Acknowledgment

Successful publication of an edited reference book is quite impossible without a collective effort. We would like to gratefully acknowledge the selfless support of people who extended their hands to help us to make this project successful. First of all, we sincerely thank the chapter authors for their invaluable contributions to this endeavor. Without their disciplined support and effort, this book project would not have been accomplished. In addition, many thanks go to the Editorial Advisory Board members: Sandra Maria Correia Loureiro, Demetris Vrontis, Gianpaolo Basile, Evangelos Tsoukatos, Bernd Britzelmaier, Saroj Kumar Datta, Michael R. Czinkota, and Claudio Vignali for their precious academic advice in selecting and reviewing the chapters in the manuscript and providing constructive comments. Furthermore, we would like to express our gratitude to all other subject experts for volunteering in the chapter review process. We would like to acknowledge the friendly and supportive role of the editorial staff of IGI Global, especially Myla Merkel, who offered relentless support in different stages of the manuscript development, from the book proposal acquisition to the final manuscript development. Last, but definitely not least, we are indebted to all our family members for their continuous encouragement and inspiration to make this project a success.
