Table of Contents

Preface ................................................................................................................................................ xvi

Chapter 1
A Pragmatic Approach to Intrusion Response Metrics ................................................................. 1
Chris Strasburg, The Ames Laboratory, US Department of Energy, USA
Johnny S. Wong, Iowa State University, USA

Chapter 2
Feature Extraction Methods for Intrusion Detection Systems ...................................................... 23
Hai Thanh Nguyen, Gjøvik University College, Norway
Katrin Franke, Gjøvik University College, Norway
Slobodan Petrović, Gjøvik University College, Norway

Chapter 3
A Distributed and Secure Architecture for Signature and Decryption Delegation through Remote Smart Cards ................................................................. 53
Giuseppe Cattaneo, Università di Salerno, Italy
Pompeo Faruolo, Università di Salerno, Italy
Ivan Visconti, Università di Salerno, Italy

Chapter 4
Information Security Management: Awareness of Threats in E-Commerce ............................. 66
Mohammad Mahfuzur Rahman, Applied Research Centre for Business and Information Technology (ARCBIT), UK
Karim Mohammed Rezaul, Centre for Applied Internet Research (CAIR), Glyndŵr University, UK

Chapter 5
Analyzing Information Security Goals .......................................................................................... 91
Ella Kolkowska, Örebro University School of Business, Sweden
Karin Hedström, Örebro University School of Business, Sweden
Fredrik Karlsson, Örebro University School of Business, Sweden
Chapter 6
Graphical Passwords
Luigi Catuogno, Università degli Studi di Salerno, Italy
Clemente Galdi, Università degli Studi di Napoli “Federico II”, Italy

Chapter 7
Assessing the Security of Software Configurations
Afonso Araújo Neto, University of Coimbra, Portugal
Marco Vieira, University of Coimbra, Portugal

Chapter 8
A Decision Support System for Privacy Compliance
Siani Pearson, Cloud and Security Research Lab, HP Labs, UK
Tomas Sander, Cloud and Security Research Lab, HP Labs, USA

Chapter 9
Information Security Management Based on Linguistic Sharing Techniques
Marek R. Ogiela, AGH University of Science and Technology, Poland
Urszula Ogiela, AGH University of Science and Technology, Poland

Chapter 10
SQL Injection Attacks Countermeasures
Kasra Amirtahmasebi, Chalmers University of Technology, Sweden
Seyed Reza Jalalinia, Chalmers University of Technology, Sweden

Chapter 11
Security and Authentication Issues of an Embedded System Designed and Implemented for Interactive Internet Users
Siddhartha Baruah, Gauhati University, India
Anjana Kakoty Mahanta, Gauhati University, India
Kanak Ch Sarma, Gauhati University, India

Chapter 12
Distributed Key Management Scheme Based on CL-PKC in P2P Networks
Zhongwen Li, Chengdu University, China
Zhibin Xu, Xiamen University, China
Chen Liang, Xiamen University, China

Chapter 13
A Privacy Service for Comparison of Privacy and Trust Policies within SOA
David S. Allison, The University of Western Ontario, Canada
Hany F. EL Yamany, Suez Canal University, Egypt
Miriam A. M. Capretz, The University of Western Ontario, Canada
Chapter 14
Creating and Applying Security Goal Indicator Trees in an Industrial Environment........................................... 266
   Alessandra Bagnato, TXT e-solutions, Italy
   Fabio Raiteri, TXT e-solutions, Italy
   Christian Jung, ISQ Fraunhofer Institute for Experimental Software Engineering IESE, Germany
   Frank Elberzhager, ISQ Fraunhofer Institute for Experimental Software Engineering IESE, Germany

Chapter 15
Security Enhancement of Peer-to-Peer Session Initiation ..................................................................................... 281
   Xianghan Zheng, Fuzhou University, P.R. China
   Vladimir A. Oleshchuk, University of Agder, Norway

Chapter 16
Towards a Framework for Collaborative Enterprise Security .................................................................................. 309
   Janardan Misra, Independent Researcher, India

Chapter 17
Privacy-Aware Organisation-Based Access Control Model (PrivOrBAC) .......................................................... 335
   Nabil Ajam, Institut Télécom, Télécom Bretagne, France
   Nora Cuppens-Boulahia, Institut Télécom, Télécom Bretagne, France
   Fréderic Cuppens, Institut Télécom, Télécom Bretagne, France

Chapter 18
   Komminist Weldemariam, Fondazione Bruno Kessler, Italy
   Adolfo Villafiorita, Fondazione Bruno Kessler, Italy

Chapter 19
Countering Spam Robots: Scrambled CAPTCHA and Hindi CAPTCHA .................................................. 381
   Aditya Raj, Netaji Subhas Institute of Technology, India
   Tushar Pahwa, Netaji Subhas Institute of Technology, India
   Ashish Jain, Netaji Subhas Institute of Technology, India

Chapter 20
Embedded System Security Risk in a Green-House Environment .............................................................................. 394
   Trailokya Oraon, Jorhat Engineering College, India

Chapter 21
Security in Wireless Sensor Networks with Mobile Codes ......................................................................................... 411
   Frantisek Zboril Jr., Brno University of Technology, Czech Republic
   Jan Horacek, Brno University of Technology, Czech Republic
   Martin Drahansky, Brno University of Technology, Czech Republic
   Petr Hanacek, Brno University of Technology, Czech Republic
Chapter 22
Grid of Security: A Decentralized Enforcement of the Network Security................................................. 426
  Olivier Flauzac, University of Reims Champagne-Ardenne, France
  Florent Nolot, University of Reims Champagne-Ardenne, France
  Cyril Rabat, University of Reims Champagne-Ardenne, France
  Luiz-Angelo Steffenel, University of Reims Champagne-Ardenne, France

Chapter 23
Effective Malware Analysis Using Stealth Breakpoints............................................................................. 444
  Amit Vasudevan, CyLab, Carnegie Mellon University, USA

Chapter 24
A Dynamic Cyber Security Economic Model: Incorporating Value Functions for All Involved Parties ................................. 462
  C. Warren Axelrod, Delta Risk LLC, USA

Compilation of References ............................................................................................................................. 478
About the Contributors .................................................................................................................................... 510
