Table of Contents

Preface ................................................................................................................................. xv

Acknowledgment ................................................................................................................ xxiii

Chapter 1
Fuzzy C-Means in High Dimensional Spaces ................................................................. 1
  Roland Winkler, German Aerospace Center, Germany
  Frank Klawonn, Ostfalia University, Germany
  Rudolf Kruse, Otto-von-Guericke University, Germany

Chapter 2
Fuzzy Cluster Validation Based on Fuzzy PCA-Guided Procedure ............................ 17
  K. Honda, Osaka Prefecture University, Japan
  A. Notsu, Osaka Prefecture University, Japan
  T. Matsui, Osaka Prefecture University, Japan
  H. Ichihashi, Osaka Prefecture University, Japan

Chapter 3
A Fuzzy Clustering Model for Fuzzy Data with Outliers ........................................... 29
  M. H. Fazel Zarandi, Amirkabir University of Technology, Iran
  Zahra S. Razaee, Amirkabir University of Technology, Iran

Chapter 4
A New Efficient and Effective Fuzzy Modeling Method for Binary Classification .......... 41
  T. Warren Liao, Louisiana State University, USA

Chapter 5
On Possibilistic and Probabilistic Information Fusion ................................................. 60
  Ronald R. Yager, Iona College, USA

Chapter 6
Applying a Fuzzy and Neural Approach for Forecasting the Foreign Exchange Rate .......... 73
  Toly Chen, Feng Chia University, Taiwan
Chapter 7
A Novel Fuzzy Associative Memory Architecture for Stock Market Prediction and Trading .......... 87
  Chai Quek, Nanyang Technological University, Singapore
  Zaiyi Guo, Nanyang Technological University, Singapore
  Douglas L. Maskell, Nanyang Technological University, Singapore

Chapter 8
Hand Gesture Recognition Using Multivariate Fuzzy Decision Tree and User Adaptation .......... 105
  Moon-Jin Jeon, Korea Aerospace Research Institute, Korea
  Sang Wan Lee, Massachusetts Institute of Technology, USA
  Zeungnam Bien, Ulsan National Institute of Science and Technology, Korea

Chapter 9
Gesture Spotting Using Fuzzy Garbage Model and User Adaptation ........................................ 120
  Seung-Eun Yang, Korea Aerospace Research Institute, Korea
  Kwang-Hyun Park, Kwangwoon University, Korea
  Zeungnam Bien, Ulsan National Institute of Science and Technology, Korea

Chapter 10
Indirect Adaptive Fuzzy Control for a Class of Uncertain Nonlinear Systems with Unknown Control
  Direction ............................................................................................................................................ 139
  Salim Labiod, University of Jijel, Algeria
  Hamid Boubertakh, University of Jijel, Algeria
  Thierry Marie Guerra, Université de Valenciennes et du Hainaut-Cambrésis, France

Chapter 11
Approximated Simplest Fuzzy Logic Controlled Shunt Active Power Filter for Current Harmonic
  Mitigation ........................................................................................................................................... 155
  Rambir Singh, Motilal Nehru National Institute of Technology, India
  Asheesh K. Singh, Motilal Nehru National Institute of Technology, India
  Rakesh K. Arya, M. P. Council of Science and Technology, India

Chapter 12
Semidefinite Programming-Based Method for Implementing Linear Fitting to Interval-Valued
  Data ................................................................................................................................................... 172
  Minghuang Li, Beijing Normal University, China
  Fusheng Yu, Beijing Normal University, China

Chapter 13
System Identification Based on Dynamical Training for Recurrent Interval Type-2 Fuzzy Neural
  Network ....................................................................................................................................... 188
  Tsung-Chih Lin, Feng Chia University, Taiwan
  Yi-Ming Chang, Feng Chia University, Taiwan
  Tun-Yuan Lee, Feng Chia University, Taiwan
Chapter 14
Integrated Circuit Emission Model Extraction with a Fuzzy Logic System ........................................ 206
Tsung-Chih Lin, Feng Chia University, Taiwan
Ming-Jen Kuo, Feng Chia University, Taiwan
Alexandre Boyer, University of Toulouse, France

Chapter 15
Optimizing the Performance of Plastic Injection Molding Using Weighted Additive Model in Goal Programming................................................................. 218
Abbas Al-Refaie, University of Jordan, Jordan
Ming-Hsien Li, Feng Chia University, Taiwan

Chapter 16
Modelling the Long-Term Cost Competitiveness of a Semiconductor Product with a Fuzzy Approach................................................................................................................ 230
Toly Chen, Feng Chia University, Taiwan

Chapter 17
Extension of the TOPSIS for Multi-Attribute Group Decision Making under Atanassov IFS Environments .................................................................................................................. 241
Deng-Feng Li, Fuzhou University, China
Jiang-Xia Nan, Guilin University of Electronic Technology, China

Chapter 18
Applying the Linguistic Strategy-Oriented Aggregation Approach to Determine the Supplier Performance with Ordinal and Cardinal Data Forms ......................................................... 256
Shih-Yuan Wang, Jinwen University of Science and Technology, Taiwan
Sheng-Lin Chang, China University of Science and Technology, Taiwan
Reay-Chen Wang, Tunghnan University, Taiwan

Compilation of References ..................................................................................................................... 272

About the Contributors .......................................................................................................................... 293

Index .................................................................................................................................................. 301
