Table of Contents

Volume I

Section 1
Fundamental Concepts and Theories

This section serves as a foundation for this exhaustive reference tool by addressing underlying principles essential to the understanding of Digital Literacy. Chapters found within these pages provide an excellent framework in which to position Digital Literacy within the field of information science and technology. Insight regarding the critical incorporation of global measures into Digital Literacy is addressed, while crucial stumbling blocks of this field are explored. With 10 chapters comprising this foundational section, the reader can learn and choose from a compendium of expert research on the elemental theories underscoring the Digital Literacy discipline.

Chapter 1

Kelvin Joseph Bwalya, University of Botswana, Botswana & University of Johannesburg, South Africa
Tanya Du Plessis, University of Johannesburg, South Africa
Chris Rensleigh, University of Johannesburg, South Africa

Chapter 2
Information Literacy and the Digital Divide: Challenging E-Exclusion in the Global South

Hopeton S. Dunn, University of the West Indies, Jamaica

Chapter 3
Explaining the Global Digital Divide: The Impact of Public Policy Initiatives on E-Government Capacity and Reach Worldwide

Girish J. Gulati, Bentley University, USA
David J. Yates, Bentley University, USA
Anas Tawileh, Cardiff University, UK
Chapter 4
Online Participation and Digital Divide: An Empirical Evaluation of U.S. Midwestern Municipalities .......................................................................................................................................................... 63
  Stephen K. Atkins, University of South Florida, USA
  Meena Chary, University of South Florida, USA

Chapter 5
The Digital Information Divide .......................................................................................................................................................................................... 86
  Randall McClure, Georgia Southern University, USA

Chapter 6
Millennials are Digital Natives? An Investigation into Digital Propensity and Age ................................................................. 103
  Boaventura DaCosta, Solers Research Group, USA
  Carolyn Kinsell, Solers Research Group, USA
  Angelique Nasah, Solers Research Group, USA

Chapter 7
M-Learning and Y Generation: The Reality behind the Myth ......................................................................................................................... 120
  Melanie Ciussi, SKEMA Business School, France
  Gill Rosner, SKEMA Business School, France
  Marc Augier, SKEMA Business School, France
  Gabriele Suder, SKEMA Business School, France

Chapter 8
Low Usage of Intelligent Technologies by the Aged: New Initiatives to Bridge the Digital Divide ........................................................................ 135
  John Heng, Nanyang Technological University, Singapore
  Subhasis Banerji, Nanyang Technological University, Singapore

Chapter 9
Online Literacy among Students and Faculty: A Comparative Study between the United States and Eastern European Countries ........................................................................................................................................................................... 154
  Plamen Miltenoff, St. Cloud State University, Minnesota, USA
  John H. Hoover, St. Cloud State University, Minnesota, USA
  Galin Tzokov, Paisii Khilendarski University, Bulgaria

Chapter 10
The Global Digital Divide and Its Impact on E-Governance ......................................................................................................................... 175
  Michael Howell-Moroney, University of Alabama at Birmingham, USA
Section 2
Development and Design Methodologies

This section provides in-depth coverage of conceptual architecture frameworks to provide the reader with a comprehensive understanding of the emerging developments within the field of Digital Literacy. Research fundamentals imperative to the understanding of developmental processes within Digital Literacy are offered. From broad examinations to specific discussions on methodology, the research found within this section spans the discipline while offering detailed, specific discussions. From basic designs to abstract development, these chapters serve to expand the reaches of development and design technologies within the Digital Literacy community. This section includes 12 contributions from researchers throughout the world on the topic of Digital Literacy.

Chapter 11
A Framework for Digital Competence Assessment

Antonio Cartelli, University of Cassino, Italy

Chapter 12
A Process Model for Successful E-Government Adoption in the Least Developed Countries: A Case of Bangladesh

Ahmed Imran, The Australian National University, Australia
Shirley Gregor, The Australian National University, Australia

Chapter 13
Sustainable Development and the Digital Divide Among OIC Countries: Towards a Collaborative Digital Approach

Chamhuri Siwar, National University of Malaysia, Malaysia
Abdul-Mumin Abdulai, National University of Malaysia, Malaysia

Chapter 14
Creating a Personalized Artificial Intelligence Course: WELSA Case Study

Elvira Popescu, University of Craiova, Romania
Costin Bădică, University of Craiova, Romania

Chapter 15
Conceptualizing a Contextual Measurement for Digital Divide/s: Using an Integrated Narrative

Karine Barzilai-Nahon, University of Washington, USA
Ricardo Gomez, University of Washington, USA
Rucha Ambikar, The Center for Information & Society, USA

Chapter 16
The Empirics of the Digital Divide: Can Duration Analysis Help?

