Table of Contents

Volume I

Section 1
Fundamental Concepts and Theories

This section serves as a foundation for this exhaustive reference tool by addressing underlying principles essential to the understanding of User-Driven Healthcare. Chapters found within these pages provide an excellent framework in which to position User-Driven Healthcare within the field of information science and technology. Insight regarding the critical incorporation of global measures into User-Driven Healthcare is addressed, while crucial stumbling blocks of this field are explored. With 13 chapters comprising this foundational section, the reader can learn and choose from a compendium of expert research on the elemental theories underscoring the User-Driven Healthcare discipline.

Chapter 1
The User Driven Learning Environment ................................................................. 1
Rakesh Biswas, People's College of Medical Sciences, India
Joachim Sturmberg, Monash University and The University of Newcastle, Australia
Carmel M. Martin, Trinity College Dublin, Ireland

Chapter 2
Information Technology and Resistance to Public Sector Reforms: A Case Study in Kenya .............. 14
Roberta Bernardi, University of Warwick, UK

Chapter 3
Electronic Health Record: Adoption, Considerations and Future Direction..................................... 34
Janine R. A. Kamath, Mayo Clinic, USA
Amerett L. Donahoe-Anshus, Mayo Clinic, USA

Chapter 4
The Promises and Challenges of Health Information Technology ............................................. 57
Brian Gugerty, Gugerty Consulting, LLC, USA
Michael J. Maranda, Evaluation Researcher, Belgium
Chapter 5
Patient Centered Medicine and Technology Adaptation ................................................................. 77
Brett Harnett, University of Cincinnati, USA

Chapter 6
Technology as a Bridge between Health Care Systems and Older Adults ........................................ 99
Daniel Morrow, University of Illinois at Urbana-Champaign, USA
Jessie Chin, University of Illinois at Urbana-Champaign, USA

Chapter 7
The Health Informatics Professional .................................................................................................. 120
Keith Lui, The University of Western Australia, Australia

Chapter 8
Supporting Family-Based Care for Aged Patients with Chronic Illness ......................................... 142
Lemai Nguyen, Deakin University, Australia

Chapter 9
Human-Centered Design for Health Information Technology: A Qualitative Approach .................. 158
Charlotte Tang, University of Calgary, Canada
Sheelagh Carpendale, University of Calgary, Canada

Chapter 10
Online Health Communities and Health Literacy: Applying a Framework for Understanding Domains of Health Literacy ................................................................. 180
Erin Willis, University of Memphis, USA
Ye Wang, University of Missouri – Kansas City, USA
Shelly Rodgers, Missouri School of Journalism, USA

Chapter 11
E-Health and Digital Inclusion .......................................................................................................... 197
Lorna Gibson, University of Dundee, UK
David Sloan, SchoUniversity of Dundee, UK
Wendy Moncur, University of Aberdeen, UK

Chapter 12
ICTS and Their Role in Health Promotion: A Preliminary Situation Analysis in Selected Botswana Rural Communities ................................................................................................. 211
Motshedisi B. Sabone, University of Botswana, Botswana
Keitshokile D. Mogobe, University of Botswana, Botswana
Tiny G. Sabone, University of Botswana, Botswana

Chapter 13
Information Security Standards for Health Information Systems: The Implementer’s Approach .... 225
Evangelos Kotsonis, Adacom SA, Greece
Stelios Eliakis, Athens University of Economics and Business, Greece
This section presents an extensive coverage of various tools and technologies available in the field of User-Driven Healthcare that practitioners and academicians alike can utilize to develop different techniques. These chapters enlighten readers about fundamental research on the many tools facilitating the burgeoning field of User-Driven Healthcare. It is through these rigorously researched chapters that the reader is provided with countless examples of the up-and-coming tools and technologies emerging from the field of User-Driven Healthcare. With 13 chapters, this section offers a broad treatment of some of the many tools and technologies within the User-Driven Healthcare field.

