Table of Contents

Foreword .................................................................................................................................................. xi
Preface ..................................................................................................................................................... xiii
Acknowledgment ....................................................................................................................................... xxxiv

Section I
Methodologies and Techniques for Developing Agent-Based Tutoring Systems

Chapter I
Overview of Agent Modelling ......................................................................................................................... 1

Helder Coelho, Lisbon University, Portugal

Chapter II
Building Intelligent Learning Environments Using Intelligent Learning Objects ........................................... 19

Ricardo Azambuja Silveira, Federal University of Santa Catarina (UFSC), Brazil
Júlia Marques Carvalho da Silva, Federal University of Santa Catarina (UFSC), Brazil

Chapter III
Design and Evaluation of Animated Pedagogical Agents .............................................................................. 43

Márcia Cristina Moraes, Pontifical Catholic University of Rio Grande do Sul (PUCRS), Brazil
Milene Silveira, Pontifical Catholic University of Rio Grande do Sul (PUCRS), Brazil

Chapter IV
Maga Vitta: Conversational Ecological Agent in an Interactive Collective Construction Environment for Basic Education ........................................................................................................ 73

Margarete Axt, Federal University of Rio Grande do Sul (UFRGS), Brazil
Magali Teresinha Longhi, Federal University of Rio Grande do Sul (UFRGS), Brazil
Paloma Dias Silveira, Federal University of Rio Grande do Sul (UFRGS), Brazil
Lucas Nunes Guimarães, Federal University of Rio Grande do Sul (UFRGS), Brazil
Section II
Cognitive and Affective Student Modeling in Intelligent Learning Environments

Chapter V
Using Bayesian Networks for Student Modeling ................................................................. 97
Chao-Lin Liu, National Chengchi University, Taiwan

Chapter VI
Cognitive Models Applied to Built Intelligent Educational Applications .......................... 114
Lucia Maria Martins Giraffa, Pontifical Catholic University of Rio Grande do Sul (PUCRS), Brazil
André Luís Alice Raabe, Itajaí Valley University, Brazil

Chapter VII
Inferring Emotions and Applying Affective Tactics for a Better Learning .......................... 135
Patricia Augustin Jaques, University of Vale do Rio dos Sinos (UNISINOS), Brazil
Rosa Maria Viccari, Federal University of Rio Grande do Sul (UFRGS), Brazil

Chapter VIII
InteliWeb: The E-Learning System that Recognizes Aspects of Self-Efficacy ...................... 156
Francine Bica, Federal University of Rio Grande do Sul, Brazil
Regina Verdin, Federal University of Rio Grande do Sul, Brazil

Chapter IX
Towards a Model that Considers the Student’s Affective Dimensions in Intelligent Learning Environments ................................................................. 178
Magda Bercht, Federal University of Rio Grande do Sul (UFRGS), Brazil

Chapter X
Social and Affective Agents to Motivate Collaboration on Agent-Based Intelligent Tutoring Systems ................................................................. 201
Elisa Boff, University of Caxias do Sul (UCS), Brazil
Cecília Dias Flores, Federal University of Health Science of Porto Alegre (UFCSA), Brazil

Section III
Agent-Based Tutoring Systems

Chapter XI
Constructing Intelligent Tutoring Systems Based on a Multiagent Architecture .................. 228
Ig Bittencourt, Federal University of Alagoas, Brazil
Evandro de Barros Costa, Federal University of Alagoas, Brazil
Baldoíno Fonseca dos Santos Neto, Federal University of Alagoas, Brazil
João Guilherme Maia de Menezes, Federal University of Alagoas, Brazil
Chapter XII
Pedagogical Negotiation and Solidarity Assimilation Groups in Action:
The Combined Efforts of E-M@T and Leibniz to Aid Calculus Students ........................................ 260
João Carlos Gluz, University of Vale do Rio dos Sinos (UNISINOS), Brazil
Tânia Cabral, State University of Rio Grande do Sul (UERGS), Brazil
Paulo Baggio, State University of Rio Grande do Sul (UERGS), Brazil
Paulo Livi, State University of Rio Grande do Sul (UERGS), Brazil
Rafael Mallmann, State University of Rio Grande do Sul (UERGS), Brazil

Chapter XIII
Intelligent Tutoring Systems for Distributed Learning ................................................................. 292
Mohamed Ally, Athabasca University, Canada

Chapter XIV
An Architecture for Developing Multiagent Educational Applications for the Web ..................... 307
Tasos Triantis, University of Patras, Greece
Panayiotis Pintelas, University of Patras, Greece

Compilation of References ........................................................................................................ 324

About the Contributors ............................................................................................................. 350

Index ........................................................................................................................................ 355
