# Table of Contents

Preface.................................................................................................................................................. XV

Acknowledgment.................................................................................................................................. XX

## Section 1

### Artificial Intelligence in Games

#### Chapter 1
Co-ordinating Formations: A Comparison of Methods ................................................................. 1
  
  Jussi Laasonen, University of Turku, Finland
  Jouni Smed, University of Turku, Finland

#### Chapter 2
Adapting Pathfinding with Potential Energy .................................................................................. 23
  
  Thomas Hartley, University of Wolverhampton, UK

#### Chapter 3
Behavior Trees: Introduction and Memory-Compact Implementation........................................... 40
  
  Björn Knafla, Bjoern Knafla Parallelization + AI + Gamedev, Germany
  Alex J. Champandard, AiGameDev.com, Austria

#### Chapter 4
Nonmanipulable Collective Decision-Making for Games.............................................................. 67
  
  Rob LeGrand, Angelo State University, USA
  Timothy Roden, Angelo State University, USA
  Ron K. Cytron, Washington University in St. Louis, USA

#### Chapter 5
Understanding and Implementing Adaptive Difficulty Adjustment in Video Games.................... 82
  
  Tremblay Jonathan, LIARA, Canada
  Bouchard Bruno, LIARA, Canada
  Bouzouane Abdenour, LIARA, Canada
Chapter 6
Application and Evaluation of Artificial Intelligence Algorithms for StarCraft

Luke Deshotels, University of Louisiana at Lafayette, USA

Chapter 7
Evolving Bots’ AI in Unreal™

Antonio M. Mora-García, University of Granada, Spain
Juan Julián Merelo-Guervós, University of Granada, Spain

Section 2
Game Physics

Chapter 8
Practical Introduction to Rigid Body Linear Complementary Problem (LCP) Constraint Solvers

Ben Kenwright, Newcastle University, UK
Graham Morgan, Newcastle University, UK

Chapter 9
Rocket Jump Mechanics for SideScrolling Platform Games

Golam Ashraf, National University of Singapore, Singapore
Ho Jie Hui, National University of Singapore, Singapore
Kenny Lim, National University of Singapore, Singapore
Esther Luar, National University of Singapore, Singapore
Luo Lan, National University of Singapore, Singapore

Section 3
Collision Detection in Games

Chapter 10
Collision Detection in Video Games

Benjamin Rodrigue, University of Louisiana at Lafayette, USA

Chapter 11
Collision Detection Using the GJK Algorithm

William N. Bittle, dyn4j.org, USA
Section 4
Game Models and Implementation

Chapter 12
Designing Multiplayer Online Games Using the Real-Time Framework ........................................ 290
Sergei Gorlatch, University of Muenster, Germany
Frank Glinka, University of Muenster, Germany
Alexander Ploss, University of Muenster, Germany
Dominik Meiländer, University of Muenster, Germany

Chapter 13
Modular Game Engine Design............................................................................................................ 322
Aaron Boudreaux, University of Louisiana at Lafayette, USA
Brandon Primeaux, University of Louisiana at Lafayette, USA

Chapter 14
A Gameplay Model for Understanding and Designing Games ......................................................... 342
Erik Hebisch, Institute of Human Factors and Technology Management IAT, University of Stuttgart, Germany
Ulrich Wechselberger, Institute for Computational Visualistics, University of Koblenz-Landau, Germany

Chapter 15
From a Game Story to a Real 2D Game .......................................................................................... 359
Chong-wei Xu, Kennesaw State University, USA
Daniel N. Xu, University of Wisconsin at Milwaukee, USA

Section 5
Serious Games

Chapter 16
Music Tutor Using Tower Defense Strategy.................................................................................... 391
Golam Ashraf, National University of Singapore, Singapore
Ho Kok Wei Daniel, National University of Singapore, Singapore
Kong Choong Yee, National University of Singapore, Singapore
Nur Aiysha Plemping, National University of Singapore, Singapore
Ou Guo Zheng, National University of Singapore, Singapore
Teo Chee Kern, National University of Singapore, Singapore
Chapter 17
Low Cost Immersive VR Solutions for Serious Gaming................................................................. 407
Damitha Sandaruwan, University of Colombo School of Computing, Sri Lanka
Nihal Kodikara, University of Colombo School of Computing, Sri Lanka
Chamath Keppitiyagama, University of Colombo School of Computing, Sri Lanka
Rexy Rosa, University of Colombo, Sri Lanka
Kapila Dias, University of Colombo School of Computing, Sri Lanka
Ranjith Senadheera, Sri Lanka Navy, Sri Lanka
Kanchana Manamperi, Sri Lanka Navy, Sri Lanka

Compilation of References ............................................................................................................. 430

About the Contributors ................................................................................................................ 444

Index............................................................................................................................................... 453