Wei-Min Hu, Peking University HSBC School of Business, China
James E. Prieger, Pepperdine University, USA
Chapter 17
Perusing E-Readiness and Digital Divide: From a Critical View .......................................................... 313
Mohammad Reza Hanafizadeh, Islamic Azad University, Iran
Payam Hanafizadeh, Allameh Tabataba’i University, Iran
Abbas Saghaei, Islamic Azad University, Iran

Chapter 18
Game Literacy: Assessing its Value for Both Classification and Public Perceptions of Games in a New Zealand Context .................................................................................................................. 347
Gareth Schott, University of Waikato, New Zealand
Neil Selwyn, London Knowledge Lab, UK

Chapter 19
Policy as a Bridge across the Global Digital Divide .............................................................................. 364
Meena Chary, University of South Florida, USA
Stephen K. Aikins, University of South Florida, USA

Chapter 20
Exclusiveness vs. Inclusiveness in Software Development: The Triple-Loop-Learning Approach ............................................................................................................................... 380
Edeltraud Hanappi-Egger, WU Vienna University of Economics and Business, Austria

Chapter 21
Developing and Managing Digital/Technology Literacy and Effective Learning Skills in Adult Learners ........................................................................................................................................... 394
Jeffrey Hsu, Fairleigh Dickinson University, USA
Zhongxian Wang, Montclair State University, USA
Karin Hamilton, Fairleigh Dickinson University, USA

Chapter 22
Intelligent M-Learning Frameworks: Information and Communication Technology Applied in a Laptop Environment ........................................................................................................... 414
Hazel Owen, Unitec, New Zealand

Section 3
Tools and Technologies

This section presents an extensive coverage of various tools and technologies available in the field of Digital Literacy that practitioners and academicians alike can utilize to develop different techniques. These chapters enlighten readers about fundamental research on the many tools facilitating the burgeoning field of Digital Literacy. It is through these rigorously researched chapters that the reader is provided with countless examples of the up-and-coming tools and technologies emerging from the field of Digital Literacy. With 12 chapters, this section offers a broad treatment of some of the many tools and technologies within the Digital Literacy field.
Chapter 23
Bringing the Internet to the Rural Area: A Case Study of the ‘KedaiKom’ Project in Malaysia
Zulkefli bin Ibrahim, University of Malaya, Malaysia
Ainin Sulaiman, University of Malaya, Malaysia
Tengku M. Faziharudean, University of Malaya, Malaysia

Chapter 24
Children’s Maps in GIS: A Tool for Communicating Outdoor Experiences in Urban Planning
Kerstin Nordin, Swedish University of Agricultural Sciences, Sweden
Ulla Berglund, Swedish University of Agricultural Sciences, Sweden

Chapter 25
ICT for Digital Inclusion: A Study of Public Internet Kiosks in Mauritius
L.G. Pee, Tokyo Institute of Technology, Japan
A. Kankanahalli, National University of Singapore, Singapore
V.C.Y. On Show, National University of Singapore, Singapore

Chapter 26
Guidelines for Successful Public Internet Access Points (PIAPs) Implementation
Ali Arifoğlu, METU Informatics Institute, Turkey
Gülgün Afacan, METU Informatics Institute, Turkey
Erkan Er, METU Informatics Institute, Turkey

Chapter 27
Effortless Data Capture for Ambient E-Services with Digital Pen and Paper Technology
Leili Lind, Linköping University & Santa Anna IT Research Institute, Sweden
Aseel Berglund, Saab Aerosystems, Sweden
Erik Berglund, Linköping University & Santa Anna IT Research Institute, Sweden
Magnus Bång, Linköping University & Santa Anna IT Research Institute, Sweden
Sture Hägglund, Linköping University & Santa Anna IT Research Institute, Sweden