Chapter 14
RFID Applications in E-Healthcare ................................................................. 259

Mohamed K. Watfa, University of Wollongong in Dubai, UAE
Manprabhjot Kaur, University of Wollongong Dubai, UAE
Rashida Firoz Daruwala, University of Wollongong Dubai, UAE

Chapter 15
Generating Indicators for Diagnosis of Fault Levels by Integrating Information from Two or More Sensors ................................................................. 288

Xiaomin Zhao, University of Alberta, Canada
Ming J Zuo, University of Alberta, Canada
Ramin Moghaddass, University of Alberta, Canada

Chapter 16
E-Health Communities for Learning Healthy Habits: How to Consider Quality and Usability .... 310

Åsa Smedberg, Stockholm University, Sweden

Chapter 17

Dung V. Pham, The University of Melbourne, Australia
Malka N. Halgamuge, The University of Melbourne, Australia
Thas Nirmalathas, The University of Melbourne, Australia
Bill Moran, The University of Melbourne, Australia

Chapter 18
Overview of the ISO/IEEE11073 Family of Standards and their Applications to Health Monitoring ................................................................. 357

J. Escayola, University of Zaragoza, Spain
J.D. Trigo, University of Zaragoza, Spain
I. Martínez, University of Zaragoza, Spain
M. Martínez-Espronceda, Public University of Navarre, Spain
A. Aragüés, University of Zaragoza, Spain
D. Sancho, University of Zaragoza, Spain
S. Led, Public University of Navarre, Spain
L. Serrano, Public University of Navarre, Spain
J. García, University of Zaragoza, Spain
Chapter 19
Electronic Health Record Implementation in the United States Healthcare Industry: Making the Process of Change Manageable ................................................................. 382
Michelle Lee D’Abundo, University of North Carolina at Wilmington, USA

Chapter 20
e-Health Technologies in Home Care Nursing: Recent Survey Results and Subsequent Ethical Issues ........................................................................................................ 396
Hartmut Remmers, University of Osnabrück, Germany
Manfred Hülsken-Giesler, University of Osnabrück, Germany

Chapter 21
Advanced Video Distribution for Wireless E-Healthcare Systems ........................................ 421
Anna Zvikhachevska, Lancaster University, UK
Lyudmila Mihaylova, Lancaster University, UK

Chapter 22
Cyber Physical Security Solutions for Pervasive Health Monitoring Systems ................. 447
Krishna K. Venkatasubramanian, University of Pennsylvania, USA
Sidharth Nabar, University of Washington, USA
Sandeep K. S. Gupta, Arizona State University, USA
Radha Poovendran, University of Washington, USA

Chapter 23
Using Biometrics to Secure Patient Health Information .................................................. 466
Dennis Backherms, Capella University, USA

Chapter 24
Mapping Input Technology to Ability .............................................................................. 480
Ainara Garzo, Fatronik Foundation, Spain
Stefan P. Carmien, Fatronik Foundation, Spain
Xabier Madina, XMadina Tecnologia Adaptativa, S.L., Spain

Chapter 25
A Simple Web-Based Image Database System for Facilitating Medical Care in Dermatological Clinics ............................................................................................ 502
Takeshi Toda, Nihon University, Japan
PaoMin Chen, Nihon University, Japan
Shinya Ozaki, Nihon University, Japan
Kazunobu Fujita, Fujita Parkside Clinic, Japan
Naoko Ideguchi, Teikyo Heisei University, Japan
Chapter 26
Grid for Post Operative Care through Wireless Sensor Networks

N.P Chowdhry, Mehran University of Engineering and Technology, Pakistan
Adnan Ashraf, Mehran University of Engineering and Technology, Pakistan
B.S Chowdhry, Mehran University of Engineering and Technology, Pakistan
A.K Baloch, Mehran University of Engineering and Technology, Pakistan
A.W Ansari, University of Sindh, Pakistan
H. De Meer, University of Passau, Germany

Section 3
Frameworks and Methodologies
This section provides in-depth coverage of conceptual architecture frameworks to provide the reader with a comprehensive understanding of the emerging developments within the field of User-Driven Healthcare. Research fundamentals imperative to the understanding of developmental processes within User-Driven Healthcare are offered. From broad examinations to specific discussions on methodology, the research found within this section spans the discipline while offering detailed, specific discussions. From basic designs to abstract development, these chapters serve to expand the reaches of development and design technologies within the User-Driven Healthcare community. This section includes 14 contributions from researchers throughout the world on the topic of User-Driven Healthcare.

