## Section 1
### Key Trends in Serious Games for Healthcare

**Chapter 1**  
Virtual Worlds in Healthcare: Applications and Implications .......................................................... 1  
*Wm. LeRoy Heinrichs, Stanford University School of Medicine, USA*  
*Dick Davies, Ambient Performance, UK*  
*Jack Davies, Fremantle Hospital and Health Service, Australia*

**Chapter 2**  
Healthcare Games and the Metaphoric Approach .................................................................................. 23  
*Catherine Lelardeux, University of Toulouse, France*  
& *University Jean-François Champollion, France*  
*Julian Alvarez, Université de Lille 1&3, France*  
*Thierry Montaut, University of Toulouse, France*  
& *University Jean-François Champollion, France*  
*Michel Galaup, University of Toulouse, France*  
*Pierre Lagarrigue, University of Toulouse, Institut Clément ADER France*  
& *University Jean-François Champollion, France*

**Chapter 3**  
Rehabilitation Gaming .............................................................................................................................. 50  
*Henk Herman Nap, Stichting Smart Homes, The Netherlands*  
*Unai Diaz-Orueta, INGEMA, Spain*

**Chapter 4**  
First-Person Shooter Game Engines and Healthcare: An Examination of the Current State of the Art and Future Potential ......................................................................................................................... 76  
*Christos Gatzidis, Bournemouth University, UK*
Section 2
Design and Development

Chapter 5
Ethics in the Design of Serious Games for Healthcare and Medicine ............................................. 91
  Pirashanthie Vivekananda-Schmidt, University of Sheffield, UK

Chapter 6
Difficulty and Scenario Adaptation: An Approach to Customize Therapeutic Games .................. 107
  Nadia Hocine, Montpellier II University, CNRS, France
  Abdelkader Gouaïch, Montpellier II University, CNRS, France

Chapter 7
Serious Game for Relationships and Sex Education: Application of an Intervention Mapping
Approach to Development .................................................................................................................... 135
  Katherine E Brown, Coventry University, UK
  Julie Bayley, Coventry University, UK
  Katie Newby, Coventry University, UK

Chapter 8
Nutrition Games .................................................................................................................................. 167
  Catherine Frederico, Frederico Arts LLC, USA

Chapter 9
Active Video Games: Potential for Increased Activity, Suggestions for Use, and Guidelines for
Implementation ........................................................................................................................................ 191
  Barbara Chamberlin, New Mexico State University Learning Games Lab, USA
  Ann Maloney, University of Massachusetts Medical School, USA
  Rachel R. Gallagher, New Mexico State University Learning Games Lab, USA
  Michelle L. Garza, New Mexico State University Learning Games Lab, USA

Chapter 10
The Role of the Researcher in Making Serious Games for Health ..................................................... 213
  Pamela M. Kato, University Medical Center Utrecht, The Netherlands

Section 3
Established Case Studies

Chapter 11
A Serious Game for On-the-Ward Infection Control Awareness Training: Ward Off Infection ........ 233
  Ian Dunwell, Serious Games Institute, UK
  Steve Jarvis, SELEX Systems Integration Ltd., UK
Chapter 12
Smart Phone Video Game Simulation of Parent-Child Interaction: Learning Skills for Effective Vegetable Parenting .......................................................... 247
  Tom Baranowski, Baylor College of Medicine, USA
  Teresia O’Connor, Baylor College of Medicine, USA
  Sheryl Hughes, Baylor College of Medicine, USA
  Alicia Beltran, Baylor College of Medicine, USA
  Janice Baranowski, Baylor College of Medicine, USA
  Theresa Nicklas, Baylor College of Medicine, USA
  Ester Sleddens, Maastricht University, The Netherlands
  Debbe Thompson, Baylor College of Medicine, USA
  Amy Shirong Lu, Indiana University, USA
  Richard Buday, Archimage Inc., USA

Chapter 13
SimBody: An Interactive Simulator for Health Education .................................................. 265
  Bruno Vidal, Instituto Superior Tecnico, Portugal
  João Madeiras Pereira, Instituto de Engenharia de Sistemas e Computadores Investigacao e Desenvolvimento em Lisboa, Instituto Superior Tecnico, Portugal
  Guilherme Santos, Zona Paradoxal, Portugal

Chapter 14
Improving the Identification of Medication Names by Increasing Phonological Awareness via a Language-Teaching Computer Game (Medicina) ................................................................. 283
  Amanda Müller, Flinders University, Australia

Compilation of References ............................................................................................. 296