Chapter 28
Digital Cities: Towards Connected Citizens and Governance
Leonidas Anthopoulos, TEI Larissa, Greece
Panos Fitsilis, TEI Larissa, Greece

Chapter 29
Documenting Teachers and Students Experiences with Interactive Whiteboards in Ireland: Key Findings from an Irish Pilot Project
Miriam Judge, Dublin City University, Ireland

Chapter 30
Promoting Active Ageing through Technology Training in Korea
Donghee Han, Research Institute of Science for the Better Living of the Elderly, Korea
Kathryn L. Braun, University of Hawai`i, USA
Chapter 31
Towards Multimodal Mobile GIS for the Elderly
Julie Doyle, University College Dublin, Ireland
Michela Bertolotto, School of Computer Science and Informatics, Ireland
David Wilson, University of North Carolina at Charlotte, NC, USA

Volume II

Chapter 32
Integration of Educational Games in Synchronous Virtual Classroom: A Case Study
Eleni Rossiou, University of Macedonia, Greece

Chapter 33
Navigation and Visualisation Techniques in eLearning and Internet Research
Sue Fenley, University of Oxford, UK

Chapter 34
Pervasive Internet via Wireless Infrastructure-Based Mesh Networks
Nabanita Das, Indian Statistical Institute, India

Section 4
Utilization and Application

This section discusses a variety of applications and opportunities available that can be considered by practitioners in developing viable and effective Digital Literacy programs and processes. This section includes 12 chapters that review topics from case studies in Africa to best practices in Asia and ongoing research in the United States. Further chapters discuss Digital Literacy in a variety of settings (government, research, health care, etc.). Contributions included in this section provide excellent coverage of today’s IT community and how research into Digital Literacy is impacting the social fabric of our present-day global village.

Chapter 35
The Dynamics of Video Gaming: Influences Affecting Game Play and Learning
Sandra Schamroth Abrams, St. John’s University, USA

Chapter 36
Digital Divide and Rural Communities: Practical Solutions and Policies
John Garofalakis, Research Academic Computer Technology Institute, Greece
Andreas Koskeris, Research Academic Computer Technology Institute, Greece

Chapter 37
Digital Divide in Turkey: A General Assessment
Mete Yildiz, Hacettepe University, Turkey
Chapter 38
Swedish Students Online: An Inquiry into Differing Cultures on the Internet ........................................ 735
Håkan Selg, Uppsala University, Sweden

Chapter 39
An Analysis of Prospective Teachers’ Digital Citizenship Behaviour Norms ........................................ 757
Mehmet Sincar, University of Gaziantep, Turkey

Chapter 40
Bridging the Digital Divide in Australia: The Potential Implications for the Mental Health of Young People Experiencing Marginalisation ................................................................. 772
Jane Burns, University of Melbourne, Australia
Michelle Blanchard, University of Melbourne, Australia
Atari Metcalf, Inspire Foundation, Australia

Chapter 41
The Changing World of ICT and Health: Crossing the Digital Divide .................................................. 794
Prajesh Chhanabhai, University of Otago, New Zealand
Alec Holt, University of Otago, New Zealand

Chapter 42
Gender Digital Divide and National ICT Policies in Africa ................................................................. 812
Violet E. Ikolo, Delta State University, Nigeria

Chapter 43
M. Selcan Kaynak, Boğaziçi University, Turkey

Chapter 44
India’s Dalits Search for a Democratic Opening in the Digital Divide ................................................. 852
P. Thirumal, University of Hyderabad, India
Gary Michael Tartakov, Iowa State University, USA

Chapter 45
An Ecological Approach to Instructional Design: The Learning Synergy of Interaction and Context .................................................................................................................. 872
Paul Resta, The University of Texas at Austin, USA
Debby Kalk, The University of Texas at Austin, USA

Chapter 46
A Case Study of Social Interaction on ANGEL and Student Authoring Skills ...................................... 890
Ruth Xiaoping Guo, Buffalo State College, State University of New York, USA
Section 5
Organizational and Social Implications

This section includes a wide range of research pertaining to the social and behavioral impact of Digital Literacy around the world. Chapters introducing this section critically analyze and discuss trends in Digital Literacy, such as participation, attitudes, and organizational change. Additional chapters included in this section look at ICT policies and the internal digital divide within organizations. Also investigating a concern within the field of Digital Literacy is research which discusses the effect of trust on Digital Literacy. With 12 chapters, the discussions presented in this section offer research into the integration of global Digital Literacy as well as implementation of ethical and workflow considerations for all organizations.

