Interactive Digital Television: Technologies and Applications

Table of Contents

Foreword........................................................................................................................................vii

Preface................................................................................................................................................x

Section I:
Technologies and Applications

Chapter I
DynamicTV: The Long Tail Applied to Broadband-Broadcast Integration........... 1
Andrea Belli, Telecom Italia, Italy
Marina Geymonat, Telecom Italia, Italy
Monica Perrero, Telecom Italia, Italy
Rossana Simeoni, Telecom Italia, Italy
Monica Badella, Politecnico di Torino, Italy

Chapter II
Interactive Television as a Vehicle for Language Learning............................... 18
Lyn Pemberton, University of Brighton, UK
Sanaz Fallahkhair, University of Brighton, UK
Chapter III
A Hybrid Strategy to Personalize the Digital Television by Semantic Inference..........................................................................................................33
Yolanda Blanco-Fernández, E.T.S.E. Telecommunicación, Vigo, Spain
Jose J. Pazos-Arias, E.T.S.E. Telecommunicación, Vigo, Spain
Alberto Gil-Solta, E.T.S.E. Telecommunicación, Vigo, Spain
Manuel Ramos-Cabrera, E.T.S.E. Telecommunicación, Vigo, Spain
Martín López-Nores, E.T.S.E. Telecommunicación, Vigo, Spain

Chapter IV
An Approach for Delivering Personalized Advertisements in Interactive TV Customized to Both Users and Advertisers.................................52
Georgia K. Kastidou, University of Waterloo, Canada
Robin Cohen, University of Waterloo, Canada

Chapter V
Analysis and Development of an MHP Application for Live Event Broadcasting and Video Conferencing .....................................................74
Kristof Demeyere, Ghent University, Belgium
Tom Deryckere, Ghent University, Belgium
Mickiel Ide, Ghent University, Belgium
Luc Martens, Ghent University, Belgium

Chapter VI
Present and Future of Software Graphics Architectures for Interactive Digital Television ........................................................................................................91
Pablo Cesar, CWI: Centrum voor Wiskunde en Informatica, The Netherlands
Keith Baker, Philips Applied Technologies, The Netherlands
Dick Bulterman, CWI: Centrum voor Wiskunde en Informatica, The Netherlands
Luiz Fernando Gomes Soares, PUC-Rio, Brazil
Samuel Cruz-Lara, LORIA-INRIA Lorraine, Brazil
Annelies Kaptein, Stoneroos, The Netherlands

Chapter VII
Ambient Media and Home Entertainment ........................................................................112
Artur Lugmayr, Tampere University of Technology, Finland
Alexandra Pohl, Berlin-Brandenburg (rbb) Innovationsprojekte, Germany
Max Muehhaeuser, Technische Universitat Darmstadt, Germany
Jan Kallenbach, Helsinki University of Technology, Finland
Konstantinos Chorianopoulos, Bauhaus University of Weimar, Germany
Section II:
Interaction Design

Chapter VIII
The Use of ‘Stalking Horse’ Evaluation Prototypes for Probing DTV
Accessibility Requirements ................................................................. 131
  Mark V. Springett, Middlesex University, UK
  Richard N. Griffiths, University of Brighton, UK

Chapter IX
An Activity-Oriented Approach to Designing a User Interface for
Digital Television .................................................................................. 148
  Shang Hwa Hsu, National Chiao Tung University, Taiwan
  Ming-Hui Weng, National Chiao Tung University, Taiwan
  Cha-Hoang Lee, National Chiao Tung University, Taiwan

Chapter X
Long-Term Interaction: Supporting Long-Term Relationship in the
iTV Domain .......................................................................................... 169
  Christoph Haffner, University of Kiel, Germany
  Thorsten Völkel, University of Kiel, Germany

Chapter XI
Proven Interaction Design Solutions for Accessing and
Viewing Interactive TV Content Items ................................................. 184
  Tibor Kunert, Technical University of Ilmenau, Germany
  Heidi Krömker, Technical University of Ilmenau, Germany

Chapter XII
Guidelines for Designing Easy-to-Use Interactive Television Services:
Experiences from the ArviD Programme .............................................. 207
  Ari Ahonen, Technical Research Centre of Finland, Finland
  Laura Turkki, Adage Usability, Finland
  Marjukka Saarijärvi, Ministry of the Interior, Finland
  Maria Lahti, Technical Research Centre of Finland, Finland
  Tytti Virtanen, VTT Technical Research Centre of Finland, Finland

Chapter XIII
Text Editing in Digital Terrestrial Television:
A Comparison of Three Interfaces ...................................................... 224
  Arianna Iatrino, CSP Innovazione nelle ICT S.C. a r.l., Italy
  Sonia Modeo, CSP Innovazione nelle ICT S.C. a r.l., Italy

Chapter XIV
Getting the Big Picture on Small Screens:
Quality of Experience in Mobile TV .................................................. 242
  Hendrik Knoche, University of College London, UK
  M. Angela Sasse, University of College London, UK
Section III:
Business and Marketing Studies

Chapter XV
Time and Timing in Cross-Media Production:
A Case Study from Norwegian Television ............................................................... 262
Roel Puijk, Lillehammer University College, Norway

Chapter XVI
From ‘Flow’ to ‘Database’: A Comparative Study of the Uses of
Traditional and Internet Television in Estonia ....................................................... 281
Ravio Suni, University of Tartu, Estonia

Chapter XVII
Belgian Advertisers’ Perceptions of Interactive Digital TV as a
Marketing Communication Tool .............................................................................. 298
Verolien Cauberghe, Faculty of Applied Economics, University of Antwerp, Belgium
Patrick De Pelsmacker, Faculty of Applied Economics, University of Antwerp, Belgium

Chapter XVIII
Business Models with the Development of Digital iTV Services:
Exploring the Potential of the Next Transaction Market ........................................ 320
Margherita Pagani, Bocconi University, Italy

About the Contributors ............................................................................................. 339

Index ......................................................................................................................... 353
