# Information Technology Education in the New Millennium

## Table of Contents

**Foreword** .................................................................................................................... vii  
  Mohammad Dadashzadeh, Wichita State University, USA  
  Al Saber and Sherry Saber, Friends University, USA

**Preface** ........................................................................................................................ x

**Chapter 1. Web-Delivered Education: Shaking the Foundations of the “Establishment”?**  
  David A. Banks, University of South Australia, Australia  
  ........................................................................................................................................ 1

**Chapter 2. An Advanced Course in Application Programming and Design**  
  Cecil Schmidt, Washburn University, USA  
  ........................................................................................................................................ 11

**Chapter 3. Establishing a Telecommunications and Networking Technology B.S. Degree**  
  Julie R. Mariga, Purdue University, USA  
  ........................................................................................................................................ 16

**Chapter 4. An Action Learning Approach for the Development of Technology Skills**  
  Richard L. Peterson and Joan D. Mahoney, Montclair State University, USA  
  ........................................................................................................................................ 26

**Chapter 5. Real-World Learning of Information Resource Management**  
  Dusan Lesjak and Miroslav Rebernik, University of Maribor, Slovenia  
  ........................................................................................................................................ 33

**Chapter 6. IS Education in the New Millenium: Determining the “Right” Curriculum**  
  Sanjeev Phukan, Bemidji State University, USA  
  Ashok Ranchhod, Southampton Business School, United Kingdom  
  T. Vasudavan, Edith Cowan University, Australia  
  ........................................................................................................................................ 44

**Chapter 7. Measurement of a College Computer Literacy Course**  
  Nancy Tsai and Thomas E. Hebert, California State University, Sacramento, USA  
  ........................................................................................................................................ 49

**Chapter 8. The Place of Homework in an Information Systems Tutorials**  
  Bill Morgan and Bob Godfrey, University of Tasmania, Australia  
  ........................................................................................................................................ 54
Chapter 9. Human Learning Models and Data Collection Over the “Long Haul” ................................................................. 64
Kevin D. Reilly and Norman W. Bray, University of Alabama in Birmingham, USA

Chapter 10. Are Information Systems Students in Their Right Minds? .......... 70
Steve Benson and Craig Standing, Edith Cowan University, Australia

Chapter 11. The Gender Issue in Information Technology: Collegiate and Corporate Solutions .......................................................... 81
Donald J. Caputo and Frederick J. Kohun, Robert Morris College, USA

Chapter 12. A Methodology for Validating Entry Level Value versus Career Value of Courses in an MIS Program ................................................................. 88
Earl Chrysler, Quinnipiac College, USA
Stuart Van Auken, Florida Gulf Coast University, USA

Chapter 13. A Personalized System of Instruction for Teaching Java ............ 95
Henry H. Emurian, University of Maryland-Baltimore County, USA
Ashley G. Durham, Centers for Medicare & Medicaid Services, USA

I. T. Hawryszkiewycz, University of Technology, Australia

Chapter 15. IS Program Issues: From Origin to Accreditation ....................... 118
Douglas Leif, Bemidji State University, USA

Chapter 16. Educating the Business Information Technologist: Developing a Strategic IT Perspective ......................................................... 130
John Mendonca, Purdue University, USA

Chapter 17. Collaborative Ph.D. Examination ............................................. 136
Mike Metcalfe and Samantha Grant, University of South Australia, Australia

Chapter 18. Information Systems and Computer Science Model Curricula: A Comparative Look .......................................................... 146
Anthony Scime’, State University of New York College at Brockport, USA

Chapter 19. E-Commerce Curriculum Development and Implementation ....... 159
Linda V. Knight and Susy S. Chan, DePaul University, USA

Chapter 20. The Challenge of Teaching Research Skills to Information Systems and Technology Students ......................................................... 170
Beverley G. Hope, Victoria University of Wellington, New Zealand and City University of Hong Kong, China
Mariam Fergusson, PricewaterhouseCoopers, Australia
Chapter 21. Towards Establishing the Best Ways to Teach and Learn about IT ................................................................. 186
Chris Cope, Lorraine Staehr and Pat Horan
La Trobe University, Bendigo, Australia

Chapter 22. Bridging the Industry-University Gap: An Action Research Study of a Web-Enabled Course Partnership ................................................................. 214
Ned Kock, Temple University, USA
Camille Auspitz and Brad King, Day & Zimmermann, Inc., USA

Chapter 23. Data Modeling: A Vehicle for Teaching Creative Problem Solving and Critical Appraisal Skills ................................................................. 234
Clare Atkins, Nelson Marlborough Institute of Technology, New Zealand

Chapter 24. Information Systems Curriculum Development as an Ecological Process ................................................................. 249
Arthur Tatnall, Victoria University of Technology, Australia
Bill Davey, RMIT University, Australia

Chapter 25. Teaching or Technology: Who’s Driving the Bandwagon? .......... 264
Geoffrey C. Mitchell, Victoria University of Wellington, New Zealand
Beverley G. Hope, Victoria University of Wellington, New Zealand and City University of Hong Kong, China

About the Editors .................................................................................................... 284