Chapter 47
Citizens and E-Government Service Delivery: Techniques to Increase Citizen Participation .......... 910
Jennifer A. Kurtz, Conundrum Creek Consulting, USA
Roland J. Cole, Sagamore Institute for Policy Research, USA
Isabel A. Cole, Independent Librarian, USA

Chapter 48
American Digital Divides: Generation, Education, Gender, and Ethnicity in American Digital Divides ................................................................................................................................................................................. 932
Susan Carol Losh, Florida State University, USA

Chapter 49
School in the Knowledge Society: A Local Global School .......................................................... 959
Birgitte Holm Sørensen, Aarhus University, Denmark
Karin Levinsen, Aarhus University, Denmark

Chapter 50
Caste, Class, and IT in India ........................................................................................................... 976
Elizabeth Langran, Fairfield University, USA

Chapter 51
Digital Divide and Disadvantaged Populations in E-Tourism ....................................................... 995
Billy Yfantis, University of the West of Scotland, UK
Abel Usoro, University of the West of Scotland, UK
Dimitris Tseles, Technological Education Institute of Piraeus, Greece

Chapter 52
E-Learning Challenges for Polytechnic Institutions: Bringing E-Mobility to Hands-on Learning ............................................................................................................................................... 1008
Martha Burkle, SAIT Polytechnic, Canada
Chapter 53
Collaborative Information Behavior in Completely Online Groups.................................................. 1026
    Sean Goggins, Drexel University, USA
    Sanda Erdelez, University of Missouri, USA

Chapter 54
Public Participation in E-Government: Some Questions about Social Inclusion in the Singapore Model............................................................................................................................................ 1044
    Scott Baum, Griffith University, Australia
    Arun Mahizhnan, National University of Singapore, Singapore

Chapter 55
Gender Evaluation of Rural E-Governance in India: A Case Study of E-Gram Suraj (E-Rural Good Governance) Scheme ................................................................. 1059
    Saxena Anupama, Guru Ghasidas University, India

Chapter 56
ICT Use in Universities: An Educational Model for Digital Natives .................................................... 1075
    Ana Jimenez-Zarco, Universitat Oberta de Catalunya, Spain
    Maria Pilar Martínez-Ruiz, University of Castilla-La Mancha, Spain
    Virginia Barba-Sánchez, University of Castilla-La Mancha, Spain
    Alicia Izquierdo-Yusta, Universidad de Burgos, Spain

Chapter 57
Learning Applications for Disabled People .................................................................................................. 1090
    Athanasios Drigas, N.C.S.R. Demokritos, Greece
    Dimitris Kouremenos, N.C.S.R. Demokritos, Greece
    John Vrettaros, N.C.S.R. Demokritos, Greece

Chapter 58
Internal Digital Divide in Organizations................................................................................................. 1104
    Kerstin Grundén, University West, Sweden

Section 6
Managerial Impact

This section presents contemporary coverage of the social implications of Digital Literacy, more specifically related to the corporate and managerial utilization of information sharing technologies and applications, and how these technologies can be extrapolated to be used in Digital Literacy. Core ideas such as service delivery, gender evaluation, public participation, and other determinants that affect the intention to adopt technological innovations in Digital Literacy are discussed. Equally as crucial, chapters within this section discuss how leaders can utilize Digital Literacy applications to get the best outcomes from their governors and their citizens.
Chapter 59
Diffusion of Technology in Higher Education Classrooms: The Case of the Laptop

Jill Harrison, Brown University, USA
John Ryan, Virginia Tech, USA

Chapter 60
Catering to the Needs of the “Digital Natives” or Educating the “Net Generation”? 

