Acknowledgment

I have taken efforts in this project. However, it would not have been possible without the kind support and help of many people. I would like to extend my sincere thanks to all of them.

I would like first to thank all contributing authors for their effort in both writing and reviewing chapters. The completion of this book would have been impossible without their effort and commitment. Thank you all for making this pledge fruitful and useful to system diagnostic and prognostic community.

Second, I would like to thank all IGI Global publishing team members who assisted me during this process. In particular, I would like to thank Hannah Abelbeck who assisted me administratively during all stages of this project.

My gratitude should go also to my teachers, especially Professor Alaa Chateauneuf, Professor Khaled El-Tawil, Professor Ahmad Jammal, Professor Khaled Smaily, and Mohamed Smaily.

Finally, yet importantly, I would like to express my heartfelt thanks to my beloved family for their blessings, and my colleagues for their help and wishes for the successful completion of this project.
