Acknowledgment

With gratitude and respect we thank the following people, without whom the book would not have come to a successful completion. To our publisher, IGI Global, that supported this project, and particularly to Myla Merkel, who provided constant support during this creative and challenging process.

To Ignacio Arellano for agreeing to pen the foreword, allowing us to take advantage of his years of professional experience and insight in the business management field (Thank you again for being such a great person and outstanding professional).

We also wish to thank all the authors for their insights and excellent contributions to this book. They have shared with us their priceless expertise, carrying out an excellent work. Thank you to all of you for helping us to spread your knowledge about how ICT may contribute to the development of social enterprises and their social mission.

A special note of thanks to our anonymous reviewers who were so kind as to share their expertise in a reviewing role, showing their commitment to producing a high quality book. Whatever the weaknesses of this book, they would have been far greater without the kind help of our colleague Araceli Rodríguez-Merayo who went through the entire manuscript asking questions all the way.

To all those working to expand and enhance scientific knowledge in the field of social enterprise and ICT, and who are contributing to the development of guidelines to achieve more efficient and effective management.

And last but not least, (from Teresa) to my husband, Jordi, and to my sons, Arnau and Jordi, who have made my life a fascinating journey. And (from Arantxa) to her husband Jordi and her daughters, Júlia and Leire, for their continual love and support.
