Preface .......................................................................................................................................... vi

Section I: Main Characteristics of Smart Organizations

Chapter I
Smart Organizations in the Digital Age ................................................................. 1
Erastos Filos, Directorate-General Information Society and Media,
European Commission, Belgium

Section II: Technologies for Operation of Smart Organizations

Chapter II
Applications of Agent-Based Technologies in Smart
Organizations ................................................................. 39
László Zsolt Varga, Hungarian Academy of Sciences, Hungary

Chapter III
The HUB as an Enabling IT Strategy to Achieve Smart
Organizations ....................................................................................... 68
Arturo Molina, ITESM, Campus Monterrey, Mexico
Ricardo Mejia, ITESM, Campus Monterrey, Mexico
Nathalie Galeano, ITESM, Campus Monterrey, Mexico
Teresa Nájera, ITESM, Campus Monterrey, Mexico
Marcela Velandia, DaimlerChrysler Vehículos Comerciales México
S.A de C.V., Mexico
Section III: Knowledge- and Human-Centered Technologies in Smart Organizations

Chapter IV
Knowledge Management in Smart Organizations ....................................... 101
Shirley Chan, The University of Hong Kong, Hong Kong

Chapter V
Bridging Diversity across Time and Space: The Case of Multidisciplinary Virtual Teams ................................................................. 136
Violina Ratcheva, The University of Sheffield, UK

Chapter VI
Neural Data Mining System for Trust-Based Evaluation in Smart Organizations ..................................................................................... 159
T. T. Wong, The Hong Kong Polytechnic University, Hong Kong

Section IV: Communication and Security Technologies for Smart Organizations

Chapter VII
New Challenges for Smart Organizations: Demands for Mobility – Wireless Communication Technologies ..................................................... 187
István Mezgár, Hungarian Academy of Sciences and Budapest University of Technology and Economics, Hungary

Chapter VIII
Infrastructure Support for Smart Organizations: Integration of Web Service Partners in Heterogeneous Environments .............................. 257
Peter Bertok, Royal Melbourne Institute of Technology, Australia
Xinjian Xu, Royal Melbourne Institute of Technology, Australia

Chapter IX
Grid Technology for Smart Organizations .................................................... 289
Gergely Sipos, Hungarian Academy of Sciences, Hungary
Péter Kacsuk, Hungarian Academy of Sciences, Hungary
Chapter X
Communication Security Technologies in Smart Organizations ...... 333
  Raphael C. W. Phan, Swinburne University of Technology (Sarawak Campus), Malaysia

About the Authors ............................................................................................. 354
