# Table of Contents

Preface

# Chapter 1

Conceptualizing ICT

- Introduction
- Conceptualizing Technology
- Conceptualizing Information Communication

# Chapter 2

Articulating Design Education

- Introduction
- Design as Creativity
- Design as Social Ethics
- Design as Mastery of ICT

# Chapter 3

Architects and Engineers

- Introduction
- Architects
- Engineers
- Comparing Architects and Engineers
- Architects, Engineers, and ICT

# Chapter 4

Pedagogy and Curriculum in Architecture and Engineering

- Introduction
- Discourses of Curriculum
- How to Read a Curriculum
- Two Recent Champions of Constructivist Pedagogy
- If Not Science, What about Art?
- A New Paradigm?
- Virtual Learning Environments
- Summing Up These Observations about Design Pedagogy
Chapter 5
The Design Studio ................................................................. 93
Introduction........................................................................... 93
A Description of the Design Studio....................................... 94
The Problem with Design Studio Culture........................... 96
The Call to Reform the Design Studio.................................. 98
Reform from the Point of View of Students.......................... 107

Chapter 6
Reviewing Engineers and Introducing Industrial Designers.... 111
Introduction........................................................................... 111
The Argument of the Book So Far....................................... 113
The Ongoing Problem with Engineering Education............. 124
The Case of Industrial Designers........................................ 129

Chapter 7
Professionalism in Architecture and Engineering................ 137
Introduction........................................................................... 137
Professionalism Examined.................................................. 138
A Brief History of Architectural and Engineering Professionalism 139
Professionalism Conceptualized........................................... 146
The Attack on Professionalism............................................. 149
Teaching Professionalism in the New Climate of Mistrust...... 151
A Note on Professionalism and Social Identity..................... 153

Chapter 8
Complexity Theory Revisited.............................................. 157
Introduction........................................................................... 157
A Brief History of Complexity Theory................................. 161
Complexity Theory and Design: A Brief Summation............. 173

Chapter 9
Design and Virtual Reality.................................................. 177
Preliminary Concerns about Virtual World Technology......... 177
Viewing Avatars in the Light of Pedagogical Theories............ 185
The Virtual Design Studio................................................... 188
Virtual Space......................................................................... 190
The Importance of Drawing to Design................................ 193
Concluding Reflections....................................................... 195
### Chapter 10
ICT and Imagination ................................................................. 198
  What Good are ICTs to Design? .................................................. 198
  What is Imagination? ................................................................. 201
  Summing Up Imagination........................................................... 208
  ICT and Imagination ................................................................. 210
  Concluding Reflections ............................................................. 213

Epilogue ..................................................................................... 216

Compilation of References ....................................................... 220

About the Author ....................................................................... 234

Index ........................................................................................ 235