Chapter 27
Identifying the Essential Design Requirements for Usable E-Health Communities in Mobile Devices

Ricardo Mendoza-González, Instituto Tecnológico de Aguascalientes, Mexico
Miguel Vargas Martin, University of Ontario Institute of Technology, Canada
Laura C. Rodríguez-Martínez, Instituto Tecnológico de Aguascalientes, Mexico

Volume II

Chapter 28
User Diversity as a Challenge for the Integration of Medical Technology into Future Smart Home Environments

Wiktoria Wilkowska, RWTH Aachen University, Germany
Martina Ziefle, RWTH Aachen University, Germany

Chapter 29
“Developed in the South”: An Evolutionary and Prototyping Approach to Developing Scalable and Sustainable Health Information Systems

Vincent Shaw, University of Oslo, Norway & Health Information Systems Program, South Africa
Jorn Braa, University of Oslo, Norway

Chapter 30
End-User Participation in Health IT Development: The EUPHIT Method

Anna Marie Balling Høstgaard, Aalborg University, Denmark
Chapter 31
Resolving and Mediating Ambiguous Contexts in Pervasive Environments ................................................. 630
  Nirmalya Roy, Institute for Infocomm Research, Singapore
  Sajal K. Das, University of Texas at Arlington, USA
  Christine Julien, University of Texas at Austin, USA

Chapter 32
Developing Community Ontologies in User Driven Healthcare ................................................................. 655
  Jane Fitzpatrick, University of the West of England, UK
  Willie Ako, University of Bristol, UK

Chapter 33
Ubiquitous Information Therapy Service through Social Networking Libraries: An Operational
Web 2.0 Service Model .................................................................................................................................. 673
  Vahideh Zarea Gavgani, Tabriz University of Medical Sciences, Iran

Chapter 34
Design and Implementation of Mobile-Based Technology in Strengthening Health Information
System: Aligning mHealth Solutions to Infrastructures ............................................................................. 689
  Saptarshi Purkayastha, Norwegian University of Science & Technology, Norway

Chapter 35
Health Information Exchange for Improving the Efficiency and Quality of Healthcare Delivery .... 714
  Jing Shi, North Dakota State University, USA
  Sudhindra Upadhyaya, North Dakota State University, USA
  Ergin Erdem, North Dakota State University, USA

Chapter 36
The Protocols of Privileged Information Handling in an E-Health Context: Australia ....................... 737
  Juanita Fernando, Monash University, Australia

Chapter 37
European E-Health Framework: Towards More “Patient-Friendly” Healthcare Services? ............. 760
  Korinna Zoi Karamagioli, Alexandra University Hospital, Greece
  Evika Karamagioli, Gov2u, Greece

Chapter 38
E-Health Business Models Prototyping by Incremental Design ................................................................. 776
  Josep Ma. Monguet, Universitat Politècnica de Catalunya, Spain
  Eduardo Huerta, Universitat Politècnica de Catalunya, Spain
  Joaquín Fernández, Universitat Politècnica de Catalunya, Spain
  Marco Ferruzca, Metropolitan Autonomus University, Mexico
  Susana Badillo, Metropolitan Autonomus University, Mexico
Section 4
Cases and Applications

This section discusses a variety of applications and opportunities available that can be considered by practitioners in developing viable and effective User-Driven Healthcare programs and processes. This section includes 14 chapters that review topics from case studies in the EU to best practices in Africa and ongoing research in the United States. Further chapters discuss User-Driven Healthcare in a variety of settings. Contributions included in this section provide excellent coverage of today’s IT community and how research into User-Driven Healthcare is impacting the social fabric of our present-day global village.

