framework for a Comparative Study of Ontology Languages and Tools .............................. 278
Xiaomeng Su, Norwegian University of Science and Technology, Norway
Lars Ilebrekke, Norwegian University of Science and Technology, Norway

Chapter XV. A Service-Oriented Component Modeling Approach ....................................................................................... 300
Zoran Stojanovic, Delft University of Technology, The Netherlands
Ajantha Dahanayake, Delft University of Technology, The Netherlands
Henk Sol, Delft University of Technology, The Netherlands

Chapter XVI. Evaluation of Component-Based Development Methods .................................................................................. 323
Nicky Boertien, Rabobank Nederland, The Netherlands
Maarten W.A. Steen, Telematica Instituut, The Netherlands
Henk Jonkers, Telematica Instituut, The Netherlands

About the Authors ................................................................................................................................. 344

Index .................................................................................................................................................. 354
