# Table of Contents

Preface .................................................................................................................. xviii

## Section 1  
Past Informing the Future: Applied Geospatial Solutions

### Chapter 1  
Visualizing Plant Community Change Using Historical Records .......................... 1  
*Evelyn Brister, Rochester Institute of Technology, USA*  
*Elizabeth Hane, Rochester Institute of Technology, USA*  
*Karl Korfmacher, Rochester Institute of Technology, USA*

### Chapter 2  
Historical GIS as a Platform for Public Memory at Mammoth Cave National Park ............. 19  
*Katie Algeo, Western Kentucky University, USA*  
*Ann Epperson, Western Kentucky University, USA*  
*Matthew Brunt, Western Kentucky University, USA*

### Chapter 3  
Cultural Dasymetric Population Mapping with Historical GIS: A Case Study from the Southern Appalachians ................................................................. 38  
*George Towers, Concord University, USA*

### Chapter 4  
The Efficacy of Aerial Search During the Battle of Midway ........................................ 57  
*Denis J. Dean, University of Texas at Dallas, USA*

### Chapter 5  
Applied Geospatial Perspectives on the Rock Art of the Lake of the Woods Region of Ontario, Canada ................................................................. 77  
*John W. Norder, Michigan State University, USA*  
*Jon W. Carroll, Michigan State University, USA*
Chapter 6
Showing the Past: Integrating Cartographic Collections Through Virtual Map Rooms......................... 94

Willington Siabato, Technical University of Madrid, Spain
Alberto Fernández-Wyttenbach, Technical University of Madrid, Spain
Miguel-Ángel Bernabé-Poveda, Technical University of Madrid, Spain

Section 2
Emerging Methods in Applied Geospatial Research

Chapter 7
Relating Transportation Quality Indicators to Economic Conditions in the South-Central U.S. ..... 111

Jonathan C. Comer, Oklahoma State University, USA
Amy K. Graham, Oklahoma State University, USA
Stacey R. Brown, Oklahoma State University, USA

Chapter 8
A Neural Network for Modeling Multicategorical Parcel Use Change.............................................. 131

Kang Shou Lu, Towson University, USA
John Morgan III, Towson University, USA
Jeffery Allen, Clemson University, USA

Chapter 9
Rapid Evaluation of Arid Lands (REAL): A Methodology ................................................................. 143

Daniel P. Dugas, New Mexico State University, USA
Michael N. DeMers, New Mexico State University, USA
Janet C. Greenlee, New Mexico State University, USA
Walter G. Whitford, New Mexico State University, USA
Anna Klimaszewski-Patterson, New Mexico State University, USA

Chapter 10
A GIS Methodology for Assessing the Safety Hazards of Abandoned Mine Lands (AMLs):
Application to the State of Pennsylvania......................................................................................... 162

Timothy J. Dolney, Penn State University – Altoona, USA

Chapter 11
Using Volunteered Geographic Information to Assess the Spatial Distribution of West Nile Virus in Detroit, Michigan .............................................................. 185

Kevin P. McKnight, Michigan Department of Transportation & Michigan State University, USA
Joseph P. Messina, Michigan State University, USA
Ashton M. Shortridge, Michigan State University, USA
Meghan D. Burns, Montana Natural Heritage Program, USA
Bruce W. Pigozzi, Michigan State University, USA
Chapter 12
Research Commentary: Increasing the Flexibility of Legacy Systems .............................................. 198
   William L. Garrison, University of California at Berkeley, USA
   Barry Wellar, University of Ottawa and Wellar Consulting Inc., Canada
   Ross MacKinnon, University of Connecticut, USA
   William R. Black, Indiana University, USA
   Arthur Getis, San Diego State University, USA

Section 3
Teaching, Learning, and Geospatial Facilities and Resources

Chapter 13
Association of American Geographers Applied Geography Specialty Group 2009/2010:
A Year in Review .................................................................................................................................. 216
   Nairne Cameron, Algoma University, Canada

Chapter 14
Communities, Cartography and GIS: Enhancing Undergraduate Geographic Education
with Service Learning .................................................................................................................................. 222
   Timothy L. Hawthorne, Columbus State University, USA

Chapter 15
Colorado 14ers, Pixel by Pixel .................................................................................................................. 239
   Brandon J. Vogt, University of Colorado at Colorado Springs, USA

Chapter 16
Leveraging the Science of Geographic Information Systems .......................................................... 255
   Rick Bunch, University of North Carolina at Greensboro, USA
   Anna Tapp, University of North Carolina at Greensboro, USA
   Prasad Pathak, University of North Carolina at Greensboro, USA

Chapter 17
Case Study: Mississippi-Lungs ............................................................................................................. 262
   Stephen S. Young, Salem State University, USA
Section 4
Service Training in Global Earth Observation System of Systems (GEOSS)

Chapter 18
Sharing Environmental Data through GEOSS

Gregory Giuliani, University of Geneva and UNEP, Switzerland
Nicolas Ray, University of Geneva and UNEP, Switzerland
Stefan Schwarzer, UNEP, Switzerland
Andrea De Bono, University of Geneva and UNEP, Switzerland
Pascal Peduzzi, UNEP, Switzerland
Hy Dao, University of Geneva and UNEP, Switzerland
Jaap Van Woerden, UNEP, Switzerland
Ron Witt, UNEP, Switzerland
Martin Beniston, University of Geneva, Switzerland
Anthony Lehmann, University of Geneva and UNEP, Switzerland

Chapter 19
Formalizing Cross-Parameter Conditions for Geoprocessing Service Chain Validation

Daniel Fitzner, Fraunhofer IGD, Germany

Chapter 20
Target Evaluation and Correlation Method (TECM) as an Assessment Approach to Global Earth Observation System of Systems (GEOSS)

Samuel Epelbaum, Pace University, USA
Mo Mansouri, Stevens Institute of Technology, USA
Alex Gorod, Stevens Institute of Technology, USA
Brian Sauser, Stevens Institute of Technology, USA
Alexander Fridman, Russian Academy of Science, Russia

Chapter 21
The Columbia Regional Geospatial Service Center System: A Proven Model for the United States

P. R. Blackwell, Stephen F. Austin State University, USA
Darrel McDonald, Stephen F. Austin State University, USA