Chapter 41
Key Health Information Systems Outsourcing Issues from Six Hospital Cases ........................................ 824
Chad Lin, Curtin University, Australia
Yu-An Huang, National Chi Nan University, Taiwan
Chien-Fa Li, Puli Veterans Hospital, Taiwan
Geoffrey Jalleh, Curtin University, Australia

Chapter 42
An E-Health System for Promoting Wellbeing in the Elderly: The Butler System ....................................... 838
Cristina Botella, Universidad Jaume I, Spain & CIBER Fisiopatología Obesidad y Nutrición (CB06/03), Instituto Carlos III, Spain
Rosa M. Baños, Universidad de Valencia, Spain & CIBER Fisiopatología Obesidad y Nutrición (CB06/03), Instituto Carlos III, Spain
Ernestina Etchemendy, CIBER Fisiopatología Obesidad y Nutrición (CB06/03), Instituto Carlos III, Spain
Diana Castilla, Universidad Jaume I, Spain & CIBER Fisiopatología Obesidad y Nutrición (CB06/03), Instituto Carlos III, Spain
Azucena García-Palacios, Universidad Jaume I, Spain & CIBER Fisiopatología Obesidad y Nutrición (CB06/03), Instituto Carlos III, Spain
Mariano Alcañiz, CIBER Fisiopatología Obesidad y Nutrición (CB06/03), Instituto Carlos III, Spain & University Research Institute for Bioengineering and Human Centered Technology (UPV), Spain
Chapter 43
Australian Patient Organizations: Using Digital Technologies to Engage Health Citizen Communities in Health Policy ................................................................. 853

Anni Dugdale, University of Canberra, Australia

Chapter 44
Rural E-Health Infrastructure Development .............................................................. 870

Ali Zalzala, Hikma Group Ltd, UAE
Stanley Chia, Vodafone Group R&D, USA
Laura Zalzala, Bucharest Academy of Economic Studies, Romania
Subrat Sahu, Pandit Deendayal Petroleum University, India
Suresh Vaghasiya, Pandit Deendayal Petroleum University, India
Ali Karimi, Trans Technology Group, USA

Chapter 45
An Overview of E-Health Development in Australia .................................................. 901

Say Yen Teoh, RMIT University, Australia
Mohini Singh, RMIT University, Australia
Josephine Chong, Auckland University of Technology, New Zealand

Chapter 46
Brazilian Occupational Therapy Perspective about Digital Games as an Inclusive Resource to Disabled People in Schools ................................................................. 918

Suzana Rocha Siqueira, Special Needs Healthcare Institution (FAENOL) of Nova Lima City, Brazil
Eliane Cristina de Freitas Rocha, Pontifícia Universidade Católica de Minas Gerais, Brazil
Marcelo Souza Nery, Pontifícia Universidade Católica de Minas Gerais, Brazil

Chapter 47
E-Health Knowledge Management by Australian University Students ........................ 938

Wayne Usher, Griffith University, Australia
Lay San Too, Griffith University, Australia

Chapter 48
An Exploration of the Experiences of Migrant Women: Implications for Policy Development of Effective User Driven Health Care Delivery Systems ......................................................... 954

Jane Fitzpatrick, Independent Researcher, UK

Chapter 49
The Development of the English National Health Information Infrastructure .................. 968

Panos Constantinides, Frederick University, Cyprus

Chapter 50
The Development of a Regional Health Information Infrastructure in Greece .................. 992

Panos Constantinides, Frederick University, Cyprus
Chapter 51
Case Studies in Customization of E-Health Services .......................................................... 1018
Dimitris Kardaras, Athens University of Economics and Business, Greece
Bill Karakostas, City University, London, UK)

