# Table of Contents

Preface.................................................................................................................................................. xvi

**Section 1**  
Philosophy, Education, Training, and Prospects in Applied Geospatial Industries

**Chapter 1**  
Significant Advances in Applied Geography from Combining Curiosity-Driven and Client-Driven Research Methodologies ................................................................. 1  
*Barry Wellar, University of Ottawa, Canada & Wellar Consulting Inc., Canada*

**Chapter 2**  
The Use of Geospatial Technology in Disaster Management .......................................................... 21  
*Scott Westlund, University of Manitoba, Canada*

**Chapter 3**  
Geospatial Technology: Curricular Keystone of Applied Geography .................................................. 35  
*Richard G. Boehm, Texas State University–San Marcos, USA*  
*Audrey Mohan, University of Texas–San Antonio, USA*

**Chapter 4**  
Beyond Class Hours: The GIS Lab as a Center of Geographic Education ........................................ 46  
*Robert Hickey, Central Washington University, USA*

**Chapter 5**  
Critical Incident Management and Geographically–Based Systems ..................................................... 62  
*David W. Webb, Sam Houston State University, USA*  
*David R. Hoffpaur, Sam Houston State University, USA*

**Chapter 6**  
An Examination of Job Titles Used for GIScience Professionals .......................................................... 68  
*Thomas A. Wikle, Oklahoma State University, USA*
Chapter 7
Geospatial Workforce Trends in the United States ................................................................. 82
Lawrence E. Estaville, Texas State University-San Marcos, USA

Chapter 8
Geographic Disparities in Cancer Survival and Access to Care: Ovarian Cancer in Kentucky .... 90
Mary E. Gordinier, Norton Cancer Institute, USA
Carol L. Hanchette, University of Louisville, USA

Section 2
Focus on Human Geography Specialties in Applied Geospatial Research

Chapter 9
Varying the Variable: Presenting Different Cases for Visualizing the Relative Attractiveness of Retail Business Centers in New Britain, Connecticut .................................................. 101
Zachary Klaas, Connecticut State University, USA

Chapter 10
Emerging Retail Strategies in Urban Canada ............................................................................. 114
Tony Hernandez, Ryerson University, Canada
Magnus Svindal, Ryerson University, Canada

Chapter 11
Similarities between Competitors and the Implications for Location Strategies ..................... 132
Lawrence Joseph, Arizona State University, USA

Chapter 12
Changing Retail Banking Supply-Demand Mismatch: A Tale of Two States ............................ 151
Bin Zhou, Southern Illinois University Edwardsville, USA

Chapter 13
Location Patterns of Section 8 Housing in Jefferson County, Kentucky ................................ 170
Wei Song, University of Louisville, USA
Karl Keeling, University of Louisville, USA

Chapter 14
Spatiotemporal Pattern Analysis of Rapid Urban Expansion Using GIS and Remote Sensing ................................................................. 188
Hyun Joong Kim, Pittsburg State University, USA
Chapter 15
Practical Approaches to Spatial Estimation of Disaster-Affected Populations
Lisa Jordan, Florida State University, USA
Benjamin Watkins, Kimetrica Limited, Kenya
Patrick Biegon, Kimetrica Limited, Kenya
Margaret Mwangi, Kimetrica Limited, Kenya
Rob Rose, Kimetrica Limited, Kenya

Chapter 16
A Geographic Analysis of Public-Private School Choice in South Carolina, USA
Haifeng (Charlie) Zhang, University of Louisville, USA
Lorin W. Anderson, The Anderson Research Group, USA
David J. Cowen, University of South Carolina, USA
Lisle S. Mitchell, University of South Carolina, USA

Chapter 17
Impact of Spatial Filtering on the Least Cost Path Method: Selecting a High-Speed Rail Route for Ohio’s 3-C Corridor
Amy E. Rock, Kent State University, USA
Amanda Mullett, Kent State University, USA
Saad Algharib, Kent State University, USA
Jared Schaffer, Kent State University, USA
Jay Lee, Kent State University, USA

Chapter 18
Disease, Death, and the Body Politic: An Areal Interpolation Example for Political Epidemiology
James L. Wilson, Northern Illinois University, USA
Christopher J. Mansfield, East Carolina University, USA

Chapter 19
From Beats to Tracts: A Remote Sensing Approach to the Interpolation of Crime Data
Gang Gong, Sam Houston State University, USA
