# Table of Contents

Preface.................................................................................................................................................. xv

**Chapter 1**
Evaluation of Information Strategy Implementation: A Critical Approach ................................. 1
  * Yongmei Bentley, University of Bedfordshire Business School, UK  
  * Steve Clarke, University of Hull Business School, UK

**Chapter 2**
The Value of TAM Antecedents in Global IS Development and Research .................................. 19
  * Chad Anderson, Georgia State University, USA  
  * Said S. Al-Gahtani, King Khalid University, Saudi Arabia  
  * Geoffrey S. Hubona, Virginia Commonwealth University, USA

**Chapter 3**
In or Out: An Integrated Model of Individual Knowledge Source Choice...................................... 40
  * Yinglei Wang, Acadia University, Canada  
  * Darren B. Meister, The University of Western Ontario, Canada  
  * Peter H. Gray, University of Virginia, USA

**Chapter 4**
Developers, Decision Makers, Strategists or Just End-Users? Redefining End-User Computing for the 21st Century: A Case Study................................................................. 61
  * Sandra Barker, University of South Australia, Australia  
  * Brenton Fiedler, University of South Australia, Australia

**Chapter 5**
Expert and Novice End-User Spreadsheet Debugging: A Comparative Study of Performance and Behaviour.............................................................................................................................................. 77
  * Brian Bishop, Dundalk Institute of Technology, Ireland  
  * Kevin McDaid, Dundalk Institute of Technology, Ireland
Chapter 6
Exploring the Dimensions and Effects of Computer Software Similarities in Computer Skills Transfer ................................................................. 99
  Yuan Li, Columbia College, USA
  Kuo-Chung Chang, Yuan Ze University, Taiwan

Chapter 7
Preparing IS Students for Real-World Interaction with End Users Through Service Learning: A Proposed Organizational Mode .......................................................... 119
  Laura L. Hall, University of Texas at El Paso, USA
  Roy D. Johnson, University of Pretoria, South Africa

Chapter 8
Construct Validity Assessment in IS Research: Methods and Case Example of User Satisfaction Scale .................................................................................. 134
  Dewi Rooslad Tojib, Monash University, Australia
  Ly-Fie Sugianto, Monash University, Australia

Chapter 9
A Social Capital Perspective on IT Professionals’ Work Behavior and Attitude .................... 160
  Lixuan Zhang, Augusta State University, USA
  Mary C. Jones, University of North Texas, USA

Chapter 10
Gender Differences in E-Learning: Communication, Social Presence, and Learning Outcomes ...... 175
  Richard D. Johnson, University at Albany – SUNY, USA

Chapter 11
Participation in ICT-Enabled Meetings ............................................................................. 192
  Katherine M. Chudoba, Utah State University, USA
  Mary Beth Watson-Manheim, University of Illinois, Chicago, USA
  Kevin Crowston, Syracuse University, USA
  Chei Sian Lee, Nanyang Technological University, Singapore

Chapter 12
Understanding User Dissatisfaction: Exploring the Role of Fairness in IT-Enabled Change .......... 215
  Tim Klaus, Texas A&M University – Corpus Christi, USA

Chapter 13
Antecedents of Improvisation in IT-Enabled Engineering Work ........................................... 242
  William J. Doll, The University of Toledo, USA
  Xiaodong Deng, Oakland University, USA
Chapter 14
The Role of Computer Attitudes in Enhancing Computer Competence in Training

James P. Downey, University of Central Arkansas, USA
Lloyd A. Smith, Missouri State University, USA

Chapter 15
Development of a Mesh Generation Code with a Graphical Front-End: A Case Study

Jeffrey Carver, University of Alabama, USA

Chapter 16
Characterizing Data Discovery and End-User Computing Needs in Clinical Translational Science

Parmit K. Chilana, University of Washington, USA
Elishema Fishman, University of Washington, USA
Estella M. Geraghty, University of California, Davis, USA
Peter Tarczy-Hornoch, University of Washington, USA
Fredric M. Wolf, University of Washington, USA
Nick R. Anderson, University of Washington, USA

Chapter 17
Computational Engineering in the Cloud: Benefits and Challenges

Lorin Hochstein, USC Information Sciences Institute, USA
Brian Schott, Nimbis Services, USA
Robert B. Graybill, USC Information Sciences Institute, USA

Chapter 18
Scientific End-User Developers and Barriers to User/Customer Engagement

Judith Segal, The Open University, UK
Chris Morris, STFC Daresbury Laboratory, UK

Chapter 19
An Analysis of Process Characteristics for Developing Scientific Software

Diane Kell, Royal Military College of Canada, Canada