Chapter 52
From Idea to Use: Lessons Learned From a Participatory ICT Healthcare Case Study............. 1037
Henrik Enquist, Sweden

Chapter 53
Patients with a Spinal Cord Injury Inform and Co-Construct Services at a Spinal Cord
Rehabilitation Unit .................................................................................................................. 1054
Susan Sliedrecht, Auckland Spinal Rehabilitation Unit, New Zealand
Elmarie Kotzé, University of Waikato, New Zealand

Chapter 54
Stomodeum to Proctodeum: Email Narratives on Clinical Problem Solving in
Gastroenterology ...................................................................................................................... 1073
Paramartha Bhattacharya, Consultant Physician, India
Amar Puri Asanga, Yoga consultant, Nepal
Rakesh Biswas, People’s College of Medical Sciences, India

Section 5
Issues and Challenges
This section contains 14 chapters, giving a wide variety of perspectives on User-Driven Healthcare and its implications. Such perspectives include reading in privacy, security, trust, ethics, and many more. The section also discusses new ethical considerations within transparency and accountability. Within the chapters, the reader is presented with an in-depth analysis of the most current and relevant issues within this growing field of study. Crucial questions are addressed and alternatives offered, and topics discussed such as interprofessional care, ethical guidelines, health education, interoperability, and much more.

Chapter 55
Conceiving Community Knowledge Records as e-Governance Concerns in Wired Healthcare
Provision ................................................................................................................................. 1093
Kam Hou VAT, University of Macau, Macau

Volume III

Chapter 56
Identity Management and Audit Trail Support for Privacy Protection in E-Health Networks .... 1112
Liam Peyton, University of Ottawa, Canada
Jun Hu, University of Ottawa, Canada
Chapter 57
Evaluation Considerations for E-Health Systems ................................................................. 1126

Anastasia N. Kastania, Biomedical Research Foundation of the Academy of Athens, Greece & Athens University of Economics and Business, Greece

Chapter 58
Privacy and Security in e-Health Applications ...................................................................... 1141

Milan Petković, Philips Research Europe and Eindhoven University of Technology, The Netherlands
Luan Ibraimi, University of Twente, The Netherlands

Chapter 59
Foundations of Trust for E-Health .......................................................................................... 1167

Cynthia L. Corritore, Creighton University, USA
Beverly Kracher, Creighton University, USA
Susan Wiedenbeck, Drexel University, USA
Robert Marble, Creighton University, USA

Chapter 60
Legal Issues in E-healthcare Systems ...................................................................................... 1194

Jawahitha Sarabdeen, University of Wollongong in Dubai, UAE

Chapter 61
Representing Organizational Conservation of Information: A Review of Telemedicine and E-Health in Georgia ................................................................. 1220

Max E. Stachura, Medical College of Georgia, USA
Joseph Wood, Dwight D. Eisenhower Army Medical Center, USA
Fjorentina Angjellari-Dajci, Paine College, USA
James M. Grayson, Augusta State University, USA
Elena V. Astapova, Medical College of Georgia, USA
Hui-Lien Tung, Paine College, USA
Donald Sofge, Naval Research Laboratory, USA
W.F. Lawless, Paine College, USA

Chapter 62
Implementation Issues on a National Electronic Health Record Network ............................. 1236

John McGaha, Capella University, USA

Chapter 63
Caught in the Web: The Internet and the Demise of Medical Privacy .................................... 1252

Keith A. Bauer, USA

Chapter 64
Interprofessional Care and Health Care Complexity: Factors Shaping Human Resources Effectiveness in Health Information Management ......................................................... 1273

Kerry Johnson, University of Ontario Institute of Technology, Canada
Jayshiro Tashiro, University of Ontario Institute of Technology, Canada
Chapter 65
Reframing Dichotomies: Human Experiential Design of Healthcare Technologies ................................. 1303
Kei Hoshi, Umeå University, Sweden

