Acknowledgment

The editors would like to express their gratitude and inspiration from a number of actors having worked with this anthology on Integrated Operations (IO).

First we would like to thank the Centre for Integrated Operations in the Oil industry, at the Norwegian University of Science and Technology (NTNU) in Trondheim, Norway. IO-centre management; Jon Lippe, Arild Nystad, Jon Kvalem, and Professor Jon Kleppe supported the idea that the time for an anthology on IO was now ripe. A substantial part of the papers have come from researchers that are associated with the IO centre, which is a core competence centre for IO globally. There are a number of persons that we want to thank because they have inspired us during the work with IO or have provided important input to our own thinking process.

We want to thank the professors John Henderson, Venkat Venkatraman, and Paul Carlile at Boston University for introducing us to the more general framework of capability development and capability platforms. Thanks also to Tony Edwards who has been a pioneer in applying the capability framework both in BP and the BG group. He introduced us to the Boston professors in the first place. Øyvind Mydland has been good discussion partner on IO for many years.

Thanks also to our increasingly global IO network, Claudio Lima, Ronald Knoppe, Michael Stundner, Mark Miller, Daniel Keely, and Michael Popham in particular.

At BI Norwegian Business School we would like to thank five years of graduate MsC that took their Master thesis work on IO. As well, we appraise the economical and promotional support given by BI Norwegian Business School, Department of Leadership and Organizational Behaviour.

Finally we would like to thank the many enthusiasts that have contributed with their share to make IO a reality; Adolfo Henriquez, Thore Langeland, Arne Sorknes Bye, Paul Hocking, Trond Lilleng, Roy Rusaa, Svein Omdal, Geir Gramvik, and many others.

Thanks also to IGI Global that saw the potential in the anthology, Myla Merkel in particular.

Tom Rosendahl
BI Norwegian Business School, Norway