Thomas Ryberg, Aalborg University, Denmark
Lone Dirckinck-Holmfeld, Aalborg University, Denmark
Chris Jones, The Open University, UK

Chapter 61
Innovation in Financing Mechanism of Information and Communication Technology (ICT)

Kunal, Indian Institute of Technology, Kanpur, India

Chapter 62

Helena Pereira da Silva, Federal University of Bahi, Brazil
Lídia de Jesus Oliveira Loureiro da Silva, University of Aveir, Portugal

Chapter 63
Empowering Students to be Scientifically Literate through Digital Literacy

Wan Ng, La Trobe University, Australia

Chapter 64
Authentic Tasks: The Key to Harnessing the Drive to Learn in Members of “Generation Me”

Thomas C. Reeves, The University of Georgia, USA
Jan Herrington, Murdoch University, Australia

Chapter 65
Governing Digital Divides: Power Structures and ICT Strategies in a Global Perspective

Francesco Amoretti, University of Salerno, Italy
Fortunato Musella, University of Naples “Federico II”, Italy

Chapter 66
E-Government Issues in Developing Countries: An Analysis from a Digital Divide, E-Skills, and Civil Conflict Theory Approach

Gohar Feroz Khan, YeungNam University, Republic of Korea
Junghoon Moon, Seoul National University, Republic of Korea
Chapter 67
Stakeholders and Power in Community-Based IT Projects: Examining the Role of Service Recipients

Rosemary Stockdale, Swinburne University of Technology, Australia
Chris Felstead, Swinburne University of Technology, Australia

Chapter 68
Addressing Social Inclusion via eDemocracy Applications: Which Role for Human Rights?

Evika Karamagioli, University Paris 8, France

Section 7
Critical Issues

This section contains 12 chapters, giving a wide variety of perspectives on Digital Literacy and its implications. Such perspectives include reading in privacy, gender, ethics, and several more. The section also discusses new ethical considerations within social constructivism and gender gaps. Within the chapters, the reader is presented with an in-depth analysis of the most current and relevant issues within this growing field of study. Crucial questions are addressed and alternatives offered, such as what makes up digital competence assessment, social issues, and psychological modeling.

Chapter 69
Social Equity, the Digital Divide and E-Governance: An Analysis of E-Governance Initiatives in India

Meena Chary, University of South Florida, USA

Chapter 70
Online Social Constructivism: Theory vs. Practice

Jennifer Ehrhardt, netuniversity.se, Sweden; University of West Florida, USA

Chapter 71
The Evolving Discourse of the Digital Divide: The Internet, Black Identity, and the Evolving Discourse of the Digital Divide

Lynette Kvasny, The Pennsylvania State University, USA
Kayla D. Hales, The Pennsylvania State University, USA

Chapter 72
Theory and Practice in Digital Competence Assessment

Antonio Cartelli, University of Cassino, Italy
Chapter 73
The Issues of Digital Natives and Tourists: Empirical Investigation of the Level of IT/IS Usage between University Students and Faculty Members in a Developing Economy................................. 1384
   Nwachukwu Prince Ololube, University of Education, Nigeria
   Samuel Amaele, University of Education, Nigeria
   Peter James Kpolovie, University of Port Harcourt, Nigeria
   Daniel Elemchukwu Egbezor, University of Port Harcourt, Nigeria

Chapter 74
A Psychological Model to Understand E-Adoption in the Context of the Digital Divide............ 1402
   Andrew Thatcher, University of the Witwatersrand, South Africa
   Mbongi Ndabeni, Rhodes University, South Africa

Chapter 75
Gender Gaps and Information and Communication Technology: A Case Study of India........... 1425
   Rekha Pande, University of Hyderabad, India

Chapter 76
Solving the Paradoxes of the Information Technology Revolution: Productivity and Inequality ................................................................................................................................. 1440
   Francesco D. Sandulli, Universidad Complutense de Madrid, Spain

Chapter 77
Social Issues and Web 2.0: A Closer Look at Culture in E-Learning........................................ 1456
   Bolanle A. Olaniran, Texas Tech University, USA
   Hansel Burley, Texas Tech University, USA
   Maiga Chang, Athabasca University, Canada