Chapter 66
Ethical Guidelines for the Quality Assessment of Healthcare ................................................................. 1332
Amit Chattopadhyay, National Institutes of Health, USA
Khushdeep Malhotra, National Institutes of Health, USA
Sharmila Chatterjee, George Washington University, USA

Chapter 67
Unlearning and Relearning in Online Health Education ............................................................................. 1348
Suptendra Nath Sarbadhikari, CAL2CAL Institute, India

Chapter 68
The Concept of Interoperability for AAL Systems ....................................................................................... 1364
Lamprini T. Kolovou, University of Patras, Greece
Dimitrios Lymberopoulos, University of Patras, Greece

Section 6
Emerging Trends
This section highlights research potential within the field of User-Driven Healthcare while exploring uncharted areas of study for the advancement of the discipline. Introducing this section are chapters that set the stage for future research directions and topical suggestions for continued debate, centering on the new venues and forums for discussion. A pair of chapters on the usability and effectiveness research makes up the middle of the section of the final 13 chapters, and the book concludes with a look ahead into the future of the User-Driven Healthcare field, with “The Nationwide Health Information Network.” In all, this text will serve as a vital resource to practitioners and academics interested in the best practices and applications of the burgeoning field of User-Driven Healthcare.

Chapter 69
Privacy Considerations for Electronic Health Records ............................................................................... 1387
Mary Kuehler, University of Tulsa, USA
Nakeisha Schimke, University of Tulsa, USA
John Hale, University of Tulsa, USA

Chapter 70
Secure Exchange of Electronic Health Records ............................................................................................ 1403
Alejandro Enrique Flores, University of Wollongong, Australia
Khin Than Win, University of Wollongong, Australia
Willy Susilo, University of Wollongong, Australia

Chapter 71
A Medical Data Trustworthiness Assessment Model ..................................................................................... 1425
Bandar Alhaqbani, Queensland University of Technology, Australia
Colin J. Fidge, Queensland University of Technology, Australia
Chapter 72
Usability Engineering and E-Health .......................................................... 1446
David Haniff, Pervasive Technology Lab (CIC), UK

Chapter 73
Dynamic Stress Management: Self-Help through Holistic System Design........ 1469
Åsa Smedberg, Stockholm University, Sweden
Hélène Sandmark, Mälardalen University, Sweden

Chapter 74
Will Comparative Effectiveness Research Lead to Healthcare Rationing? ............ 1487
Mary Brown, Capella University, USA

Chapter 75
Health 2.0 and Medicine 2.0: Safety, Ownership and Privacy Issues.................. 1508
Anastasius Mountzoglou, P&A Kyriakou Children’s Hospital, Greece

Chapter 76
Potential of WEB Based Learning in Managing for the Sustained Success of a Healthcare
Organization Based on IMPROHEALTH® Project ........................................ 1523
Kristina Zgodavová, Technical University of Košice, Slovakia
Aleš Bourek, Masaryk University, Czech Republic

Chapter 77
The Evolving Role of Pharmacoinformatics in Targeting Drug-Related Problems in Clinical
Oncology Practice .................................................................................. 1541
Kevin Yi-Lwern Yap, Institute of Digital Healthcare, WMG, University of Warwick, UK

Chapter 78
Emerging Trends in User-Driven Healthcare: Negotiating Disclosure in Online Health Community
Organizations .................................................................................. 1589
Handan Victan, University of Eastern Kentucky, USA

Chapter 79
The Emerging Hispanic Use of Online Health Information in the United States: Cultural
Convergence or Dissociation? .................................................................. 1607
Nicole St. Germaine-McDaniel, Angelo State University, USA

Chapter 80
E-Discovery and Health Care IT: An Investigation ........................................ 1622
Vasupradha Vasudevan, Management Sciences and System, USA
H.R. Rao, Management Sciences and System, USA

Chapter 81
The Nationwide Health Information Network: A Biometric Approach to Prevent Medical Identity
Theft.............................................................................................. 1636
Omotunde Adeyemo, TEKsystems, USA
