Acknowledgment

This book could not have been edited without great help and support from many sources. I would like to acknowledge the help of all involved in the collation, review process and production of the book, without whose support the project could not have been satisfactorily completed.

Deep appreciation and gratitude is due to Dr. Adamantios Koumpis, manager of the Research Programmes Division, ALTEC S.A. and Professor Pericles A. Mitkas of Aristotle University of Thessaloniki for their continuous support during this project.

Most of the authors of the chapters included in this book also served as referees for articles written by other authors. Thanks go to all those who provided constructive and comprehensive reviews. However, some of the reviewers must be mentioned as their reviews set the benchmark. Reviewers who provided the most comprehensive, critical and constructive comments include: Dr. Adamantios Koumpis of ALTEC S.A., Dr. Yuri Demchenko of the University of Amsterdam and Dr. Renata S. S. Guizzardi from ITC-IRST Povo, Trento, Italy. Support from the Department of Accounting and Finance at Macedonia University is also acknowledged for their hosting and e-mail service during the review process.

Special thanks also go to all the staff at IGI Global, whose contributions throughout the entire process from inception of the initial idea to final publication have been invaluable. In particular to Jan Travers, who continuously offered encouragement via e-mail to keep the project on schedule, and to Mehdi Khosrow-Pour whose enthusiasm motivated me to initially accept his invitation to take on this project.

Special thanks to my colleagues at the University of Macedonia for their moral support and help in reading various drafts and manuscripts and provided helpful suggestions for enhancing its content. Last but not least, to my wife Maria for her unfailing support and encouragement during the months it took to give birth to this book and to my children Katerina and George for their love.

In closing, I wish to thank all of the authors for their insights and excellent contributions to this book.

Nicolaos Protogerou
