Table of Contents

Foreword............................................................................................................................................xvi

Preface...............................................................................................................................................xviii

Acknowledgment................................................................................................................................xxiv

Section I
Constructivism and Progressive Higher Education in the World of Information Technology

Chapter I
Closing the Circle: From Dewey to Web 2.0...................................................................................... 1
Maria Luisa Pérez Cavana, Open University, UK

Chapter II
Beyond Constriction and Control: Constructivism in Online Theory and Practice......................... 14
Noel Fitzpatrick, Dublin Institute of Technology, Ireland
Nóirín Hayes, Dublin Institute of Technology, Ireland
K.C. O’Rourke, Dublin Institute of Technology, Ireland

Chapter III
The Theory and Practice of Teaching with Technology in Today’s Colleges and Universities.......... 27
Barbara de la Harpe, RMIT University, Australia
Fiona Peterson, RMIT University, Australia

Chapter IV
A Constructivist Approach to Online Learning: The Community of Inquiry Framework............... 43
Karen Swan, Kent State University, USA
D.R. Garrison, University of Calgary, Canada
Jennifer C. Richardson, Purdue University, USA

Chapter V
Applying Constructivism to Online Learning: A New Instructional Design Map ................................. 58
Jennifer Lee, University of North Texas, USA
Lin Lin, University of North Texas, USA
Chapter VI
Enhancing Authentic Assessment Through Information Technology ................................................... 74
Beth Rubin, DePaul University, USA

Chapter VII
Nontraditional Students and Information Technology: The Siren Call of the Virtual Classroom and its Impact on Progressive Educational Ideals ................................................................. 90
Xenia Coulter, SUNY Empire State College, USA
Alan Mandell, SUNY Empire State College, USA

Section II
Teaching and Learning with Information Technology: Constructivist Approaches

Chapter VIII
Online Learning Conversations: Potential, Challenges and Facilitation ............................................ 112
Jakko van der Pol, Utrecht University, The Netherlands

Chapter IX
Virtual Constructivism: Avatars in Action .......................................................................................... 130
Laura M. Nicosia, Montclair State University, USA

Chapter X
The Power and Promise of Web 2.0 Tools .......................................................................................... 146
G. Andrew Page, The University of Alaska Anchorage, USA
Radwan Ali, Kennesaw State University, USA

Chapter XI
IT-Enabled Strategies for Mental Modeling in E-Learning ................................................................. 159
Shalin Hai-Jew, Kansas State University, USA

Section III
International Approaches to Constructivism: Case Studies

Chapter XII
Transformative Potential of Constructivist Blended Problem-Based Learning in Higher Education ................................................................. 182
Roisin Donnelly, Dublin Institute of Technology, Ireland
Chapter XIII
Critical Survey of Information Technology Use in Higher Education: Blended Classrooms .......... 203
James G.R. Cronin, University College Cork, Ireland
John Paul McMahon, University College Cork, Ireland
Michael Waldron, University College Cork, Ireland

Chapter XIV
Structure of a Blended University Course: Applying Constructivist Principles to Blended Teaching ............................................................................................................. 216
M. Beatrice Ligorio, University of Bari, Italy
Nadia Sansone, University of Bari, Italy

Chapter XV
Constructivism and Online Collaborative Group Learning in Higher Education:
A Case Study ................................................................................................................. 231
Hwee Ling Lim, The Petroleum Institute, Abu Dhabi, UAE
Fay Sudweeks, Murdoch University, Australia

Chapter XVI
Constructivist Strategies to Optimize Four Levels of Interaction in a Distributed Learning Environment: A Case Study ............................................................................................................. 247
Linda Lohr, University of Northern Colorado, USA
Nicholas Eastham, University of Northern Colorado, USA
David Kendrick, University of Northern Colorado, USA

Chapter XVII
Facilitating Students-Driven Learning of Computer Programming with Technology ............... 262
Alessio Gaspar, University of South Florida Polytechnic, USA
Sarah Langevin, University of South Florida Polytechnic, USA
Naomi Boyer, University of South Florida Polytechnic, USA

Chapter XVIII
Designing Asynchronous Discussions to Teach Critical Thinking ........................................... 276
John Miller, National University, USA

Chapter XIX
“To Be in Occasional Touch”: Goddard College’s Progressive Principles and Distributed Learning ................................................................................................................. 288
Mark H. Schulman, Goddard College, USA
Chapter XX
Using Blogs to Foster Inquiry, Collaboration, and Feedback in Pre-Service Teacher Education
Carol R. Rinke, Gettysburg College, USA
Divonna M. Stebick, Gettysburg College, USA
Lauren Schaefer, Carroll County Public Schools, USA
M. Evan Gaffney, Gettysburg College, USA

Chapter XXI
The Intersection of Theory, Tools and Tasks in a Postgraduate Learning Environment
Michal Zellermayer, Levinsky College of Education, Israel
Nili Mor, Levinsky College of Education, Israel
Ida Heilweil, Levinsky College of Education, Israel
