Table of Contents

Preface..................................................................................................................................................xiv

Acknowledgment..................................................................................................................................xxiii

Section 1
PSO Algorithms

Chapter 1
Beyond Standard Particle Swarm Optimisation .................................................................................. 1
  Maurice Clerc, Independent Consultant, France

Chapter 2
Biases in Particle Swarm Optimization ............................................................................................20
  William M. Spears, Swarmotics LLC, USA
  Derek T. Green, University of Arizona, USA
  Diana F. Spears, Swarmotics LLC, USA

Chapter 3
Taguchi-Particle Swarm Optimization for Numerical Optimization ..............................................44
  T. O. Ting, HKUSpace Global College, China
  H. C. Ting, Tunku Abdul Rahman College, Malaysia
  T. S. Lee, Multimedia University, Malaysia

Chapter 4
Constraint Handling in Particle Swarm Optimization ........................................................................60
  Wen Fung Leong, Oklahoma State University, USA
  Gary G. Yen, Oklahoma State University, USA
Chapter 5
Adaptive Neuro-Fuzzy Control Approach Based on Particle Swarm Optimization
Gomaa Zaki El-Far, Menoufia University, Egypt

Chapter 6
Design of Multi-Criteria PI Controller Using Particle Swarm Optimization for Multiple UAVs Close Formation
Xiangyin Zhang, Beijing University of Aeronautics and Astronautics, China
Haibin Duan, Beijing University of Aeronautics and Astronautics, China
Shan Shao, Shenyang Aircraft Design and Research Institute, China
Yunhui Wang, Shenyang Aircraft Design and Research Institute, China

Chapter 7
Oscillation Damping Enhancement via Coordinated Design of PSS and FACTS-Based Stabilizers in a Multi-Machine Power System Using PSO
M. A. Abido, King Fahd University of Petroleum & Minerals, Saudi Arabia
Saleh M. Bamasak, Saudi Electricity Company, Saudi Arabia

Chapter 8
Compensation of Voltage Sags with Phase-Jumps through DVR with Minimum VA Rating Using PSO based ANFIS Controller
Anil Kumar Ramakuru, IIT MADRAS, India
Siva G. Kumar, IIT MADRAS, India
Kalyan B. Kumar, IIT MADRAS, India
Mahesh K. Mishra, IIT MADRAS, India

Chapter 9
Optimal Power Flow with TCSC and TCPS Modeling using Craziness and Turbulent Crazy Particle Swarm Optimization
P. K. Roy, National Institute of Technology
S. P. Ghoshal, National Institute of Technology
S. S. Thakur, National Institute of Technology

Chapter 10
Congestion Management Using Hybrid Particle Swarm Optimization Technique
Sujatha Balaraman, Government College of Engineering, India
N. Kamaraj, Thiagarajar College of Engineering, India

Chapter 11
Particle Swarm Optimization Algorithms Inspired by Immunity-Clonal Mechanism and Their Applications to Spam Detection
Ying Tan, Peking University, China
Section 2
Other Algorithms

Chapter 12
Unit Commitment by Evolving Ant Colony Optimization ................................................................. 207
K. Vaisakh, Andhra University, India
L. R. Srinivas, S.R.K.R. Engineering College, India

Chapter 13
Bacterial Foraging Optimization ........................................................................................................ 219
Kevin M. Passino, The Ohio State University, USA

Chapter 14
Networks Do Matter: The Socially Motivated Design of a 3D Race Controller
using Cultural Algorithms .................................................................................................................. 235
Robert G. Reynolds, Wayne State University, USA
Leonard Kinniard-Heether, Wayne State University, USA

Chapter 15
Honey Bee Swarm Cognition: Decision-Making Performance and Adaptation ................................ 258
Kevin M. Passino, Ohio State University, USA

Chapter 16
A Theoretical Framework for Estimating Swarm Success Probability Using Scouts ....................... 277
Antons Rebguns, The University of Wyoming, USA
Diana Spears, Swarmotics LLC, USA
Richard Anderson-Sprecher, University of Wyoming, USA
Aleksey Kletsov, East Carolina University, USA

Chapter 17
Distributed Multi-Agent Systems for a Collective Construction Task based on
Virtual Swarm Intelligence ................................................................................................................ 308
Yan Meng, Stevens Institute of Technology, USA
Yaochu Jin, University of Surrey, UK

Compilation of References ................................................................................................................ 331

About the Contributors ....................................................................................................................... 354

Index ................................................................................................................................................. 360
