Information Systems
Evaluation Management

Table of Contents

Foreword .......................................................................................................................... vii
Wim van Grembergen
University of Antwerp, Belgium

Preface ........................................................................................................................... x

Chapter 1. Perceived Value and Technology Adoption Across Four End User Groups ................................................................................................................. 1
Jaak Jurison, Fordham University, USA

Chapter 2. A Case Study Evaluation of the Use of the Viable System Model in Information Systems Development ................................................. 17
P. Kawalek, University of Warwick, United Kingdom
D. G. Wastell, University of Manchester, United Kingdom

Chapter 3. Key Issues in IS Management in Norway: An Empirical Study Based on Q Methodology ................................................................. 35
Petter Gottschalk, Norwegian School of Management, Norway

Chapter 4. Measuring the Financial Benefits of IT Investments on Coordination ......................................................................................... 54
Chiara Franchalanci and P. Maggiolini
Politecnico di Milano, Italy

Chapter 5. A Benefits Realization Approach to IT Investments......... 75
John Thorp, The Thorp Network

Chapter 6. The IT Evaluation and Benefits Management Life Cycle ................................................................................................................. 101
Judy McKay and Peter Marshall
Edith Cowan University, Australia
Chapter 7. Identifying the Contribution of IT/IS Infrastructure to Manufacturing Agility .................................................. 118
Adrian E. Coronado Mondragon, Mansoor Sarhadi and Colin Millar, Brunel University, United Kingdom

Chapter 8. Defining Meaningful Measures of IT Productivity With the Balanced Scorecard .............................................................. 132
Nancy Eickelmann, Motorola Labs, USA

Chapter 9. Conceptual Model for MIS Flexibility Evaluation .......... 146
Masaru Furukawa, Toyama University, Japan

Chapter 10. A Review of Research Issues in Evaluation of Information Systems ........................................................................ 167
Vassilis Serafeimidis, KPMG Consulting, United Kingdom, and University of Surrey, United Kingdom

Chapter 11. Expanding Our View of Information Systems Success ................................................................................................... 195
Barbara Ann Sherman and G. Lawrence Sanders
State University of New York at Buffalo, USA
Edward J. Garrity, Canisius College, USA

Chapter 12. Actability Evaluation: An Exploratory Study .................... 208
Karin Hedström, Örebro University, Sweden and Linköping University, Sweden
Stefan Cronholm, Linköping University, Sweden

Chapter 13. An Information System for Monitoring of Power Quality Disturbances ................................................................. 218
J. S. Huang, Edith Cowan University, Australia
M. Negnevitsky and N. T. Nguyen, University of Tasmania, Australia

Chapter 14. Exploring the Role of Expectations in Defining Stakeholders’ Evaluations of IS Quality ................................................. 231
Carla Wilkin, Bill Hewett, and Rodney Carr
Deakin University, Australia

Chapter 15. Research on IS/IT Investment Evaluation and Benefits Realization in Australia .......................................................... 244
Chad Lin, Graham Pervan and Donald McDermid
Curtin University of Technology, Australia
    Nandish V. Patel, Brunel University, United Kingdom

Chapter 17. Designing and Implementing an IT Evaluation Program ................................................................................................................................. 274
    Han T. M. van der Zee, Nolan Norton Institute, The Netherlands

Chapter 18. A Framework to Evaluate the Informatization Level ................................................................................................................................. 287
    Soo Kyoung Lim, University of Wisconsin-Madison, USA

    Wilfred S. J. Geerlings and Alexander Verbraeck
    Delft University of Technology, The Netherlands
    John van Beusekom, Ron P. T. de Groot and Gino Damen
    The Hague, The Netherlands

Chapter 20. Towards a Model for Architectural Coordination of Business and IT Perspective ................................................................................................. 311
    Håkan Enquist and Thanos Magoulas, Göteborg University

About the Editor ................................................................................................. 318