Chapter 78
Exploring the Notion of ‘Technology as a Public Good’: Emerging Characteristics and Trends of the Digital Divide in East Asian Education................................................................. 1472
   Sunnie Lee Watson, Ball State University, USA
   Thalia Mulvihill, Ball State University, USA

Chapter 79
Does the Digital Divide Extend to Minority- and Women- Owned Small Businesses? .............. 1489
   Robert Lerman, American University and The Urban Institute, USA
   Caroline Ratcliffe, The Urban Institute, USA
   Harold Salzman, Rutgers, USA
   Douglas Wissoker, The Urban Institute, USA
   Jennifer Meagher, Brandeis University, USA
Chapter 80
A Human Factors View of the Digital Divide

Kayenda T. Johnson, Virginia Tech, USA
Tonya L. Smith-Jackson, Virginia Tech, USA

Section 8
Emerging Trends

This section highlights research potential within the field of Digital Literacy while exploring uncharted areas of study for the advancement of the discipline. Introducing this section are chapters that set the stage for future research directions and topical suggestions for continued debate, centering on the new venues and forums for discussion. A pair of chapters on local government and the political makes up the middle of the section of the final 12 chapters, and the book concludes with a look ahead into the future of the Digital Literacy field, with “Toward a Roadmap to E-Government for a Better Governance.” In all, this text will serve as a vital resource to practitioners and academics interested in the best practices and applications of the burgeoning field of Digital Literacy.

Chapter 81
What Does it Mean to Bridge the Divide? Learning from Spontaneous Practices towards ICTs

Suely Fragoso, Universidade do Vale do Rio do Sinos (Unisinos), Brazil
Denise Cogo, Universidade do Vale do Rio do Sinos (Unisinos), Brazil
Liliane Dutra Brignol, Universidade do Vale do Rio do Sinos (Unisinos) & Centro Universitario Franciscano (Unifra), Brazil

Chapter 82
The Evolution of the Digital Divide across Developing Countries: Theoretical Issues and Empirical Investigation

Nicoletta Corrocher, Bocconi University, Italy
Anna Raineri, Valuelab, Italy

Chapter 83
Reducing Digital Divide: The Case of the ‘People First Network’ (PFNet) in the Solomon Islands

Anand Chand, University of the South Pacific, Fiji

Chapter 84
New Perspectives of Andragogy in Relation to the Use of Technology

Lesley Farmer, California State University, USA

Chapter 85
From the Digital Divide to Multiple Divides: Technology, Society, and New Media Skills

Francesca Comunello, Sapienza Università di Roma, Italy
Chapter 86
U3A Online and Successful Aging: A Smart Way to Help Bridge the Grey Digital Divide.............. 1640
  Rick Swindell, Griffith University, Australia
  Peter Grimbeek, Griffith University, Australia
  Jan Heffernan, Queensland University of Technology, Australia

Chapter 87
Bridging the Political Gap? The Adoption of ICTs for the Improvement of Latin American Parliamentary Democracy................................................................. 1658
  Yanina Welp, University of Zurich, Switzerland

Chapter 88
Beyond Digital Divide: Toward an Agenda for Change .......................................................... 1678
  Neil Selwyn, University of London, UK
  Keri Facer, Manchester Metropolitan University, UK

Chapter 89
The Gloss and the Reality of Teaching Digital Natives: Taking the Long View ......................... 1697
  Star A. Muir, George Mason University, USA

Chapter 90
Students, Internet, eLearning and Web 2.0 ............................................................................... 1720
  Rolf Schulmeister, University of Hamburg, Germany

Chapter 91
Shifting Focus from Access to Impact: Can Computers Alleviate Poverty? ............................. 1743
  Mona Dahms, Aalborg University, Denmark

Chapter 92
Toward a Roadmap to E-Government for a Better Governance Toward a Roadmap to E-Government for a Better Governance ......................................................... 1771
  Driss Kettani, Al Akhawayn University, Morocco
  Bernard Moulin, Laval University, Canada
  Asmae El Mahdi, Al Akhawayn University, Morocco
